**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1984-99**  
**TABLE 1 - RECORD SPECIFICATIONS**

Table 1 specifies the standard record format to be used for electronic reporting. Each electronic cost report submission (file) has four types of records. The first group (type 1 records) contains information for identifying, processing, and resolving problems. The text used throughout the cost report for variable line labels (e.g., Worksheet A) and variable column headers (Worksheet B-1) are included in the type 2 records. Refer to Table 5 for cost center coding. The data, detailed in Table 3, is identified as type 3 records. The encryption coding at the end of the file, records 1, 1.01, and 1.02, are type 4 records.

The medium for transferring cost reports submitted electronically to fiscal intermediaries is 3½" diskettes. These disks must be in IBM format. The character set must be ASCII. Providers should seek approval from their fiscal intermediaries regarding the method of submission to insure that the method of transmission is acceptable.

The following are requirements for all records:

1. All alpha characters must be in upper case.
2. For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence.
3. No record may exceed 60 characters.

Below is an example of a set of type 1 records with a narrative description of their meaning.

Record #1: This is a cost report file submitted by Provider 010123 for the period from January 1, 2004 (2004001) through December 31, 2004 (2004366). It is filed on the Form CMS-1984-99. It is prepared with vendor number A99's PC based system, version number 5. Position 38 changes with each new test case and/or reapproval and is alpha. Positions 39 and 40 will remain constant for approvals issued after the first test case. This file is prepared by the hospice on January 20, 2005 (2005020). The electronic cost report specification, dated December 31, 2004 (2004366), is used to prepare this file.

FILE NAMING CONVENTION

Name each cost report file in the following manner:

HSNNNNNN.YYL, where

1. HS (Electronic Cost Report) is constant;
2. NNNNNN is the 6 digit Medicare hospice provider number;
3. YY is the year in which the provider's cost reporting period ends; and
4. L is a character variable (A-Z) to enable separate identification of files from hospices with two or more cost reporting periods ending in the same calendar year.

b. Column Headings				
Statistical Basis & Code	10	X	21-30	Alphanumeric, left justified

The type 2 records contain text which appears on the pre-printed cost report. Of these, there are three groups: (1) Worksheet A cost center names (labels); (2) column headings for stepdown entries; and (3) other text appearing in various places throughout the cost report. The standard cost center labels are listed below.

A Worksheet A cost center label must be furnished for every cost center with cost or charge data anywhere in the cost report. The line and subline numbers for each label must be the same as the line and subline numbers of the corresponding cost center on Worksheet A. The columns and subcolumn numbers are always set to zero.

**TABLE 1 - RECORD SPECIFICATIONS**

**RECORD NAME: Type 2 Records for Labels (Continued)**

Column headings for the General Service cost centers on Worksheets B-1 and B are supplied once, consisting of one to three records. The statistical basis shown on worksheet B-1 is also reported. The statistical basis consists of one or two records (lines 4 and 5). Statistical basis code is supplied only to Worksheet B-1 columns and recorded as line 6 and only for capital cost centers, columns 1-4 and subscripts as applicable. The statistical code agree with the statistical basis indicated on line 4 and 5, i.e., code 1 = square footage, code 2 = dollar value, and code 3 = all others. Refer to Table 2 for the special worksheet identifier to be used with column headings and statistical basis and to Table 3 for line and column references.

Use the following type 2 cost center descriptions for all Worksheet A standard cost center lines.

**TABLE 2 - WORKSHEET INDICATORS**

This table contains the worksheet indicators that are used for electronic cost reporting. A worksheet indicator is provided only for those worksheets from which data are to be provided.

The worksheet indicator consists of seven characters in positions 2-8 of the record identifier. The first two characters of the worksheet indicator (positions 2 and 3 of the record identifier) always show the worksheet. The third character of the worksheet indicator (position 4 of the record identifier) is used in several ways. It may be used as part of the worksheet, e.g., A81. The fourth character of the worksheet indicator (position 5 of the record identifier) represents the type of provider, by using the keys below. Except for Worksheet A-6 (to handle multiple worksheets), the fifth and sixth characters of the worksheet indicator position 6 and 7 of the record identifier) identify worksheets Federal program (18 = title XVIII, 05 = Title V, or 19 =Title XIX) or worksheets required for the facility (00 = Universal). The seventh character of the worksheet indicator (position 8 of the record identifier) represent the worksheet part.

- (a) Worksheets With Multiple Parts Using Identical Worksheet Indicator  
 Although this worksheet has several parts, the lines are numbered sequentially. This worksheet identifier is used with all lines from this worksheet regardless of the worksheet part. This differs from the Table 3 presentation which still identifies each worksheet and part as they appear on the printed cost report. This affects Worksheet S-1.
- (b) Multiple Worksheets for Reclassification and Adjustments Before and After Stepdown  
 The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 01-99 to accommodate reports with more lines on Worksheets A-6. For reports which do not need additional worksheets, the default is 01. For reports which d need additional worksheets, the first page of each worksheet is numbered .01. The number for each additional page of each worksheet is incremented by 1.

**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1984-99****TABLE 3 - LIST OF DATA ELEMENTS WITH WORKSHEET, LINE, AND COLUMN DESIGNATIONS**

## INTRODUCTION

This table identifies those data elements necessary to calculate a hospice cost report. It also identifies some figures from a completed cost report. These calculated fields (e.g., Worksheet B, column 7) are needed to verify the mathematical accuracy of the raw data elements and to isolate differences between the file submitted by the hospital complex and the report produced by the fiscal intermediary. Where an adjustment is made, that record must be present in the electronic data file. For explanations of the adjustment required, refer to the cost report instructions.

Table 3 "Usage" column is used to specify the format of each data item as follows:

- 9 Numeric, greater than or equal to zero.
- 9 Numeric, may be either greater than or less than zero.
- 9(x).9(y) Numeric, greater than zero, with x or fewer significant digits to the left of the decimal point, a decimal point, and exactly y digits to the right of the decimal point.
- X Character.

Consistency in line numbering (and column numbering for general service cost centers) for each cost center is essential. The sequence of some cost centers does change among worksheets.

Table 3 refers to the data elements needed from a standard cost report. When a standard line is subscripted, the subscripted lines must be numbered sequentially with the first subline number displayed as "01" or "1" in field locations 14-15. It is unacceptable to format in series of 10, 20, or skip subline numbers (i.e., 01, 03, except for skipping subline numbers for prior year cost center(s) deleted in the current period or initially created cost center(s) no longer in existence after cost finding). Exceptions are specified in this manual. For "Other (specify)" lines, i.e. any other non cost center lines, all subscripted lines should be in sequence and consecutively numbered beginning with subscripted subline "01". Automated systems should reorder these numbers where the provider skips or deletes a line number in the series.

Drop all records with zero values from the file. Any record absent from a file is treated as if it were zero.

All numeric values are presumed positive. Leading minus signs may only appear in data with values less than zero which are specified in Table 3 with a usage of "-9".

Italic script within this table denotes adjustments which are not displayed in the print image or hard copy of the cost report, but are contained in the ECR file.

\* In each column using accumulated costs as the statistical basis for allocating costs, identify each cost center which is to receive no allocation with a negative 1 (-1) placed in the accumulated cost column. Providers may elect to indicate total accumulated cost as a negative amount in the reconciliation column. However, there should never be entries in both the reconciliation column and accumulated column simultaneously on the same line. For those cost centers which are to receive partial allocation of costs, provide only the cost to be excluded from the statistic as a negative amount on the appropriate line in the reconciliation column.

If line 6 is fragmented, line 6 must be deleted and subscripts of line 6 must be used.

+ Include any column which uses accumulated cost as it basis for allocation.

INSTRUCTIONS FOR PROGRAMMERS

Cost center coding is required because there are thousands of unique cost center names in use by providers. Many of these names are peculiar to the reporting provider and give no hint as to the actual function being reported. By using codes to standardize meanings, practical data analysis becomes possible. The methodology to accomplish this must be rigidly controlled to enhance accuracy.

For any added cost center names (the preprinted cost center labels must be precoded), the preparer must be presented with the allowable choices for that line or range of lines from the lists of standard and nonstandard descriptions. They will then select a description that best matches their added label. The code associated with the matching description, including increments due to choosing the same description more than once, will then be appended to the user's label by the software.

Additional guidelines are:

- o Any pre-existing codes for the line must not be allowed to carry over.
- o All "Other . . ." lines must not be precoded.
- o The order of choice is standard first, followed by specific nonstandard, and, lastly, the nonstandard "Other . . ." cost centers.
- o When the nonstandard "Other . . ." is chosen, the preparer must be prompted with "Is this the most appropriate choice?" and offered a chance to answer yes or to select another description.
- o The cost center coding process must be able to be invoked again for purposes of making corrections.
- o A separate list showing the preparer's added cost center names on the left with the chosen standard or nonstandard description and code on the right must be printed for review.
- o The number of times a description can be selected on a given report must be displayed on the screen next to the description and this number must decrease with each usage to show the remaining numbers available. The numbers are shown on the standard and nonstandard cost center tables.
- o Standard cost center lines, descriptions, and codes are not to be changed. The acceptable format for these are displayed in the STANDARD COST CENTER DESCRIPTIONS AND CODES listed on pages 38-222. The proper line number is the first two digits of the cost center code. All "Other" nonstandard lines should be changed to the appropriate cost center name.

**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1984-99**  
**TABLE 5 - COST CENTER CODING**

INSTRUCTIONS FOR PREPARERS

Coding of Cost Center Labels

Cost center coding is a methodology for standardizing the meaning of cost center labels as used by hospices on the Medicare cost report. The use of this coding methodology allows providers to continue to use their labels for cost centers that have meaning within the individual institution.

The four digit codes that are required to be associated with each label provide standardized meaning for data analysis. Normally, it is only necessary to code any added labels because the preprinted STANDARD labels are automatically coded by CMS approved cost report software.

Additional cost center descriptions have been identified through analysis of provider labels. The meanings of these additional descriptions were sufficiently different when compared to the Standard labels to warrant their use. These additional descriptions are hereafter referred to as the NONSTANDARD labels. Included with the nonstandard descriptions are "Other . . ." designations to provide for situations where no match in meaning can be found. Refer to Worksheet A, lines 25, 39, and 53. Both the standard and nonstandard cost center descriptions along with their cost center codes are shown on Table 5. The "USE" column on that table indicates the number of times that a given code can be used on one cost report. You are required to compare your added label to the descriptions shown on the standard and nonstandard table for purposes of selecting a code. Most CMS approved software provides an automated process to present you with the allowable choices for the line/column being coded and automatically associate the code for the selected matching description with your label.

Additional Guidelines

Categories

You must make your selection from the proper category such as general service description for general service lines, ancillary descriptions for ancillary cost center lines, etc.

---

**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1984-99**  
**TABLE 5 - COST CENTER CODING**

Use of Cost Center Coding Description More Than Once

Often a description from the standard or nonstandard tables applies to more than one of the labels being added by the preparer. In the past, it was necessary to determine which code was to be used and then increment the code number upwards by one for each subsequent use. This was done to provide a unique code for each cost center label. Now, most approved software associate the proper code, including increments as required, once a matching description is selected. Remember to use your label. You are matching to CMS's description only for coding purposes.

Cost Center Coding and Line Restrictions

Cost center codes may only be used in designated lines in accordance with the classification of the cost center(s), i.e., lines 1 through 6 may only contain cost center codes within the general service cost center category of both standard and nonstandard coding. For example, in the general service cost center category for Operation of Plant cost, line 3 and subscripts thereof should only contain cost center codes of 0300-0349 and nonstandard cost center codes. This logic must hold true for all other cost center categories, i.e., inpatient care services, visiting services, and hospice nonreimbursable services cost centers.

**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1984-99**  
**TABLE 6 - EDITS**

Medicare cost reports submitted electronically must meet a variety of edits. These include mathematical accuracy edits, certain minimum file requirements, and other data edits. Any vendor software which produces an electronic cost report file for Medicare hospices must automate all of these edits. Failure to properly implement these edits may result in the suspension of a vendor's system certification until corrective action is taken. The vendor's software should provide meaningful error messages to notify the hospice of the cause of every exception. The edit message generated by the vendor systems must contain the related 4 digit and 1 alpha character, where indicated, reject/edit code specified below. Any file submitted by a provider containing a level I edit will be rejected by the fiscal intermediary. Notification must be made to CMS for any exceptions.

The edits are applied at two levels. Level I edits (1000 series reject codes) are those which test the format of the data to identify for correction of those error conditions which will result in a cost report rejection. These edits also test for the presence of some critical data elements specified in Table 3. Level II edits (2000 series edit codes) identify potential inconsistencies and/or missing data items. These items should be resolved at the provider site and appropriate worksheets and/or data submitted with the cost report. Failure to submit the appropriate data with your cost report may result in payments being withheld pending resolution of the issue(s).

The vendor requirements (above) and the edits (below) reduce both intermediary (FI) processing time and unnecessary rejections. Vendors should develop their programs to prevent their client hospices from generating an electronic cost report file where Level I edits conditions exist. Ample warnings should be given the provider where Level II edit conditions are violated.

Note: Dates in brackets [ ] at end of edit indicate effective date of that edit for cost reporting periods ending on or after that date. Dates followed by a "b" are for cost reporting periods beginning on or after and the date followed by an "s" are for services rendered on or after the specified date. [12/31/2004]

**I. Level I Edits (Minimum File Requirements)**

<b><u>Edit</u></b>	<b><u>Condition</u></b>
1000	The first digit of every record must be either 1, 2, 3, or 4 (encryption code only). [12/31/2004]
1005	No record may exceed 60 characters. [12/31/2004]
1010	All alpha characters must be in upper case. This is exclusive of the vendor information, type 1 record, record number 3 and the encryption code, type 4 record, record numbers 1, 1.01, and 1.02. [12/31/2004]
1015	For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence. [12/31/2004]
1020	The hospice provider number (record #1, positions 17-22) must be valid and numeric. [12/31/2004]
1025	All dates (record #1, positions 23-29, 30-36, 45-51, and 52-58) must be in Julian format and a possible date. [12/31/2004]

---

**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1984-99**  
**TABLE 6 - EDITS**

<b><u>Edit</u></b>	<b><u>Condition</u></b>
1030	The fiscal year beginning date (record #1, positions 23-29) must be greater than 28 days and the fiscal year ending date (record #1, positions 30-36) cannot exceed 457 days. [12/31/2004]
1035	The vendor code (record #1, positions 38-40) must be a valid code. [12/31/2004]
1050	The type 1 record #1 must be correct and the first record in the file. [12/31/2004]
1055	All record identifiers (positions 1-20) must be unique. [12/31/2004]
	NOTE: FIs attempt to correct if all record identifiers are not unique in their working copy and continue processing the cost report. If the condition is correctable, they notify the provider's vendor and send copy of ECR file both to the vendor and CMS Central Office. CMS Central Office requires a vendor software update to resolve condition. [12/31/2004]
1060	Only a Y or N are valid for fields which require a yes/no response. [12/31/2004]
1065	Variable columns (Worksheet B, and Worksheet B-1) must have a corresponding type 2 record (Worksheet A label) with a matching line number. [12/31/2004]
1070	All line, subline, column, and subcolumn numbers (positions 11-13, 14-15, 16-18, and 19-20, respectively) must be numeric, except for any cost center with accumulated cost as its statistics which must have its Worksheet B-1 reconciliation column numbered the same as its Worksheet A line number followed by an "A" as part of the line number followed by the subline number. [12/31/2004]
1075	Cost center integrity must be maintained throughout the cost report. For subscripted lines, the relative position must be consistent throughout the cost report. [12/31/2004]
1080	For every line used on Worksheets A, A-1, A-2, A-3 and B, there must be a corresponding type 2 record. [12/31/2004]
1090	Fields requiring numeric data (days, charges, discharges, costs, etc.) may not contain any alpha character. [12/31/2004]
1100	In all cases where the file includes both a total and the parts which comprise that total, each total must equal the sum of its parts. [12/31/2004]
1005S	The cost report ending date must be on or after December 31, 2004. [12/31/2004]
1010S	The hospice name must be present on worksheet S-1 line 1 column 1. [12/31/2004]
1020S	The hospice name, address, <b>county</b> , certification date, <b>and provider number</b> (Worksheet S-1, <b>lines 1, 2, 4 and 6</b> , columns 1-5 <b>as appropriate</b> ) must be present and valid. [12/31/2004]
1030S	All amounts reported on Worksheet S-1, must not be less than zero. [12/31/2004]

**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1984-99**  
**TABLE 6 - EDITS**

<b><u>Edit</u></b>	<b><u>Condition</u></b>
1040S	The hospice certification date (Worksheet S-1 line 4, column 1) must be present and possible. The date has to be before the cost report ending date and after 1/1/1966. [12/31/2004]
1000A	Worksheet A, columns 1 and 2, line 100 must be greater than zero. [12/31/2004]
1020A	For reclassifications reported on Worksheet A-6, the sum of all increases (columns 4 and 5) must equal the sum of all decreases (columns 8 and 9). [12/31/2004]
1025A	Worksheet A-6, column 1 must be present for each line with a column 3, 4, 5, 7, 8, or 9 entry. There must be an entry on each line of columns 4 or 5 for each entry in column 3 and vice versa and an entry on each line of columns 8 or 9 for each entry in column 7 and vice versa. All entries must be valid; for example, no salary adjustments on columns 3 and/or 7, lines 1-2 for capital [12/31/2004]
1040A	For Worksheet A-8 adjustments on lines 1-2, or 4-8, if either columns 1, 2, or 4 has an entry, then all three columns for that line must have entries and if any one of columns 0, 1, 2, or 4 for line 8 and subscripts thereof has an entry, then all four columns for that line must have entries. [12/31/2004]
1045A	If there are any transactions with related organizations or home offices as defined in CMS Pub. 15-I, chapter 10 (Worksheet S-1, column 1, line 18 is "Y"), Worksheet A-8-1, Part A, columns 4 or 5 (amounts in columns 4 or 5 must have a parallel line number in column 1 and vice versa), line 5 must be greater than zero; and Part B, column 1, any one of lines 1-5 must contain any one of alpha characters A thru G. Conversely, if Worksheet S-1, column 1, line 18 is "N", Worksheet A-8-1 should not be present. [12/31/2004]
1000B	On Worksheet B-1, all statistical amounts must be greater than zero, except for reconciliation columns. [12/31/2004]
1005B	Worksheet B, column 7, line 100 must be greater than zero. [12/31/2004]
1010B	For each general service cost center with a net expense for cost allocation greater than zero (Worksheet B, columns 1 through 6, line 100), the corresponding total cost allocation statistics (Worksheet B-1; column 1, line 1; column 2, line 2, etc.) must also be greater than zero. Exclude from this edit any column which uses accumulated cost as its basis for allocation and any reconciliation column. [12/31/2004]
1015B	For any column which uses accumulated cost as its bases of allocation (Worksheet B-1), there may not exist on any statistical line an amount both in the reconciliation column and the accumulated cost column, including a negative one, simultaneously. [12/31/2004]

**TABLE 6 - EDITS**

**II. Level II Edits (Potential Rejection Errors)**

These conditions are usually, but not always, incorrect. These edit errors should be cleared when possible through the cost report. When corrections on the cost report are not feasible, provide additional information in schedules, note form, or any other manner as may be required by your fiscal intermediary. Failure to clear these errors in a timely fashion, as determined by your FI, may be grounds for withholding of payments.

<u>Edit</u>	<u>Condition</u>
2000	All type 3 records with numeric fields and a positive usage must have values equal to or greater than zero (supporting documentation may be required for negative amounts). [12/31/2004]
2005	Only elements set forth in Table 3, with subscripts as appropriate, are required in the file. [12/31/2004]
2010	The cost center code (position 21-24) (type 2 records) must be a code from Table 5, Cost Center Coding, and each cost center code must be unique. [12/31/2004]
2015	Standard cost center lines, descriptions, and codes should not be changed. (See Table 5 for standard descriptions and codes.) This edit applies to the standard line only and not subscripts of that code. [12/31/2004]
2020	All standard cost center codes must be entered on the designated standard cost center line and subscripts thereof as indicated in Table 5. [12/31/2004]
2030	The following standard cost centers listed below must be reported on the lines as indicated and the corresponding cost center codes may only appear on the lines as indicated. No other cost center codes may be placed on these lines or subscripts of these lines. [12/31/2004]
