TB Notification Message

Mapping Guide 06052007.xls

Attachment 1D

TB Notification Message Mapping Guide

VERSION: The version of this Message Mapping Guide is Draft 0.6 dated 6/5/2007.

This Message Mapping Guide describes the content and message mapping specifications for the fixed set of data elements used to communicate information to meet the requirements for TB Individual Case reporting to CDC. The intended audience for this document are the state/local and CDC programs and other public health related organizations interested in using the HL7 V2.5 case notification message specification for transmitting their data elements.

References

Version 1.0 of the *Message Specification Guide* is used to inform the mapping methodology for this guide.

Understanding the Organization of the Mapping Guide

Revisions

This tab is intended to provide revision control for updates made to the document.

Key

Key to columns in each Tab/Worksheet

Subject-related

This tab provides the mapping methodology for the demographic variables requested by the program.

Generic Obs.

This tab provides the content for the generic investigation questions (observations). The ones that are not used for this particular instance are greyed out.

TB Observations

This tab provides the investigation/case-related content requested by the program for this specific notification.

Notification Structure

This tab provides the structural elements for the Notification. These variables are not negotiable. Default values are provided for HL7 structural elements that are required but not part of the surveillance data requested.

Variables as Observations

Other than the variables that map to the Patient Identifier segment (see Subject-Specific tab), all other variables are passed as a series of OBX-Observation/Result segments that are logically tied to the OBR-Observation Request "section header" segment that immediately precedes it. This content presents the real differences between the messages since all types of Notifications are handled in a standard manner up to this point.

Attachment 1D

TB Notification Message Mapping Guide

Revisions

Date	Version	Description
4/20/2007	Draft v. 0.5	Added "notification subject type" to the Notification Structural Data to bring the message structure in line with the Outbreak Management version of the ORU Case Investigation Report message.
4/20/2007	Draft v. 0.5	Changed all observations that use the CE value type in OBX-2 to CWE - coded with exception - to prepare for versioning of value sets. The additional fields are still optional at this point.
4/24/2007	Draft v. 0.5	Added "patient name type" to the Notification Structural data to account for the default value that must be provided in the message.
4/24/2007	Draft v. 0.5	Remapped NTF139 to NOT108 for use as the PHIN Variable ID used for MSH-10 Message Control ID (UID nor text appears in this context)
5/3/2007	Draft v. 0.5	Removed NOT110 Record Type variable. This observation is no longer necessary as the Notification Type specified in NOT101 contains this information.
6/5/2007	Draft v. 0.6	Created a Generic Observations tab and greyed out any generic surveillance questions that TB does not use. Only the TB-specific observations remain on the TB Observations tab.

Key to columns in each Tab/Worksheet:

Column	Description
Program Variables Section	
PHIN Variable ID	PHIN element UID drawn from the coding system PH_PHINQuestions_CDC
Label	Short name for the data element, which is passed in the message.
Description	Description of the data element as in PHIN Questions.
Data Type	Data type for the variable response expected by the program area
Prog. Req/Opt	Indicator whether the program specifies the field as: R - Required - mandatory for sending the message O - Optional - if the data is available it should be passed
Coded Concepts	Concepts that the program uses in answer to a particular question that required a coded response.
May Repeat	Indicator whether the response to the data element may repeat. "Yes" in the field indicates that it may; otherwise, the field is not populated. Repeats require special processing.
Data Validation	Business rules used for validating data integrity
Value Set Name	Name of the pre-coordinated value set from which the response is drawn. The value sets and coding systems are accessible via the Public Health Information Network Vocabulary Access and Distribution Services at http://www.cdc.gov/PhinVSBrowser/StrutsController.do .
Message Mapping Methodology Section	
Message Context	Specific HL7 segment and field mapping for the element.
HL7 Data Type	HL7 data type used by PHIN to express the variable.
HL7 Usage	Use of the field for PHIN. Indicates if the field is required, optional, or conditional in a segment. The only values that appear in the Message Mapping are: <ul style="list-style-type: none"> • R – Required. Must always be populated • O – Optional. May optionally be populated.
HL7 Cardinality	Indicator of the minimum and maximum number of times the element may appear. <ul style="list-style-type: none"> • [0..0] Element never present. • [0..1] Element may be omitted and it can have at most, one Occurrence. • [1..1] Element must have exactly one Occurrence. • [0..n] Element may be omitted or may repeat up to n times. • [1..n] Element must appear at least once, and may repeat up to n times. • [0..*] Element may be omitted or repeat for an unlimited number of times. • [1..*] Element must appear at least once, and may repeat unlimited number of times. • [m..n] Element must appear at least m, and at most, n times.
Implementation Notes	Related implementation comments.

Subject/Demographic Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
DEM197	Local patient ID	The local ID of the patient/entity.	Text	R					PID-3 Patient Identifier List (does not pass Variable ID or label)	CX	R	[1..1]	Only the sending system's internally assigned patient id used for these de-identified messages
DEM115	Birth Date	Reported date of birth of patient.	Date	O					PID-7 Date/Time of Birth (does not pass Variable ID or label)	TS	O	[0..1]	
DEM113	Patient's sex	Patient's current sex.	Code	O		Male Female Unknown	Sex (MFU)		PID-8 Administrative Sex (does not pass Variable ID or label)	IS	O	[0..1]	
DEM152	Race Category	Field containing one or more codes that broadly refer to the patient's race(s).	Code	O	Y	Native Hawaiian or Other Pacific Islander American Indian or Alaska Native Asian White Black or African American Other Race	Race Category		PID-10 Race (does not pass Variable ID or label)	CE	O	[0..*]	

Subject/Demographic Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
DEM153	Detailed Race	A patient record may have zero, one, or multiple detailed race categories assigned.	Code	O	Y		Detailed Race		Observation/OBX Segment with this UID and label under the Patient Subject section header in OBR-4. To keep the race category in context with detailed races, pass the race category in the first instance of this field and the detailed race codes as repeats. If more than one race category was passed in PID-10 Race, use a second OBX Detailed Race segment instance to keep that grouping in context.	CWE	O	[0..*]	
DEM155	Ethnic Group Code	Ethnic origin or ethnicity is based on the individual's self-identity of the patient as Hispanic or Latino; choose one value from the list.	Code	O		Hispanic Non-hispanic	Ethnicity Group		PID-22 Ethnic Group (does not pass Variable ID or label)	CE	O	[0..1]	
DEM156	Detailed Ethnicity	If the value specified in Ethnicity is Hispanic or Latino, choose detailed ethnicity value(s) that better define the patient's Latino ethnicity; values may include Cuban, Mexican, etc.; choose one or multiple values from this list. This variable is not passed unless specified for the particular condition.	Code	O	Y		Detailed Ethnicity		Observation/OBX Segment with this UID and label under the Patient Subject section header in OBR-4.	CWE		[0..*]	

Subject/Demographic Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
DEM2003	US Citizen	Is the patient a US citizen?	Boolean	O		True False			Observation/OBX Segment with this UID and label under the Patient Subject section header in OBR-4.	IS	O	[0..1]	Used IS datatype to pass only T or F
DEM2004	Nationality	What is the patients country of origin?	Code	O			Country		Observation/OBX Segment with this UID and label under the Patient Subject section header in OBR-4.	CWE	O	[0..1]	
DEM2005	Date of Entry into US	Date arrived in U.S. from another country.	Date	O					Observation/OBX Segment with this UID and label under the Patient Subject section header in OBR-4.	TS	O	[0..1]	

Attachment 1D

The generic surveillance elements that are not used for TB are shaded.

Generic Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Valid Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
NOT109	Reporting State	State reporting the notification.	Code	R		2 char alpha state codes	State		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
NOT113	Reporting County	County reporting the notification.	Code	R			County		Observation/OBX Segment with this variable ID and label	CWE	O	[0..1]	
INV169	Condition Code	Condition or event that constitutes the reason the notification is being sent.	Coded	R			Nationally Notifiable Infectious Disease (NND)	must be 10220 Tuberculosis	(note that this is a Notification structural element, so it appears twice in this Guide)	CE	O	[0..1]	
INV168	Record ID	System-assigned local ID of the investigation with which the case subject/entity is associated. (NOTE for TB: this is the RVCT ID).	Text	R					OBR-3.1 Filler Order Number (does not pass Variable ID or label)	EI	R	[0..1]	
INV172	Local Case ID	Official local (city/county) identification number for the case	Text	O					Observation/OBX Segment with this UID and label	ST	O	[0..1]	
INV173	State Case ID	Official state identification number for the case; used by the state and the CDC to identify the case in communications.	Text	R					Observation/OBX Segment with this UID and label	ST	O	[0..1]	
INV107	Jurisdiction Code	Identifier for the physical site from which the notification is being submitted.	Code	R		state-assigned jurisdiction codes			Observation/OBX Segment with this variable ID and label	IS	O	[0..1]

Generic Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Valid Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
INV108	Case Program Area Code	The organizational ownership of the investigation. Program areas (e.g., Immunization, STD) are defined at the state level by the conditions for which they provide primary prevention and control.	Code	O		state-assigned			Observation/OBX Segment with this variable ID and label	IS	O	[0..1]	
INV109	Case Investigation Status Code	Status of the investigation. For example, <i>open</i> or <i>closed</i> .	Code	O		Open Closed			Observation/OBX Segment with this variable ID and label	CWE	O	[0..1]	
INV2006	Case Close Date	Date the case investigation status was marked as Closed.	Date	O				If the user enters the Date Closed for a case then the date must be >= Date Opened	Observation/OBX Segment with this variable ID and label	TS	O	[0..1]	
INV110	Investigation Date Assigned	Date the investigator was assigned to this investigation.	Date	O					Observation/OBX Segment with this variable ID and label	TS	O	[0..1]	
INV111	Date of Report	Date the event or illness was first reported by the reporting source.	Date	R				Validate that the Report date is more than 12 months after previous TB year; Validate that the Report date is equal to or after Patient Date of Birth; Validate that the Report date is equal to or after Date Entered US; Validate that the Report Date must be equal to or before Count date;	Observation/OBX Segment with this UID and label	TS	O	[0..1]

Generic Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Valid Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
INV178	Pregnancy status	Indicates whether the patient was pregnant at the time of the event.	Code			YNU	Yes No Unknown (YNU)		Observation/OBX Segment with this variable ID and label	CWE	O	[0..1]	
INV179	PID	Indicates whether or not the patient has pelvic inflammatory disease (PID).	Code				Only valid for female patients.	Yes No Unknown (YNU)	Observation/OBX Segment with this variable ID and label	CWE	O	[0..1]	
INV2001	Age at case investigation	Patient age at time of case investigation	Numeric	O				age units required	Observation/OBX Segment with this variable ID and label	SN	O	[0..1]	
INV2002	Age units at case investigation	Patient age units at time of case investigation	Code	O		Days Months Weeks Years	Age Unit		uses the INV2001 observation - maps to OBX-6-Units (does not use INV2002 ID or label)	CWE	O	[0..1]	

TB Case Notification variables.

Program-Specific Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB098	Investigation Submitted By	Name of the person who should be contacted if there are questions regarding the data in the report (typically the person submitting the report).	Text	O					Observation/OBX Segment with this UID and label	ST	O	[0..1]	
TB203	RVCT Status	Indicate the current status of the RVCT (such as open, rejected, or closed); possible values: Approved - indicates the RVCT was reviewed by a reviewer and approved; the record appears as an alert in the worklist of a supervisor to be forwarded to the CDC and/or closed; Closed - indicates the RVCT is complete and no longer active; Deleted - deletes the record; users with the delete privilege granted by security template make this status setting to delete the RVCT record; Notified - indicates that the RVCT record was submitted to the CDC; supervisor users with the appropriate security privilege make this setting, which causes the record to be transmitted to the CDC; Opened - initial state of an RVCT record; the RVCT has been created, but not yet completed; Ready for Review - indicates the RVCT is ready for review by a reviewer; changing status to this value causes the record to appear as an alert in the worklist of a reviewer; Rejected - indicates the RVCT was reviewed by a reviewer and found to be incomplete or incorrect; the record appears as an alert in the worklist of the data entry user who owns the RVCT; Suspended - indicates that the	Code	R		Approved Notified Closed Deleted Opened Ready for Review	Case Investigation Status	IF the user changes the status of the RVCT to 'Approved' THEN enable the entry of the 'Do you want to count this patient at the CDC as a verified case of TB?' question value.; IF the user changes the status of the RVCT to 'Approved' THEN enable the entry of the Approval Comments.; IF the user changes the status of the RVCT to 'Rejected' THEN enable the entry of the Rejection Comments; IF the user changes the status of the RVCT to 'Deleted' THEN enable the entry of the Rejection Comments; IF the status of an RVCT is 'Closed' THEN the status cannot be changed to 'Deleted.'; IF the RVCT has a status = 'Closed' or 'Deleted' THEN the status of the RVCT cannot be changed to 'Suspend.'	Observation/OBX Segment with this UID and label	CWE	O	[0..1]	

Program-Specific Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB080	Reporting Address City	City name associated with the address, zip code, and state values.	Text	O			City		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB099	Inside City Limits	Indicate whether or not the address is within city limits; choose Unknown if it is not known for sure whether it is.	Code	O		Yes No Unknown	Yes No Unknown (YNU)	Yes No Unknown (YNU)	Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB081	Reporting Address County	Reporting address county.	Code	O		county FIPS codes	County		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB082	Reporting Address Zip Code	Reporting address Zip Code.	Text	O					Observation/OBX Segment with this UID and label	ST	O	[0..1]	
TB100	Date Counted	If a value of Yes is specified for Do you want to count this patient at the CDC as a verified case of TB? , then enter the month and year for which the case is to be counted.	Date	R				Validate that the Count date is equal to or after Patient Date of Birth; Validate that the Count date is equal to or after Date Entered US; Validate that the Count date is equal to or after Report date; Validate that the Count date is more than 12 months after previous TB year;	Observation/OBX Segment with this UID and label	TS	O	[0..1]	
TB199	Legacy Client ID	Legacy Client ID. This field may be used to pass a patient identifier from a legacy system being converted to the new TB format.	Text	O					Observation/OBX Segment with this UID and label	ST	O	[0..1]	
TB200	Legacy RVCT ID	Legacy RVCT ID. This field may be used to pass a TB Case identifier from a legacy system being converted to the new TB format.	Text	O					Observation/OBX Segment	ST	O	[0..0]	

Program-Specific Surveillance Variables								Mapping Methodology					
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB202	Estimated US Entry Date Indicator	Date the patient entered the US if the patient was not US-born or not born overseas to US parents (e.g., born on a military base); outlying US areas (e.g., Puerto Rico, Guam, Virgin Islands) are not considered part of the United States and they should be listed as separate countries.	Boolean	O					Observation/OBX Segment with this UID and label	IS	O	[0..1]	
TB101	Status at Diagnosis of TB	Status of the patient at the time tuberculosis was diagnosed (alive, dead, or unknown).	Code	O		Alive Dead Unknown	General Condition Status		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB102	Previous Diagnosis of TB	Indicates whether the patient had a previous diagnosis of tuberculosis; choose Yes if the patient had a verified case of the disease in the past, had been discharged (completed therapy), or was lost to supervision for more than 12 consecutive months, and has the disease again.	Code	O		Yes No Unknown	Yes No Unknown (YNU)		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB103	Year of Previous Diagnosis	If a value of Yes was specified for Previous Diagnosis of TB , indicate the year in which the previous episode was diagnosed (use the format YYYY); if there were multiple previous episodes, then this is the year for the last such episode.	Date	O				Validate that the Patient Date of Birth is equal to or before Previous TB diagnosis year	Observation/OBX Segment with this UID and label	TS	O	[0..1]	
TB104	More than One Previous Episode	More than one previous episode.	Boolean	O					Observation/OBX Segment with this UID and label	IS	O	[0..1]

TB187	Ethambutol final susceptibility	If follow-up susceptibility testing was done, results of the testing for Ethambutol : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB188	Streptomycin final susceptibility	If follow-up susceptibility testing was done, results of the testing for Streptomycin : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	

Program-Specific Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB189	Ethionamide final susceptibility	If follow-up susceptibility testing was done, results of the testing for Ethionamide : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB190	Kanamycin final susceptibility	If follow-up susceptibility testing was done, results of the testing for Kanamycin : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	

Program-Specific Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB191	Cycloserine final susceptibility	If follow-up susceptibility testing was done, results of the testing for Cycloserine : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB192	Capreomycin final susceptibility	If follow-up susceptibility testing was done, results of the testing for Capreomycin : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	

Program-Specific Surveillance Variables								Mapping Methodology					
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB193	Para-Amino Salicylic Acid final susceptibility	If follow-up susceptibility testing was done, results of the testing for Para-Amino Salicylic Acid: Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB194	Amikacin final susceptibility	If follow-up susceptibility testing was done, results of the testing for Amikacin: Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	

Program-Specific Surveillance Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB195	Rifabutin final susceptibility	If follow-up susceptibility testing was done, results of the testing for Rifabutin : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB196	Ciprofloxacin final susceptibility	If follow-up susceptibility testing was done, results of the testing for Ciprofloxacin : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	

Program-Specific Surveillance Variables								Mapping Methodology					
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
TB197	Ofloxacin final susceptibility	If follow-up susceptibility testing was done, results of the testing for Ofloxacin : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	
TB198	Other final susceptibility	If follow-up susceptibility testing was done, results of the testing for Other Drugs : Resistant if there was any degree of resistance (even partial or resistance at a low concentration of the drug; Susceptible if completely susceptible; Not Done if susceptibility testing was not performed for the drug; Unknown if it is not known whether drug susceptibility testing was performed for the drug.	Code	O		Resistant Susceptible	Susceptibility Result		Observation/OBX Segment with this UID and label	CWE	O	[0..1]	

These variables are not negotiable. Default values are provided for HL7 structural elements that are required but not part of the surveillance data requested.

Notification Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
NOT108	Notification ID	The unique identifier for the notification record.	String	R					MSH-10-Message Control ID. No UID or label is passed in the message.	ST	R	[1..1]	HL7 recommended size increased to 50
DEM197	Local patient ID	The local ID of the patient/entity.	String	R					PID-3.1 Patient Identifier List – ID Number PID-3.4 Assigning Authority format <localID&OID&ISO> Does not pass Variable ID or label.	CX	R	[1..1]	Only the sending system's internally assigned patient id used for these de-identified messages
DEM100	Patient name type	Name is not requested by the program, but the Patient Name field is required to be populated for the HL7 message to be valid. Have adopted the HL7 convention for processing a field where the name has been removed for de-identification purposes.	Coded	R		Pseudonymized name	Name Type (HL7)		PID-5.7 Patient Name Type - second instance (does not pass Variable ID or label). HL7 reserves the first instance of the name for Legal Name.	XPN	R	[1..2]	Literal value: ~^M^S
INV168	Local record ID	Sending system-assigned local ID of the case investigation with which the subject is associated.(This is the RVCT ID for TB)	Text	R					OBR-3-Filler Order Number where OBR-3.1 is the internally assigned case/investigation ID, OBR-3.3 is the OID for sending application as assigning authority, and OBR-3.4 is the literal value 'ISO'. The UID and label are not passed in the message.	EI	R	[1..1]	<same value in each OBR instance>

Notification Variables									Mapping Methodology				
PHIN Variable ID	Label/Short Name	Description	Data Type	CDC Req/Opt	May Repeat	Coded Concepts	Value Set Name	Data Validation	Message Context	HL7 Data Type	HL7 Usage	HL7 Cardinality	Implementation Notes
NOT099	Subject Type	Type of subject for the notification.	Coded	R			Notification Section Header		OBR[1]: Maps to the HL7 attribute OBR-4-Universal Service ID. No UID or label is passed in the message.	CE	R	[1..1]	Literal Value: 'PERSBJ^Person Subject^2.16.840.1.114222.4.5.274'
NOT101	Notification Type	Type of notification. Main notification types are "Individual Case", "Environmental", "Summary", and "Laboratory Report".	Coded	R			Notification Section Header		OBR[2]: Maps to the HL7 attribute OBR-4-Universal Service ID. No UID or label is passed in the message.	CE	R	[1..1]	Literal Value: 'NOTF^Case Notification^2.16.840.1.114222.4.5.274'
NOT103	Date First Submitted	Date the notification was first sent to CDC. This value does not change after the original notification.	Date/time	R					Maps to the HL7 attribute OBR-7-Observation Date/time. No UID or label is passed in the message.	TS	R	[1..1]	<same value in each OBR instance>
NOT106	Date of Report	Date/time this version of the notification was sent. It will be the same value as NOT103 for the original notification. For updates, this is the update/send date/time.	Date/time	R					Maps to the HL7 attribute OBR-22-Result Report/Status Chg Date/time. No UID or label is passed in the message.	TS	R	[1..1]	<same value in each OBR instance>
INV169	Condition Code	Condition or event that constitutes the reason the notification is being sent.	Coded	R			Nationally Notifiable Infectious Disease (NNID) reportable to the Nationally Notifiable Disease Surveillance System (NNDSS)		Maps to HL7 attribute OBR-31-Reason for Study. The UID and label are not passed in the message.	CE	R	[1..1]	Default value in each OBR instance: '10220^Tuberculosis^2.16.840.1.1142224.5.78'
