DESIGN DOCUMENT

REACH US Management Information System Design Document

Public reporting burden of this collection of information is estimated to average 90 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, GA 30333; ATTN: PRA (0920-XXXX)

The Centers for Disease Control and Prevention began working with Northrop Grumman to customize an internet-based application to facilitate their efforts with Racial and Ethnic Approaches to Community Health across the U.S. (REACH US) grantees (the users). This design document guides the development of the customized REACH Management Information System (REACH MIS).

This design document begins by articulating the goals of the web-based application, discussing the anticipated user experience, and outlining the site contents.

1. Goals

- The purpose of the REACH MIS is to provide an Internet-based data warehousing application that will enable REACH US grantees to document and organize their activities related to their organization and community efforts.

The primary goals of REACH MIS include the following:

- Provide data entry, storage, management, retrieval, and reporting and interactive graphing functions of qualitative and quantitative data.
- Document and systematize activities related to organizational and community efforts.
- Capture qualitative and quantitative information and data about a coalition's actions and interventions, targeted indicators of change, and indicator data tracking.
- Track indicator data related to change among influential individuals or groups.
- Monitor public health indicator outcomes related to each coalition's identified health priority area.
- Facilitate internal and cross-coalition learning, including information sharing.
- Produce reports about grantee activities following CDC prescribed formats.
- Allow grantee to produce reports following custom formats for their own purposes.

2. User Experience

2.1 Audience and Users

Three primary audience segments will use and benefit from the REACH MIS.

CDC Project Officer and Program Consultants. The interests of this audience segment include monitoring the grant-related activities of the users; evaluating the extent of system use; evaluating the efficacy of providing a web-based data warehousing tool for effective capacity building, targeted actions, and community and systems changes and change among change agents; widespread change in risk/protective behavior; and analyzing aggregate data to assess and monitor grantee activity effectiveness for reducing health disparities.

Grantee Coalitions. This broad audience segment contains several likely types of end users, including project directors, evaluators, principal investigators, project staff, and

interested members of the grantee communities. Each of the first three types of users in this segment can be further differentiated as those who are likely to frequently use the system for data entry, activity monitoring, and/or reporting versus those who are most likely interested in occasional browsing through the system.

Others. There are potentially other audience segments, including other federal and State grant making administrators and officials who may look to CDC for insight regarding the use of web-based tools for grantee monitoring, reporting, training, and technical assistance. There may be other community members who are interested in CDC activities or whose interest stems from concern regarding health disparities. Users from these segments typically will require an experience similar to interested community members. That is, read-only access to the system will be necessary for certain public areas and editing access will not be available usually.

2.2 Functional Requirements

The site provides the following functional requirements:

- Allow users to enter and retrieve narrative (i.e., qualitative) data related to activity processes.
- Allow users to enter and retrieve statistical (i.e., quantitative) data related to activity process.
- Allow users to interrelate qualitative and quantitative data related to a single activity.
- Allow users to relate qualitative and quantitative data across multiple activities.
- Display data in textual, tabular, and graphic formats.
- Incorporate quality control checks and validation processes at the time of data entry.
- Incorporate quality control checks and validation processes for contractor and client review and follow-up.
- Various levels of security allowing users control of which users to provide read-only, read and write, or no access (public or private).
- File upload and storage capability for word processing, graphic, and spreadsheet files, but excluding executable program files, to a file library shared within grantee organization.
- Ability to attach previously uploaded files from the grantee library to various places within the system.

* Related High Priority Area:

- Cancer
- Diabetes
- Asthma
- Tuberculosis & Hepatitis B
- Infant Mortality

* Related Healthy People 2010:

Clinical Preventive Care

- 1-1 Increase the proportion of persons with health insurance
- 1-2 (Developmental) Increase the proportion of insured persons with coverage for clinical preventive services.
- 1-3(a-g) Increase the proportion of persons appropriately counseled about health behaviors.

Primary Care

- 1-4 (a-c) Increase the proportion of persons who have a specific source of ongoing care.
- 1-5 Increase the proportion of persons with a usual primary care provider
- 1-6 Reduce the proportion of families that experience difficulties or delays in obtaining health care or do not receive needed care for one or more family members
- 1-7 (Developmental) Increase the proportion of schools of medicine, schools of nursing, and other health professional training schools whose basic curriculum for health care providers includes the core competencies in health promotion and disease prevention
- 1-8 (a-t) In the health professions, allied and associated health profession fields, and the nursing field, increase the proportion of all degrees awarded to members of underrepresented racial and ethnic groups.
- 1-9 (a-c) Reduce hospitalization rates for three ambulatory care-sensitive conditions—pediatric asthma, uncontrolled diabetes, and immunization-preventable pneumonia and influenza.
- 1-10 (Developmental) Reduce the proportion of persons who delay or have difficulty in getting emergency medical care.

Physical Activity

- 22-1 Reduce the proportion of adults who engage in no leisure-time physical activity.
- Increase the proportion of adults who engage regularly, preferably daily, in moderate physical activity for at least 30 minutes per day.
- Increase the proportion of adults who engage in vigorous physical activity that promotes the development and maintenance of cardiorespiratory fitness 3 or more days per week for 20 or more minutes per occasion.
- Increase the proportion of adults who perform physical activities that enhance and maintain muscular strength and endurance.
- Increase the proportion of adults who perform physical activities that enhance and maintain flexibility.
- Increase the proportion of adolescents who engage in moderate physical activity for at least 30 minutes on 5 or more of the previous 7 days.
- Increase the proportion of adolescents who engage in vigorous physical activity that promotes cardiorespiratory fitness 3 or more days per week for 20 or more minutes per occasion.
- Increase the proportion of the Nation's public and private schools that require daily physical education for all students.
- Increase the proportion of adolescents who participate in daily school physical education.
- Increase the proportion of adolescents who spend at least 50 percent of school physical education class time being physically active.
- Increase the proportion of adolescents who view television 2 or fewer hours on a school day.
- (Developmental) Increase the proportion of the Nation's public and private schools that provide access to their physical activity spaces and facilities for all persons outside of normal school hours (that is, before and after the school day, on weekends, and during summer and other vacations).
- Increase the proportion of worksites offering employer-sponsored physical activity and fitness programs.
- Increase the proportion of trips made by walking.
- Increase the proportion of trips made by bicycling.

Community Action Plan: Outcome Objectives (Continued)

Tobacco Use

- 27-1a Reduce cigarette smoking by adults
- 27-2 Reduce tobacco use by adolescents (in grades 9-12)
- 27-2b Reduce use of cigarettes (past month)
- 27-2c Reduce use of spit tobacco (past month)
- 27-2d Reduce use of cigars (past month)
- 27-3 (Developmental) Reduce the initiation of tobacco use among children and adolescents.
- 27-4 Increase the average age of first use of tobacco products by adolescents and young adults.
- 27-5 Increase smoking cessation attempts by adult smokers
- 27-6 Increase smoking cessation during pregnancy
- 27-7 Increase tobacco use cessation during attempts by adolescents.
- 27-8 Increase insurance coverage of evidence-based treatment for nicotine dependency
- 27-9 Reduce the proportion of children who are regularly exposed to tobacco smoke at home.
- 27-10 Reduce the proportion of nonsmokers exposed to environmental tobacco smoke.
- 27-11 Increase smoke-free and tobacco-free environments in schools, including all school facilities, property, vehicles, and school events.
- 27-12 Increase the proportion of worksites with formal smoking policies that prohibit smoking or limit it to separately ventilated areas.
- 27-13 Establish laws on smoke-free indoor air that prohibits smoking or limit it to separately ventilated areas in public places and worksites.
- 27-14 Reduce the illegal sales rate to minors through enforcement of laws prohibiting the sale of tobacco products to minors.
- 27-15(Developmental) Eliminate tobacco advertising and promotions that influence adolescents and young adults
- 27-18 (Developmental) Increase the number of Tribes, Territories, and States and the District of Columbia with comprehensive, evidence-based tobacco control program.
- 27-21 Increase the average Federal and State tax on tobacco products

Cancer

- 3-1 Reduce the overall cancer rate
- 3-3 Reduce the breast cancer death rate.
- 3-4 Reduce the death rate from cancer of the uterine cervix.
- 3-1l Increase in Pap testing
- 3-13 Increase the proportion of women aged 40 years and older who have received a mammogram within the preceding 2 years.
- 3-14 Increase the number of States that have a statewide population-based cancer registry that captures case information on at least 95 percent of the expected number of reportable cancers.
- 3-15 Increase the proportion of cancer survivors who are living 5 years or longer after diagnosis
