Survey Privacy

The Federal Government has a continuing commitment to monitor its awards to identify and address any inequities based on gender, race, ethnicity, or disability of the principal investigators, co-principal investigators, trainees, or other participants. Submission of the requested information is not mandatory. If you do not wish to submit the information, please mark the checkboxes provided for this purpose on the Web pages that follow.

Information from this data collection system will be retained by the National Science Foundation (NSF), a Federal agency, and will be an integral part of its Privacy Act System of Records in accordance with the Privacy Act of 1974 and maintained in the Education and Training System of Records 63 Fed. Reg. 264, 272 (January 5, 1998). These are confidential files accessible only to appropriate NSF officials, their staffs, and their contractors responsible for monitoring, assessing, and evaluating NSF programs. Only data in highly aggregated form, or data explicitly requested as "for general use," will be made available to anyone outside of NSF for research purposes. Data submitted will be used in accordance with criteria established by NSF for monitoring research and education grants, and in response to Public Law 99-383 and 42 USC 1885c.

Public Burden

Submission of the requested information is voluntary. Failure to provide full and complete information, however, may reduce the possibility for continuing support through the award/project subject to this survey. Pursuant to 5 CFR 1320.5(b), an agency may not conduct or sponsor, and a person is not required to respond to an information collection unless it displays a valid OMB control number. The OMB control number for this collection is 3145-0136. The public reporting burden for the collection of information is estimated to average 73 hours per award, including the time for reviewing instructions. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Suzanne Plimpton, Reports Clearance Officer for OMB Collection 3145-0136 (CREST Program), Facilities and Operations Branch, Division of Administrative Services, National Science Foundation, 4201 Wilson Blvd., Suite 295, Arlington, VA 22230.

Academic Year 2005 (July 1, 2004-June 30, 2005)

Test Center Number 1

Welcome to CREST

The Centers of Research Excellence in Science and Technology (CREST) program is an initiative managed by the National Science Foundation (NSF) Division of Human Resource Development (HRD) within the Directorate for Education and Human Resources (EHR).

CREST supports improvement of the research and research training capabilities at the most productive minority-serving institutions by promoting the production of new knowledge, enhancing the national research competitiveness of individual faculty, building the intellectual and physical research and education infrastructure through partnerships with world-class research organizations, supporting innovation in the integration of research and education, and fostering participation in science, technology, engineering, and mathematics (STEM) disciplines by a diverse student population. CREST projects also enhance the effectiveness of related science and engineering activities within the project's area of research focus.

The major goals of the CREST program are to:

- Develop outstanding research centers that will integrate education with research to produce new knowledge and increase the number of underrepresented minorities with Ph.D.'s in STEM
- Make substantial resources available to upgrade the research and education capabilities of the most productive minority institutions
- Enable faculty at these institutions to cooperate with other science and engineering centers of excellence to increase the effectiveness of related science and engineering activities
- Build bridges for minority student career development through alliances with business, government laboratories, and other universities

Final Submission

Errors:

- Undergraduate and graduate enrollment can't both be zero. Please update those numbers on the Center Information screen.
- Your participant data are not complete. You must review and complete all participant data before you can submit them as final. **Note:** Only PIs or Co-PIs can final submit.

The table below shows all participants with a status of incomplete in the current data collection cycle. Please update and complete the required information either by clicking on a person's name below and editing the person's data, or navigating to the [participants](#) screen to update any incomplete records.
