Column 1

Column 1 is preprinted by the Census Bureau to list the sequential number for each added address record.

Column 2

Column 2 is used to record the census geographic code of the address or addresses you are adding including:

- 2a – State Code Number
- 2b – County Code Number
- 2c – Census Tract Number
- 2d – Census Block Number

It is **critical to provide the correct census geographic codes** when adding addresses including the state code number, county code number, census tract number, and the census block number.

You **must** provide geographic codes. Note that the state and county codes are entered in separate columns on the Address List Add Page but are combined on your Address List.

Entries with Similar Information

When adding more than two units and when the information in the columns other than the house number are the same, you can arrow down in columns 2a, 2b, 2c, 2d, 4b, 4c, and 4e and reenter the information for the last address.

The first example is for a new street, Spring Street, which has 10 new housing units:

1. Enter heading information.
2. Enter the **census geographic codes including the state code, county code, census tract number, and census block number**, the street or road name, and the city-style mailing ZIP Code in the first and last rows
3. Enter each individual house number in column 4a.
