

Terms of Clearance: VALIDATION PILOT FOR THE AHRQ PATIENT SAFETY INDICATORS PHASE II

This generic IC is approved consistent with AHRQ memo of 11/10/08. AHRQ agrees that results of this study are not intended for a report to Congress and that the tools themselves are not ready for public release. Rather, AHRQ considers the results from this study to be formative findings that will be used to guide a fuller study for which OMB clearance will be sought in the future
