

***There is no instrument for this IC. The respondent and hour burden below is calculated for two year. In this IC I calculated for one year.***

***Piloting of Instruments.*** In advance of the start of the study, we will ask a group of 6 teachers to review the newly developed instruments to insure the administration protocols are clear and that our communication through email and on-line data collection technology is functioning properly. Similarly, we will ask a group of 6 students to review the instruments to insure the administration protocols are clear. Feedback received from the teachers/students will be incorporated into revised administration protocols and help to modify some items (so the item descriptions will be clear for respondents). Table 8 lists the estimated burden for doing piloting of instruments.

**Table 8. Estimated Burden for Piloting of Instruments**

Task	Type of Respondent	Number	Time Estimate	Total Hours	Hourly Rate	Estimated Cost of Burden
Piloting of Teacher Instruments	Teachers	6	0.33	1.98	\$30	\$59.4
Piloting of Student Instruments	Students	6	0.33	1.98	\$10	\$19.8
TOTAL	-	12	-	3.96	-	\$79.2
