

Justification For Adding A New Question To The XBRL Voluntary Program Questionnaire

The Commission needs the additional question for the purpose of obtaining additional information that would enable the Commission to learn about the voluntary program from the participant perspective. The Commission plans to use the additional information to help it assess the feasibility and desirability of using tagged data on a more widespread and, possibly, mandated, basis in the future. Also, the additional information may also be used by the Commission or its staff in connection with public analyses of the responses.
