Changes to Form I-693 Form

- Added Part 2, item 6.
- The following vaccines removed from the list of required vaccinations: rotavirus, meningococcal, hepatitis A, human papillomavirus. These vaccines have been removed because they are not currently included in the list of required vaccinations found in CDC’s Technical Instructions for Civil Surgeons and are not listed as required vaccines in HHS regulations. Further, they have never been vaccines that were required for adjustment of status, so removing them from the form does not constitute any change in current policy.
