

**SUPPORTING STATEMENT  
FOR  
Additional Listing Information for Medical Device Registration and Listing  
21 CFR PART 807.31  
OMB No. 0910-0387**

**A. JUSTIFICATION**

The Food and Drug Administration (FDA) is requesting an extension of approval of the information collection requirements in 21 CFR 807.31 (Attachment 1). The Food and Drug Administration Amendments Act of 2007 (FDAAA), enacted September 27, 2007 require that device establishment registrations and listings under section 21 U.S.C. 360(p) (including the submission of updated information) be submitted to the Secretary by electronic means, unless the Secretary grants a request for waiver of the requirement because the use of electronic means is not reasonable for the person requesting the waiver. The 2007 Amendments provide for an October 1, 2007 effective date and FDA expects approximately 30,000 establishments to begin registering at that time. FDA intends to seek a separate approval for the electronic collection of information required by the provisions of FDAAA related to device registration and listing.

**1. Circumstances Making the Collection of Information Necessary**

Section 510 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (Attachment 2) requires that domestic establishments engaged in the manufacture, preparation, propagation, compounding, assembly, or processing of medical devices intended for human use and commercial distribution register their establishments and list the devices they manufacture with the Food and Drug Administration (FDA). Registration by electronic means replaces FDA Forms 2891 and 2891a “Registration of Device Establishment” and FDA Form 2892 “Medical Device Listing.” To reflect these changes, FDA has revised the scope of the information collection to address only the reporting and recordkeeping burdens required by non-electronic means. The reporting and recordkeeping required by non-electronic means, which are described below, are set forth in 21 CFR § 807.31 Additional listing information. FDA is also revising the title of this information collection to reflect the revised scope.

The regulations for registration and listing are in 21 CFR Part 807.31.

### **21 CFR 807.31(e) - REPORTING**

States that each owner or operator must be prepared to submit to FDA, upon specific request, copies of all labeling and advertising, statements of basis that the device is not a restricted device or a drug, and the name of distributors for whom a device has been manufactured under a label other than its own.

### **21 CFR 807.31(a-d) - RECORDKEEPING**

Requires each owner or operator to maintain an historical file containing the labeling and advertisements in use on the date of initial listing and in use after October 10, 1978, but before the date of initial listing. In addition, they shall maintain in the historical file any labeling or advertisements in which materials change has been made anytime after the initial listing. These files must be maintained for a period of 3 years after the date of the last shipment of a discontinued device by an owner or operator and made available when requested by FDA.

## **2. Purpose and Use of the Information**

This information collection is necessary for the FDA to assure that devices are not adulterated or misbranded and are otherwise safe and effective for human use. The information will aid FDA in protecting the public from potentially hazardous devices, as well as devices with confirmed hazards. FDA analyzes the information as it is submitted, checking for problems in individual reports, and analyzing accumulated data to determine trends. Results of these analyses are utilized to determine if an FDA action is necessary, and if so, what action is appropriate.

FDA is required to inspect manufacturers of certain medical devices to ensure that the devices are manufactured in accordance with good manufacturing practices. This information is used to identify geographic distribution in order to effectively allocate FDA field resources for these inspections and to identify the class of the device that determines the inspection frequency. In addition, when complications occur with a particular device or component, manufacturers of similar or related devices can easily be identified. If the firms did not submit this information, they would not be inspected regularly and defective devices could remain on the market, presenting potential life-threatening situations to the public.

**3. Use of Information Technology and Burden Reduction**

There are no technical or legal obstacles to the collection of this information.

The registration and listing process is now a paperless process, both for initial and updated submissions, which also permits real-time updates. FDA has eliminated all paper forms (FDA forms 2891, 2891a, and 2892) and now uses the FDA Unified Registration and Listing System (FURLS). Although some firms may not subscribe to an Internet service provider, FDA believes ready access is available through multiple channels: local libraries, FDA district offices, and commercial services such as Kinko's. Other federal agencies, notably the Securities and Exchange Commission, the Federal Communications Commission, and the Internal Revenue Service have already instituted electronic filing requirements that specifically exclude parallel paper submissions. The 2007 legislation, FDAAA does permit FDA to waive the requirement to electronically register and list under certain circumstances; see Section 510 of the FD& C Act, as amended by Section 224 of the FDAAA.

**4. Efforts to Identify Duplication and Use of Similar Information**

The FDA is the only Federal agency responsible for the collection of such information, and the only agency charged with the responsibility of regulating medical devices and establishments. Therefore, no duplication of data exists.

**5. Impact on Small Business or Other Small Entities**

The requirements set forth in this regulation do not fall disproportionately upon small businesses. The threshold assessment conducted for this regulation shows that no more than 22 percent of the anticipated annual impact of these regulations should be attributed to small business establishments. The FDA continues to pursue ways and means of reducing the reporting burden for both small and large medical device manufacturers and will continue to employ the latest technology for receipt of reports, consistent with the intent of the regulation and protection of the public health.

FDA aids small business in dealing with the requirements of the regulation by

providing guidance and information through the Division of Small Manufacturers, International and Consumer Assistance (DSMICA), and through the Device Registration and Listing Branch within the Center for Devices and Radiological Health. DSMICA provides workshops and other technical and non-financial assistance to small manufacturers. The workshops make available publications and educational materials, which include medical device establishment and listing requirements. The Division also maintains a toll-free “800” telephone number which firms may use to obtain regulatory compliance information.

These efforts help to assure that the burden on small manufacturers is minimized.

**6. Consequences of Collecting the Information Less Frequently**

The Federal Food, Drug, and Cosmetic Act requires that a firm: (1) initially register once; (2) update the registration annually; (3) initially list a device when it is placed into commercial distribution; and (4) update the listing whenever there is a change or discontinued device. A less frequent collection of information would not be responsive to the requirements of the FD&C Act or provide current information relative to device establishments and the listing and/or discontinuance of various medical device products they market.

**7. Special Circumstances Relating to the Guidelines of 5 CFR 1320.5.**

This information collection is consistent with the guidelines prescribed in 5 CFR 1320.5.

**8. Comments in Response to the Federal Register Notice and Efforts to Consult Outside Agency**

In accordance with 5 CFR 1320.8(d), February 5, 2008 (73 FR 6731), a 60-day notice for public comment (Attachment 3) was published in the Federal Register. One comment was received, however it did not pertain to the information collection.

FDA continually seeks input from industry representatives as well as trade associations concerning registration and listing policies and procedures. The Registration and Listing website is updated routinely and FDA staff give

presentations about pertinent topics at workshops with industry. FDA maintains an email account where questions, comments and concerns can be submitted. Replies are usually sent out within 2 working days of receipt. Comments can also be submitted to FDA via its web site.

**9. Explanation of Any Payment or Gift to Respondents**

No payment or gifts shall be provided to respondents under this regulation.

**10. Assurance of Confidentiality Provided to Respondent**

Confidentiality of information submitted to FDA is governed by the provisions of 21 CFR 807.95. All registration and some listing data collected is available upon request under the Federal Freedom of Information Act, subject to FDA's implementing regulations, 21 CFR Part 20, Public Information. In addition, all information filed by a registrant is available for public inspection as required by 21 CFR 807.37.

**11. Justification for Sensitive Questions.**

This information collection does not include questions pertaining to sexual behavior, attitude, religious beliefs, or any other matters that are commonly considered private or sensitive in nature.

**12. Estimate of Hour Burden Including Annualized Hourly Costs**

The following is the estimated annual burden hours for medical device establishments to report in compliance with the provisions imposed by this regulation.

**Table 1. -- Estimated Annual Reporting Burden**

| 21 CFR Section | Number of Respondents | Annual Frequency of Response | Total Annual Responses | Hours Per Response | Total Hours |
|----------------|-----------------------|------------------------------|------------------------|--------------------|-------------|
| 807.31(e)      | 200                   | 1                            | 200                    | 0.50               | 100         |

There are no capital costs or operating and maintenance costs associated with this collection of information.

**Table 2. – Estimated Annual Recordkeeping Burden**

| 21 CFR Section | Number of Recordkeepers | Annual Frequency per Recordkeeper | Total Annual Records | Hours per Recordkeeper | Total Hour |
|----------------|-------------------------|-----------------------------------|----------------------|------------------------|------------|
| 807.31         | 16,200                  | 4                                 | 64,800               | 0.50                   | 32,400     |

There are no capital costs or operating and maintenance costs associated with this collection of information.

The annual reporting cost to respondents for registering establishments and listing devices is \$5,500. This figured was derived by multiplying the total reporting burden hours from Table 1B by an hourly rate of \$55. This hourly rate is based on a 2,080 annual work hours and at an annual salary rate of \$116,000. This health care professional salary rate includes salary, benefits, overhead, technical staff, support staff, etc. This annual rate was determined by the Agency’s current estimates of staff expenses.

FDA bases the estimates on FY07 data from current systems and on conversations with industry and trade association representatives.Using FY07 data, FDA estimates that recordkeeping (Table 2 above) costs for respondents is \$1,036,800. This figure was determined by multiplying the total number of hours estimated for recordkeeping (32,400) by \$32.00. Historical submissions, trend analysis and estimates for annual cost of living increases at 3% determined the hourly rate.

**13. Estimate of the Other Total Annual Cost Burden to Respondent or Recordkeepers**

There are no additional costs associated with this information collection.

**14. Annualized Cost to the Federal Government**

FDA anticipates that the federal government will incur the following costs:

**Staff Costs**

Total annual cost to the Federal Government = \$996,000

Full time Equivalents = 6

Annual Cost per FTE=\$116,000

Annual Cost = \$696,000

Contract Costs = \$ 300,000 - We currently pay for the temporary secretarial assistance and the services of an 8A contractor to process all registration and listing submissions.

**15. Explanation for Program Changes or Adjustments**

The explanation for adjustments from the previous approval is:

- The number of reporting burden hours has decreased substantially because we anticipate only a small number of respondents will register and list non-electronically. The recordkeeping burden has not changed.

**16. Plans for Tabulation and Publication and Project Time Schedule**

FDA does not intend to publish the results of this information collection.

**17. Reason(s) Display of OMB Expiration Date is Inappropriate**

Currently, CDRH is not requesting an exemption for display of the OMB expiration date.

**18. Exceptions to Certification for Paperwork Reduction Act Submissions**

Currently, CDRH is not requesting an exemption to Certification for the Paperwork Reduction Act Submissions.

**19. Certification for Paperwork Reduction Act Submissions**

No exceptions have been identified.

**B. Collection of Information Employing Statistical Methods**

There are no statistical methods being employed in this collection of information.
