*Department of Health Policy and Management*

**Subject:**      **Amendment to IRB# 00000641**  
**Research Title: “Case Study of Pennsylvania’s Fire Safety Programs”**

We would like to request an amendment for IRB# 00000641 “Case Study of Pennsylvania’s Fire Safety Programs” to include a state-wide survey of Pennsylvania’s fire departments. The survey collects information on the types, number, focus, target population and partners of prevention activities offered by fire departments. This information will provide more comprehensive and generalizable information about the scope of fire prevention in Pennsylvania.

Additionally, we are asking that the survey be exempt from human subjects review. This survey assesses fire department practices and not individual subjects’ own knowledge or behaviors. The survey instrument and methodology proposed in the amendment are also very similar to previously exempt research (IRB# 00000044 “Fire Department Survey”) in which it was determined that the research did not qualify as human subjects based on 45 CFR 46.102.

Please find attached two copies (one tracked and one clean) of the amended research plan for your consideration. If you have any questions about this amendment, please contact the co-Principal Investigators: Andrea Gielen at (410) 955-2397 or Shannon Frattaroli at (410) 955-8022.

Thank you for your consideration.
