Subject: public comment on federal register of 11/16/07 vol 72 #221 p60 day 08 08ac

survey of health disparities between minorities costing american tax dollars while american citizens go uncovered for health care and illegal immigrants get surveyed for health disparities

in the first place many of the unhealthy minorities mentioned here are illegal immigrants and their health problems belong to the countries they illegally left and their eventual sneaking into the united states illegally to freeload on american taxpayers. not one cent more should be spent on any health aspect of illegal immigrants.

in addition these extremely highly paid employees at cdc should be working on solutions for health issues, not sitting behind a desk taking surveys and then doing absolutely nothing to solve the health issues.

the management at this agency is ineffective, negligent and stupid. the taxpayers of this country are payiing high salaries for these employees at cdc and they should be producing answers to health situations, not sitting behind a desk like a bureaucrat taking surveys. this is a ridiculous waste of tax dollars. the project should be scrapped. the people who think up this waste of tax dollars should be fired.

no american tax dollars for illegal immigrant health!
