Hello, I’m _____ with Alan Newman Research, an independent consumer research firm. We are not selling or promoting any product or service. We are conducting a research study on food among preschool and school-age children and their parents on behalf of the Centers for Disease Control and Prevention. (CDC). We would like to ask you a few brief questions now over the phone. We’d like to determine if you are interested in and available to participate in a focus group study in a few weeks. We want to determine if the ages of children in your family fit the ages we need for our project. There are a few qualifiers for our particular study we’d like to ask you about to determine if you and possibly a family member fit the needs of our study. Our questions will only take a couple of minutes. May I start with the first question?
