Public reporting burden for this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0542). Do not return the completed form to this address.

OMB #: 0925-0542 Expiration Date: 4-30-08

FORM B

Brain Power! The NIDA Junior Scientists Program Kindergarten and First Grade Student Attitudes Interview

Note: Children will be interviewed individually and responses recorded by the interviewee.

- Child's grade _____
 Child's gender _____
- 3. [ask] Do you know what I mean when I use the word drug? [if yes, prompt their definition; if no, supply simple definition]
- 4. [ask] Have you ever talked with your parents about drugs? [if yes] What do you remember about what was said?
- 5. [ask] Where have you learned about drugs: parents, friends, school, TV, movies? What did you learn about drugs from these people or places?

[For the following question, prompts may include pictures, smiley faces, or glasses filled with water to illustrate the range from very to not so bad.]

6. [ask] How dangerous do you think it is if people use alcohol? Smoke cigarettes? Use marijuana or any other illegal drugs?

[For the following questions, prompts may include pictures or dolls that portray persons of various ages.]

7. [ask] How old do you think someone is when they start drinking alcohol? When they start trying drugs?

[For the next question, trading cards will be used that picture the food pyramid, forms of exercise, sleeping habits, safety precautions (helmets, sunscreen, etc), and drugs such as nicotine, alcohol, Tylenol, and antibiotics]

8. Children will sort the cards into 2 piles: good/healthy and bad/unhealthy.

[For the following question, again use various smiley faces or glasses for each item.]

9. [ask] How do you feel about science?

a.	Scientists are important people.
b.	Science is boring
c.	I like to look at science books when I go to the library
d.	I wish I didn't have to take science
e.	Science is fun
f.	Thinking about math questions is easier than thinking about science questions
g.	I would like to be a scientist when I
h.	grow up The things we do in science class are too hard for me
i.	Scientists don't have much fun.
j.	Scientists are nerds and geeks

k. Science is useful in everyday life
