**Subject:** Questions 0960-0641

**Importance:** High

Rachel,

Below is our response to both questions.

**QUESTION 1) Our addendum states that the SSA-1366 and SSA-1367 have been made obsolete, Why were these forms obsolete.**

SSA developed forms SSA-1366 and SSA-1367 to simplify the way in which state vocational rehabilitation agencies (SVRAs) and Employment Networks (ENs) are required to submit information on disability beneficiaries receiving the organization's rehabilitation and/or return to work services as part of the Ticket program. These were voluntary forms developed to facilitate data collection mandated by P.L. 106-170.

The SVRAs and ENs rejected the SSA-1366 and SSA 1367 forms. These organizations opted to submit the required information in formats of their choosing, though primarily they are received in a narrative. The collection of this information is authorized by 20 CFR 411.140, 411.325, 411.370 and 411.385 and is cleared under OMB No. 0960-0644, Ticket to Work and Self-Sufficiency Program. SSA decided to obsolete the forms because there was no interest in using them.

**QUESTION 2) The number of tickets, 50, for each respondent appears to be low. Is this correct?**

Response: We have reevaluated the burden information and are revising it based on current data:

Form SSA-1365 is used by approximately 82 respondents who report approximately 307 times each annually for a total of 25,174 annual responses. The estimated average response time is 3 minutes, for a total of 1,259 burden hours. The total burden is reflected as burden hours, and no separate cost burden has been calculated.

Please let me know if you have any questions.
