# SURVEY ON KEY DEMOGRAPHICS AND NEEDS OF BINATIONAL MIGRATORY CHILDREN 

Paperwork Burden Statement: According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is (03587)1810-NEW-v.1). The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Education, Washington, D.C. 20202-4651. If you have comments or concerns regarding the status of your individual submission of this form, write directly to: Manuel Recio, Office of Migrant Education, U.S. Department of Education, Lyndon Baines Johnson Federal Building, Room 3E221, 400 Maryland Avenue, S.W., Washington, D.C. 20202-6135.

For the purposes of the Title I, Part C Migrant Education Program (MEP) and this survey, the following definitions apply:

- Migrant Child $=$ a child who is, or whose parent, spouse, or guardian is, a migratory agricultural worker, including a migratory dairy worker, or a migratory fisher, and who, in the preceding 36 months, has moved from one school district to another, to obtain temporary or seasonal employment in agricultural or fishing work.
- Binational Student = an eligible migrant student who moved between Mexico and the United States with his or her parents or as an emancipated youth at least once within a 36 month time period
- $\quad$ Qualifying Move = A move qualifies if:
(1) it is a move across school district boundaries; and
(2) it involves a change of residence; and
(3) the purpose of the worker's move is to obtain qualifying work in agriculture or fishing;
(4) the purpose of the worker's move was not to relocate on a permanent basis; and
(5) it occurred within the preceding 36 months

In 2006-2007, 45 of 48 states operating MEPs reported serving an estimated 195,562 binational migrant students. This represents approximately $30 \%$ of the total national migrant student population.

This survey is intended to collect additional data on the binational migrant student population in order to help States better understand key demographics and needs of these children and youth. This information will be used by State MEPs to (1) identify the special educational needs of binational migrant students, and (2) help coordinate State efforts to design and implement strategies that will improve education outcomes for binational migrant students. To minimize the collection of data, the survey will focus on one segment of this population - binational migrant students who made a "qualifying move" (as defined in the MEP program statute) from Mexico to the U.S. during the time period of September 1, 2006 to August 31, 2007. Please note that while, under the statute, qualifying moves may be made over a 36 -month period; this survey is sampling only a 12 -month period.

## Table 1: Demographic Data on Binational Children

Instructions: On Tables 1-4, the reporting period is September 1, 2006 to August 31, 2007. Report data on the statewide unduplicated number of binational children who made a qualifying move from Mexico to the U.S. during the time period of September 1, 2006 to August 31, 2007. In each table, include only migrant children who are eligible for services under the MEP. Within each row, count a child only once statewide (unduplicated count). Include children who changed grades during the 2006-2007 reporting period in only the higher age/grade cell. For example, a child who was promoted from grade 5 to grade 6 during the reporting year would be counted only in the 6-8 grade span cell. In all cases, the total is the sum of the cells in a row.

Data for Tables 2, 3 and 4 will come from a subset of students included in Table 1, \#1. This smaller group of students will represent a structured sample of participants from the larger group of Binational students in each state. Survey administrators will receive a training manual and participate in training sessions to receive instructions on identifying the sampling population and administering the survey.

| DEMOGRAPHIC | Age 0PreK | Grade K-5 |  | $\begin{gathered} \text { Grade } \\ 6-8 \end{gathered}$ |  | $\begin{gathered} \text { Grade } \\ 9-12 \\ \hline \end{gathered}$ |  | OSY | Total ${ }^{*}$ |  |
