

Complete this worksheet for available CEM data for CO at each small gas-fired boiler or process heater. You should provide CEM results for the most recent 30 day operating period, as well as the highest CEM datapoint during the most recent calendar year. If you have a summary of CEM data that contains the same information in another spreadsheet format, you can submit the CEM data summary in an alternative format. Please indicate the appropriate facility name and combustor ID at the top of each worksheet. When complete, e-mail this spreadsheet to help@xxx.com.

A. Facility Name: _____

B. Combustor ID: _____

C. Control Device Configuration during 30 day period (select from dropdown): _____

D. Typical Operating Rate during 30 day period (mmBtu/hr): _____

Fuel 1 (select from dropdown) Fuel 1 Input Rate Fuel 1 Input Rate Units Fuel 2 Input Rate Fuel 2 Input Rate Units Insert Additional Fuels as necessary by copy and pasting cells to the right.

E. Typical Fuel Mix During 30 day period: _____

F. CEM Daily Average Emission Data Points From Most Recent 30-day Operating Period

Date (mm/dd/yy)	Emission Numerical Value	Emission Unit	Correction (i.e. 3% O2)
Day 1			
Day 2			
Day 3			
Day 4			
Day 5			
Day 6			
Day 7			
Day 8			
Day 9			
Day 10			
Day 11			
Day 12			
Day 13			
Day 14			
Day 15			
Day 16			
Day 17			
Day 18			
Day 19			
Day 20			
Day 21			
Day 22			
Day 23			
Day 24			
Day 25			
Day 26			
Day 27			
Day 28			
Day 29			
Day 30			

G. Single highest daily average emission data point within the most recent calendar year of data

If the control device configuration, fuel mix, or operating rate for the single highest emission data point differs from what was described for the 30-day period, please update in cells below, otherwise you may leave this section blank:

H. Control Device Configuration at maximum emission data point: _____

I. Operating Rate at maximum emission data point (mmBtu/hr): _____

Fuel 1 (select from dropdown) Fuel 1 Input Rate Fuel 1 Input Rate Units Fuel 2 Input Rate Fuel 2 Input Rate Units Insert Additional Fuels as necessary by copy and pasting cells to the right.

J. Fuel Mix at maximum emission data point: _____
