DEFINITIONS

Prestressed concrete steel wire strand (“PC strand”).--Steel strand, produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete applications (pre-tensioned and/or post-tensioned). The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is covered by statistical reporting numbers 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (“HTS”).

Pre-tensioned applications.--In pre-tensioned applications, uncovered and/or uncoated PC strand is tensioned (pulled tightly and slightly elongated) using a calibrated tensioning apparatus, and concrete is poured around the PC strand. After the concrete has cured, the tension is released and the tensile force of the strand induces a compressive force in the concrete. Pre-tensioned prestressed concrete depends upon the bond between the concrete and the PC strand to hold the concrete in compression.

Post-tensioned applications.--In post-tensioned applications, PC strand is tensioned using a calibrated tensioning apparatus after the concrete has cured. In post-tensioned prestressed concrete, tension is maintained by installing permanent mechanical anchors which remain in place after the tensioning apparatus is removed. Post-tensioned applications may require covered/coated, uncovered/uncoated, or epoxy-coated PC strand.

Covered and/or coated PC strand.--PC strand that is lubricated with grease and encased in a plastic tube or PC strand that is coated with epoxy.

Uncovered and/or uncoated PC strand.--Bare PC strand.

Firm.--An individual proprietorship, partnership, joint venture, association, corporation (including any subsidiary corporation), business trust, cooperative, trustee in bankruptcy, or receiver under decree of any court.

Related firm.--A firm that your firm solely or jointly owned, managed, or otherwise controlled; a firm that solely or jointly owned, managed, or otherwise controlled your firm; and/or a firm that was solely or jointly owned, managed, or otherwise controlled by a firm that also solely or jointly owned, managed, or otherwise controlled your firm.

Establishment.--Each facility of a firm in China involved in the production of PC strand (as defined above), including auxiliary facilities operated in conjunction with (whether or not physically separate from) such facilities.

United States.--For purposes of these investigations, the 50 States, Puerto Rico, the U.S. Virgin Islands, and the District of Columbia.

DEFINITIONS--Continued

Importer--Any person or firm engaged, either directly or through a parent company or subsidiary, in importing PC strand (as defined above) into the United States from a foreign manufacturer or through its selling agent.

Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup; and a typical or representative product mix).

Production--All production in your establishment(s) in China, including production consumed internally within your firm.
