DEFINITIONS

Wire Decking.—is defined as welded–wire rack decking, which is also known as, among other things, “pallet rack decking,” “wire rack decking,” “wire mesh decking,” “bulk storage shelving,” or “welded–wire decking.” Wire decking consists of wire mesh that is reinforced with structural supports and designed to be load bearing. The structural supports include sheet metal support channels, or other structural supports, that reinforce the wire mesh and that are welded or otherwise affixed to the wire mesh, regardless of whether the wire mesh and supports are assembled or unassembled and whether shipped as a kit or packaged separately. Wire decking is produced from carbon or alloy steel wire that has been welded into a mesh pattern. The wire may be galvanized or plated (*e.g.*, chrome, zinc or nickel coated), coated (*e.g.*, with paint, epoxy, or plastic), or uncoated (“raw”). The wire may be drawn or rolled and may have a round, square or other profile. Wire decking is sold in a variety of wire gauges. The wire diameters used in the decking mesh are 0.105 inches or greater for round wire. For wire other than round wire, the distance between any two points on a cross–section of the wire is 0.105 inches or greater. Wire decking reinforced with structural supports is designed generally for industrial and other commercial storage rack systems.

Wire decking is produced to various profiles, including, but not limited to, a flat (“flush”) profile, an upward curved back edge profile (“backstop”) or downward curved edge profile (“waterfalls”), depending on the rack storage system. The wire decking may or may not be anchored to the rack storage system. The scope does not cover the metal rack storage system, comprised of metal uprights and cross beams, on which the wire decking is ultimately installed. Also excluded from the scope is wire mesh shelving that is not reinforced with structural supports and is designed for use without structural supports.

Wire decking may be imported into the United States through several basket categories in the Harmonized Tariff Schedule of the United States. U.S. Customs and Border Protection has issued a ruling (NY F84777) that wire decking is to be classified under HTS 9403.90.8040. Wire decking may also be imported under HTS 7217.10, 7217.20, 7326.20, 7326.90 and 9403.20.0020. HTS numbers are provided for convenience purposes only; the physical description provided above controls the scope coverage.
