GENERAL INFORMATION

Background.--This investigation was instituted in response to a petition filed on June 30, 2009, by Sunbeam Products, Inc. dba Jarden Consumer Solutions, Boca Raton, FL. The U.S. Department of Commerce preliminarily determined that certain woven electric blankets (“WEB”) from the People’s Republic of China are being, or are likely to be, sold in the United States at less than fair value (LTFV), as provided in section 733 of the Tariff Act of 1930, as amended (the Act).. The preliminary weighted-average dumping margins range from 90.32 percent *ad valorem* to 174.85 percent *ad valorem*. See 75 FR 5567, 5574 (Feb. 3, 2010).

DEFINITIONS

Woven Electric Blankets (“WEBs”)--The scope of this investigation covers finished, semi-finished, and unassembled woven electric blankets, including woven electric blankets commonly referred to as throws, of all sizes and fabric types, whether made of man-made fiber, natural fiber or a blend of both. Semi-finished woven electric blankets and throws consist of shells of woven fabric containing wire. Unassembled woven electric blankets and throws consist of a shell of woven fabric and one or more of the following components when packaged together or in a kit: (1) Wire; (2) controller(s). The shell of woven fabric consists of two sheets of fabric joined together forming a “shell.” The shell of woven fabric is manufactured to accommodate either the electric blanket’s wiring or a subassembly containing the electric blanket’s wiring (e.g., wiring mounted on a substrate). A shell of woven fabric that is not packaged together, or in a kit, with either wire, controller(s), or both, is not covered by this investigation even though the shell of woven fabric may be dedicated solely for use as a material in the production of woven electric blankets. The finished, semi-finished and unassembled woven electric blankets and throws subject to this investigation are currently classifiable under subheading 6301.10.00 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, only the written description of the scope is dispositive.

Woven shells--Woven shells consist of two sheets of woven fabric joined together forming a “shell.” The shell of woven fabric is manufactured to accommodate either the electric blanket’s wiring or a subassembly containing the electric blanket’s wiring (e.g., wiring mounted on a substrate).
