ENUMERATOR QUALITY CHECK

All states making field weighings

Weights

If there is a 5 percent or more difference in total unit weight between the Enumerator's and Supervisor's weight, the Supervisor should weigh the unit up to 3 times (2 reweighs) to determine the correct weight for the unit.

1. Enumerator's weight of hills 8, 9, and 10
(Copied from weight tab sheet)
- Supervisor's weight and percent of enumerator's weight (1st time)
- Supervisor's weight and percent of enumerator's weight (2nd time)
- Supervisor's weight and percent of enumerator's weight (3rd time)
