NOVEMBER 2007

XXXXXXXXXXXXXXXXXXXX (Coop Name)

Dear Processor:

The data requested on this form are used to prepare official estimates of sugarbeet acreage, yield, production and sucrose content at county, state and national levels. At the end of the season, state and national average prices are published. Response is voluntary and not required by law. However, cooperation is extremely important in compiling accurate, reliable statistics on sugarbeets. **All individual reports are kept confidential.**

R. Reneé Picanso

Your efforts and cooperation in providing these data are greatly appreciated.

Sincerely,

R. Reneé Picanso
Director

This same form is used three times a year as follows:

DECEMBER - The first use of this form in **December** provides basic data for the sugarbeet estimates in the Annual Crop Production Summary in mid-January. County totals are optional in December. However, if preliminary county totals are available, it is helpful to have the data. The following estimates are published from the December inquiry: **State and U.S.** acreage, yield, and production.

APRIL - This form is used a second time in **April** after much of the processing has been completed. **County** totals are needed on this report to compile official county estimates on acreage, yield, production, and sucrose content. Whether or not preliminary county totals were entered on the December report, final data should be entered in the **April** column. Updated acreage, yield and production statistics for each state are published in the June Crop Production report.

NOVEMBER - This form is used a third time in **November** for your final review and update of any acreage,
