July 20, 2006

Mr. XXXXXXXXX

Dear Mr. XXXXXXXXX:

Your assistance is needed to prepare the August 1 estimate of acres to be harvested and production of sugarbeets for the **2006 crop**. The planted acreage data as submitted to this office in June has been entered below. Please make any necessary changes to the planted data and enter the acres expected to be harvested and the expected yield per acre for each state in which the beets are produced.

Your response is needed by August 3, 2006. To get yield expectations as close to August 1 as possible, you may **FAX your report to 1-800-643-6885.**

| State | June Planted Acres | Revised Planted Acres | Expected Acres For Harvest | Expected Yield Per Acre |
|-----------------|--------------------|-----------------------|----------------------------|-------------------------|
| Colorado | | | | |
| Montana | | | | |
| Nebraska | | | | |
| Wyoming | | | | |

Thanks for your help.

Tom Vesey
Agricultural Statistician
