2007

MA325F — PAINTS (COATINGS) AND ALLIED PRODUCTS

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers manufacturers of paints (coatings) and allied products.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey may complete a separate report form for each location or complete one report for the entire company. If you have questions concerning your report, please call or write to the U.S. Census Bureau for additional forms.

a. Quantity and value of shipments

The figures on quantity and value of shipments should include the physical shipments of all products sold, transferred to other establishments within your company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to your own branches should be assigned the same value as comparable sales to unaffiliated customers, i.e., the value includes an appropriate allocation of company overhead and profit. Products bought and resold without further manufacture should not be included in shipments.

b. Units of measure

Report all quantities of liquid shipments in 1,000 gallons and all values in thousands of dollars. Report quantity of powder coatings shipped in thousands of pounds.

3. Definitions of selected paint and coatings terms

(Source: **Paint/Coatings Dictionary**, Federation of Societies for Coatings Technology, 1978. Some definitions have been modified to meet the specific needs of this report.)

Architectural coatings (items 5112–5193) — Coatings for on-site application to interior or exterior surfaces of residential, commercial, institutional, or industrial buildings. These are protective and decorative finishes applied at ambient temperatures, for ordinary use and exposure. Report industrial new construction and maintenance paints on item codes 5301 or 5305.

Clear finishes and spar varnishes — Transparent protective and/or decorative films, including urethane coatings, natural varnishes and shellac varnishes.

Eggshell finish — Low sheen (semi-matte) surface which exhibits surface reflectance (gloss) similar to that of an eggshell, lying between flat and semigloss.

Enamels — Topcoats with the ability to form a smooth surface; usually associated with a high gloss, but also used with lesser gloss, i.e.; flat enamels.

Exterior coatings (items 5112–5155) — Architectural coatings that are expected to possess reasonable durability when exposed to natural weathering.

Lacquers — Coating composition based on synthetic thermoplastic materials dissolved in organic solvent, which dries primarily by solvent evaporation. Typical lacquers include those based on nitrocellulose and other cellulose derivatives, vinyl resins, acrylic resins, etc.

Solvent — Non-aqueous liquid, usually volatile, used to dissolve or disperse the coating constituents, which evaporates during drying and does not become part of the dried coating.

Stains — Transparent or semitransparent solutions or suspensions of coloring matter in a vehicle, designed to color a surface by penetration without hiding it, or to color a material into which it is incorporated.

Undercoat — A coat of paint applied on new wood, over a primer, or over a previous coat of paint, to improve the seal and to serve as base for the topcoat.

OEM Coatings (item codes 5221–5269) — Coatings formulated specifically for Original Equipment Manufacturers (OEM) to meet conditions of application and product requirements, and applied to such products during the manufacturing process. Report OEM and refinish marine coatings on item code 5315. Report all other refinish paints on item code 5313. See "Industry Code Correlation" for a list of NAICS industry codes for the products that correspond to these coatings.

Electrical insulating coatings (item code 5253) — Coatings (varnishes), often used in combination with materials such as mica, fabric, paper, etc., to provide insulation for electrical equipment. These coatings are formulated to have high resistance to electrical conduction.

CURRENT INDUSTRIAL REPORTS SERIES

MA325F

DEFINITIONS AND SPECIAL INSTRUCTIONS — Continued

Powder coatings (item codes 5254–5268) — 100 percent solids coatings applied as dry powders and subsequently formed into a film through the application of heat or energy.

Primer — First complete coat of a painting system applied to a surface. Designed to provide adequate adhesion to new surfaces and to meet special requirements such as absorption and/or corrosion control.

SPECIAL PURPOSE COATINGS, INCLUDING COATING FOR TRANSPORTATION AFTER MARKET (item codes 5301–5331)

Special purpose coatings may also be stock type or shelf goods, but differ from general architectural coatings by the fact that they are formulated for special applications and/or special environmental conditions such as extreme temperatures, chemicals, fumes, etc.

Industrial new construction and maintenance paints — High performance coatings formulated to withstand extremes of use, such as heavy abrasion, water immersion, chemicals, corrosion, extreme temperatures, and electrical or solvent exposure.

Also includes maintenance coatings used to maintain nonresidential structures; building and nonbuilding requirements in such areas as public utilities, railroads, roads and highways; and other industrial plant coatings; the primary purpose of which is protection. Report residential maintenance coatings on item codes 5112–5193, architectural coatings.

Marine paints, including ship and offshore — Paints and coatings specifically formulated to withstand water immersion and exposure to marine atmosphere. Exclude spar varnish. Includes marine refinish paints.

Refinish paints (item code 5313) — Coatings formulated specifically to meet particular product and application requirements, and sold to the refinishing trade or through retail outlets for aftermarket application. Report marine refinish coatings on item code 5315.

Traffic marking paints (item code 5311) — Paints specially formulated to withstand wear of vehicular traffic and to be highly visible at night; used to mark center lines on roadways, traffic lanes, crosswalks, etc. Includes paints manufactured with reflective beads.

INDUSTRY CODE CORRELATION

The OEM coatings covered in item codes 5221—5267 are formulated specifically for application on certain categories of products during the manufacturing process. The following list matches these products with the appropriate NAICS code, 4-digit codes (ie.; 3361XX) represent industry groups; NAICS 6-digit codes (ie.; 321992) represent industries.

Product code	Product description	Item code	NAICS code	Industry description
3255104111	Automobile, light truck, van, and sport utility vehicle finishes	5221	3361XX 3363XX	Motor Vehicle Manufacturing Motor Vehicle Parts Manufacturing
3255104121	Automobile parts finishes	5224	3363XX	Motor Vehicle Parts Manufacturing
3255104131	Heavy duty truck, bus, and recreational vehicle finishes	5226	321991 336211 336212 336214	Manufactured Home (Mobile Home) Mfg Motor Vehicle Body Manufacturing Truck Trailer Manufacturing Travel Trailer and Camper Manufacturing
3255104141	Other transportation equipment finishes, including aircraft and railroad	5228	3364XX 336510 336991 3369XX	Aerospace Product and Parts Manufacturing Railroad Rolling Stock Manufacturing Motorcycle, Bicycle, and Parts Manufacturing Other Transportation Equipment Manufacturing
3255104211	Appliance, heating equipment and air-conditioner finishes	5235	3352XX 333414 333994 333415	Household Appliance Manufacturing Heating Equipment Manufacturing Industrial Furnace and Oven Manufacturing Air-conditioning and Warm Air Heating Equipment Manufacturing
3255104215	Wood-furniture, cabinet and fixture finishes	5237	32191X 337110 321999 337122 337121 337129 337211 337127 339992 339995	Millwork Wood Kitchen Cabinet and Countertop Mfg All Other Miscellaneous Wood Product Mfg Nonupholstered Wood Household Furniture Mfg Upholstered Household Furniture Mfg Wood TV, Radio, and Sewing Machine Cabinet Manufacturing Wood Office Furniture Manufacturing Institutional Furniture Manufacturing Musical Instrument Manufacturing Burial Casket Manufacturing
