

CURRENT INDUSTRIAL REPORTS SERIES

2007 MA333A — FARM MACHINERY AND LAWN AND GARDEN EQUIPMENT (SHIPMENTS)

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers firms engaged in the manufacture of farm tractors, farm machinery and equipment, farm irrigation equipment, turf equipment, and lawn and garden equipment.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact listed on the report form or write to the U.S. Census Bureau for additional forms.

a. Quantity and value of shipments

The figures on quantity and value of shipments should include the physical shipments of all products sold, transferred to other establishments within your company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to your own branches should be assigned the same value as comparable sales to unaffiliated customers, i.e., the value includes an appropriate allocation of company overhead and profit. Products bought and resold without further manufacture should not be included in shipments.

b. Units of measure

Quantity — Report in number of units
Value — Report in thousands of dollars

c. Columnar structure of report

When posting your figures to the report, please be sure to report information in the correct columns.

These are:

Column 1 — Quantity of shipments
Column 2 — Value of shipments

d. Not included in this survey

Contractors' off-highway wheel tractors (2- and 4-wheel) are excluded from this survey. These units are primarily designed to be used for towing all types of scrapers, trailers, wagons, and similar types of towed equipment for use on natural terrain but restricted by State laws or regulations from operating on public highways when attached to towed unit under loaded conditions.

3. Definitions

WHEEL TRACTORS (Except contractors' off-highway type, garden tractors, and motor tillers.) Include in this section all wheel tractors except contractors' off-highway type, garden tractors, and motor tillers. Horse power data for farm tractors should be based on power take off (PTO) while the other categories of wheel tractors are based on net engine horsepower (NEHP).

TURF TRACTORS — A self-propelled riding vehicle, typified by a low center of gravity, equipped with wide turf-tread tires.

GARDEN TRACTORS — Weighing less than 1,200 pounds (basic machine) typically powered by air cooled engines with fewer than 4 cylinders and total piston displacement of under 45 cubic inches. Such tractors are further distinguished from farm tractors in that they usually carry an engine horsepower rating but not a (PTO) horsepower rating.

LAWN TRACTORS AND RIDING MOWERS — A self-propelled riding vehicle, generally designed for cutting grass, which is not capable of pulling a plow.

NET ENGINE HORSEPOWER (NEHP) — Net flywheel performance as measured by manufacturer, with all standard accessories installed, operated and corrected to 29.38 inches mercury (Hg) and temperature of 85 degrees Fahrenheit.

PARTS — Manufactured components essential to the completeness and proper operation of a machine, vehicle, or apparatus. Examples of parts are (1) a wheel for a cultivator, (2) a plowshare, (3) a gear. Report only parts sold for replacement and repairs.

ATTACHMENTS — Supplementary devices designed to be attached to vehicle or apparatus that either (1) vary or extend the function of the unit, or (2) add to the convenience or effectiveness of the basic unit. Examples of attachments are (1) a root cutter fastened to a plow, (2) a drilling device applied to a checkrow corn planter.

ABBREVIATIONS AND METRIC CONVERSIONS

hp = horsepower = .7457 kilowatts (kW)
PTO = Power take off type
NEHP = Net engine horsepower
gal = gallon = 3.7854 liters (L)
kgs = kilograms = 2.20462 pounds (lbs)
inch = 2.54 centimeters (cm)
l.p.m. = liter per minute
g.p.m. = gallons per minute
b.t.u. = British thermal unit
c.f.m. = cubic feet per minute

4. Comparability

Data reported in this survey should correspond to data reported in the Economic Census - Manufacturing Sector form. The sum of values for item codes shown in column (a) should correspond to dollar values reported under product codes indicated in column (b) below.
