MA335K — WIRING DEVICES AND SUPPLIES (SHIPMENTS)

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers manufacturers of wiring devices and supplies in the United States.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact shown on the report form or write to the U.S. Census Bureau for additional forms.

a. Shipments

Report in these columns the quantity and selling value, f.o.b. plant, of all products made in this establishment which were physically shipped from this establishment during the year. Report quantity in thousands of units except where otherwise specified. Report value in thousands of dollars.

Include products shipped on consignment, whether or not sold at the end of the year. Deduct returned goods.

Report the quantity and value of all of the products manufactured by this establishment and shipped during the report year. Include "private brand" units made by you for sale to other companies as well as your own company brand units. Do not include products purchased by you for resale without further manufacture or assembly into other products.

For value of shipments, report the net selling value, f.o.b. plant, of your total shipments of each product listed. The reported figures should represent values, f.o.b. plant, after discounts and allowances and should not include freight charges or excise taxes. If freight charges are prepaid by you, deduct these charges from the values reported for each product. Estimate if necessary.

Include products transferred to other establishments by your company (such as other manufacturing plants or separate sales branches). Their "value" should be the nearest approximation to the commercial selling value, f.o.b. plant, and not the cost of production.

b. Columnar structure of report

When entering your figures on the original report, please be sure to report the information in the correct columns. These are:

Column 1 — Quantity in thousands of units unless otherwise specified

Column 2 — Value in thousands of dollars

3. Definitions

The product detail for this survey, as shown in the Reference List, is defined according to standard nomenclature for this industry.

4. Comparability

Data reported in this survey should correspond to data reported in the Economic Census - Manufacturing Sector form. The sum of values for item codes shown in column (a) should correspond to dollar values reported under product codes indicated in column (b) below.
