

Intervention Patient Focus Groups: Non-responder Focus Group (A)

Moderator Instructions: After patients (who are part of the intervention practices) sign in, they will be given a name label with identifier (A = non-responders, B = negative screen, C = positive screen). The appropriate separate groups (A, B, C) will then convene, and the group moderator will read the script below. The announcement of gift cards should be given at the end of the session. Patients in the control group practices (D) will not be divided into any further subgroups at each site. However, patients in the control practices (D) will have been previously divided into two separate groups based on whether or not they had been previously screened (e.g. one site will have patients who have been screened (D1) and the other site will have patients that have not been screened (D2)).

INTRO:	Hello. My name is _____ and I am the moderator for today's two hour group discussion. My colleague, _____, is here to take notes and help the session run smoothly. Our main purpose today is to discuss colorectal cancer screening recommendations.
Moderator Info:	The Lehigh Valley Hospital EPICnet along with the Thomas Jefferson University and The CNA Corporation conducted a study to assess an intervention to improve colorectal cancer screening and follow-up among patients 50 – 79 years old. As part of our work, we are speaking with individuals who were part asked to be part of our study. Your input is important to help us understand how to increase colorectal cancer screening.
ACKNOWLEDGE :	I want to thank you for coming in today to talk with us and for fitting this session into your already busy schedules.
DISCLOSURES:	<p>The session is being recorded in audio to make sure our notes accurately reflect our discussion with you. I do not care who says what; I only care what gets said. Does anyone have concerns about taping this session?</p> <p>Notes will also be taken during the discussion today, but they will not include any identifying information about the group's participants.</p>
INFORMED CONSENT:	<p>Your decision to participate in this study is voluntary. Before we begin, I would like to hand out this consent form for you all to sign, if you still would like to participate in our discussion. [<i>hand out informed consent, and collect after patients sign</i>]</p> <p>- Are there any questions about your participation in this study?</p> <p>- If you do not want to participate in this study, please take this time to gather your things and leave the room.</p>

GUIDELINES:	<p>A few guidelines before we start:</p> <ol style="list-style-type: none">1. What you say in this room stays in this room. As I already mentioned, all information discussed today will be held in confidence. So, please feel comfortable in speaking openly and candidly with us.2. Please talk one at a time.3. Talk in a voice as loud as mine.4. Avoid side conversations with your neighbors; but it is okay to “piggy back” on comments others have made. Just be sure to talk loud enough so the whole group can participate.5. Make sure everyone has a chance to talk.6. There is no one point of view, please allow all points of view to be heard.7. Say what you believe, it doesn’t matter whether or not anyone agrees with you.
QUESTIONS:	Are there any other questions before we begin?
SELF INTROS:	<p>Let’s start off by introducing yourself to the group and tell us:</p> <ul style="list-style-type: none">- Your first name- Your favorite vacation spot

QUESTIONS:

1. Are you familiar with screening tests for colorectal cancer screening?
 - a. Who do you think is supposed to receive colorectal cancer screening?
 - b. Who do you think does not need to be screened for colorectal cancer?
 - c. Describe to me whether you think you are someone who should receive colorectal cancer screening?
 - d. Are you familiar with the new 2008 American Cancer Society Colorectal Cancer Screening Guidelines?
2. Have you received colorectal cancer screening before?
 - a. If so, when? How were you screened? Describe to me what influenced your decision to be screened.
 - b. If you haven’t received colorectal cancer screening before, describe to me why you were not and what influenced your decision not to be screened.
3. Do you recall receiving an invitation in the mail a few months ago suggesting that you get screened for colorectal cancer screening?
 - a. How did you feel about the colorectal cancer screening information that was sent to you?

Health Care Systems for Tracking Colorectal Cancer Screening Tests

Focus Group Guides

- i. Did you think the information was clear? Easy to understand?
 - ii. What did you like about the information?
 - iii. What did you not like about the information?
- b. What influenced your decision to not participate?
4. Specifically in terms of this study, if it was to be conducted again and you received another invitation to get screened, what could be done differently to help encourage you to receive screening?
 - a. Do you feel there was a need for better information?
 - b. Do you feel there was a need for more personalized information?
 - c. Do you feel there was a need for more colorectal cancer screening choices (beyond stool blood test and colonoscopy)?
 - d. Do you feel you should have received direct contact from your provider?
 - e. Anything else?
5. Before we end are there any issues or topics that I have not brought up today that you would like to address?

*** As a way to thank you for participating in today's focus group, we have some gift cards for you [*distribute gift cards*]. Thank you again for taking the time to talk with us today. ***
