

**SUPPORTING STATEMENT FOR 2900-0091  
VA FORM 10-10EZ APPLICATION FOR HEALTH BENEFITS,  
10-10EZR HEALTH BENEFITS RENEWAL FORM**

**A. JUSTIFICATION**

**1. Explain the circumstances that make the collection of information necessary. Identify legal or administrative requirements that necessitate the collection of information.**

This is a change to a previously approved data collection for 2900-0091.

Title 38 U.S.C. Chapter 17 authorizes VA to provide hospital care, medical services, domiciliary care and nursing home care to eligible veterans. Title 38 U.S.C. § 1705 requires VA to design, establish and operate a system of annual patient enrollment in accordance with a series of stipulated priorities. A consequence of this is that many groups of veterans who are in a lower priority group (WWI veterans, veterans with disabilities rated as 0% service-connected seeking treatment for other than their service-connected conditions, veterans exposed to a toxic substance, radiation, or environmental hazard and nonservice-connected veterans) may request that they be allowed to be income tested in order to gain a higher priority. Title 38 U.S.C. § 1705 also places veterans awarded a Purple Heart medal in Priority Group 3 if not already enrolled in a higher priority group. Title 38 U.S.C. § 1722 establishes eligibility assessment procedures for cost-free VA medical care, based on income levels, which will determine whether nonservice-connected and 0% service-connected noncompensable veterans are able to defray the necessary expenses of care for nonservice-connected conditions. Title 38 U.S.C. § 1722A establishes the eligibility assessment procedures, based on income levels, for determining veterans' eligibility for cost-free medications and Title 38 U.S.C. § 1710B defines the procedures for establishing eligibility for cost-free long-term care benefits. Title 38 U.S.C. § 1729 authorizes VA to recover from veterans' health insurance carriers the cost of care furnished for their nonservice-connected conditions. VA is also required to identify veterans who agree to make VA medical care co-payments and whose family incomes are below the "low-income" limits for their geographical area set by the U.S. Department of Housing and Urban Development (HUD) for public housing benefits. VA Form 10-10EZ complies with OMB Directive 15, which sets minimum standards for the collection of race and ethnicity.

Title 38 U.S.C. 111(c) (1) authorizes the Secretary to deduct an amount from the amount otherwise payable to a veteran for each one-way trip. Section 111(c) (4) states the Secretary may waive the travel deductible when it would cause the beneficiary severe financial hardship. VA's medical regulation 38 C.F.R. § 70.31(c) authorizes the Secretary to waive the deductible if the beneficiary:

(1) Is in receipt of a VA pension;

(2) Has income for the year prior to the year in which application is made pursuant to § 70.20 that does not exceed the household income threshold determined under 38 U.S.C. 1722(a);

or

(3) Has circumstances in the year the application is made pursuant to § 70.20 that cause his or her projected income not to exceed the household income threshold determined under 38 U.S.C. 1722(a).

When there is a change in a beneficiary's household income information, 38 C.F.R. § 70.31(e) requires a beneficiary granted a waiver to promptly inform VA of any household income status change during the waiver period that results in the beneficiary no longer meeting the terms of paragraph § 70.31(c).

**2. Indicate how, by whom, and for what purposes the information is to be used; indicate actual use the agency has made of the information received from current collection.**

VA Form 10-10EZ collects information only from new applicants for VA medical care, nursing home, domiciliary, dental benefits, and new enrollees in the VA health care system. VA Form 10-10EZ is also used to establish the system of records, 24VA19 "Patient Medical Record – VA". VA Form 10-10EZR, Health Benefits

## SUPPORTING STATEMENT FOR 2900-0091, Continued

Renewal Form, is used to collect data from those veterans who wish to update their application data. Additional to qualify for waiver of the beneficiary travel deductible, a veteran must request verbally or in writing to be exempted, VA information collection currently authorizes VA to collect financial information from nonservice-connected veterans and veterans rated 0% services-connected, for medication copay purposes, veteran rated 10 to 40% service-connected. Since VA does not collect financial information from veterans rated 50% service-connected or greater, this change would authorize VA to collect this information in order to establish their eligibility for waiver of the beneficiary travel deductible.

The data collected on these two forms is used by VA administrative personnel to:

- Establish basic eligibility for VA benefits through collection of military service data
- Enroll veterans into the VA health care system
- Establish/update an individual's eligibility for health services covered by authorities other than 38 U.S.C. § 1710, including but not limited to nursing home, dental and domiciliary care.
- Establish/update eligibility for cost-free health care, priority for enrollment in the VA health care system, long-term care, mileage reimbursement and prescription co-payment exemption,
- Identify/update a veteran's employment information and third party health insurance to facilitate recovery of the cost of medical care furnished for treatment of nonservice-connected conditions,
- Determine/update a veteran's marital status, next of kin and emergency contact for care management and consent purposes as well as demographic information, such as address, and telephone numbers.
- Determine/update a veteran's financial information to determine if they qualify for a waiver of the beneficiary travel deductible.

**3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.**

VA Form 10-10EZ is available both as a paper document and on-line in a fillable, savable and printable Intra and Internet format that can be electronically submitted. The paper document was initially implemented April 1998 and the electronic application went on-line November 2000. The VA Form 10-10EZR is available in paper form and on-line Intra and Internet documents in a fillable, savable and editable format. Applicants wishing to update their application data via 10-10EZR can submit their completed form to their local VA facility for processing via mail, FAX, or by hand.

Electronic submission of VA Form 10-10EZ currently allows VA health care facilities to directly load veteran application data into its computer system (VistA). This reduces VA personnel workload while expediting the veteran's application for benefits. In addition, once the veteran's information is in VistA, any VA facility the veteran visits has the ability to retrieve the veteran's information electronically, thereby eliminating the need for the veteran to provide the information multiple times.

These forms meet the basic provisions and intent of the Government Paperwork Elimination Act (GPEA) because the applicant can complete them on-line. Whether the data is collected electronically or by paper, it is loaded into the facility's local VistA system. Once the problems inherent in electronic signature are resolved, VA Form 10-10EZ will be fully GPEA compliant. Approximately 3% of VA Forms 10-10EZ current annual submissions are actually electronic.

## SUPPORTING STATEMENT FOR 2900-0091, Continued

**4. Describe effort to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.**

The burden on the public for these forms has been kept to a minimum with the solicitation of only essential information.

VA Form 10-10EZ is primarily used to collect veteran information during the initial application process. There is no similar information elsewhere within VA data banks. VA Form 10-10EZR collects only that information subject to change. The data collected by VA Form 10-10EZR is limited to demographics, employment, health insurance and financial information essential for the effective delivery of health care or for determining the veteran's eligibility for care. VA has discontinued use of the VA Form 10-10EZ to collect updated veteran information. This further eliminates the collection of needless and duplicative information from veterans. VA Form 10-10EZ continues to be used to collect veterans' initial application for VA health care benefits.

Once the VA Form 10-10EZ or 10-10EZR information is collected, it is electronically submitted to the Health Eligibility Center (HEC) in Atlanta, Georgia, and is automatically shared with all VA health care facilities involved in the veteran's care. Additionally, VA health care facilities that have not previously provided the veteran care, can query the last VA health care facility that provided the veteran care as well as the HEC database to obtain information. Changes to a veteran's compensation and pension award information are automatically sent to HEC. This information is used to update the determination of the veteran's eligibility for health care benefits and priority for enrollment in the VA health care system. This prevents redundant questioning of veterans and improves the accuracy and consistency of veteran data in VHA's information systems.

**5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.**

This collection does not impact small business or other small entities.

**6. Describe the consequences to Federal program or policy activities if the collection is not conducted or is conducted less frequently as well as any technical or legal obstacles to reducing burden.**

a. VA Form 10-10EZ is an application for health care benefits. It is completed when a veteran initially applies for health care benefits or enrollment in the VA health care system. VA's failure to collect information would:

- (1) Not allow veterans to enroll into the VA health care enrollment system.
- (2) Restrict VA's ability to determine certain veterans' eligibility for VA health care benefits when the determination is income based.
- (3) Prevent VA from recovering the cost of care from a veteran's third party health insurer when care is provided for a nonservice-connected disability.
- (4) Prevent VA from collecting information necessary for health care management and consents.
- (5) Restrict VA's ability to determine certain veterans' eligibility for waiver of the beneficiary travel deductible when the determination is income based.

## SUPPORTING STATEMENT FOR 2900-0091, Continued

b. The VA Form 10-10EZR is used only to collect updated information. Failure to use this form would result in an increased burden on the public as all items on the VA Form 10-10EZ would need to be completed every time there was a change in the veteran's personal data.

(1) VA implemented this form to collect veterans' personal information that is subject to change, such as address, health insurance coverage, and financial information. This reduces the respondent burden by eliminating those questions that do not require update.

(2) Nonservice-connected veterans and noncompensable 0% service-connected veterans must submit their household financial information annually to reestablish their eligibility for enrollment, co-payment exemption, etc. Other updated information is collected to better serve the veteran and delivery of health care.

**7. Explain any special circumstances that would cause an information collection to be conducted more often than quarterly or require respondents to prepare written responses to a collection of information in fewer than 30 days after receipt of it; submit more than an original and two copies of any document; retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years; in connection with a statistical survey that is not designed to produce valid and reliable results that can be generalized to the universe of study and require the use of a statistical data classification that has not been reviewed and approved by OMB.**

There are no such special circumstances.

**8. a. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the sponsor's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the sponsor in responses to these comments. Specifically address comments received on cost and hour burden.**

The notice of Proposed Information Collection Activity was published in the Federal Register on January 24, 2007, Volume 72, Number 15 Page 3196. We received no comments in response to this notice.

**b. Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, clarity of instructions and recordkeeping, disclosure or reporting format, and on the data elements to be recorded, disclosed or reported. Explain any circumstances which preclude consultation every three years with representatives of those from whom information is to be obtained.**

We received no response concerning any information collections in response to the request for comment in the notice of proposed rulemaking.

**9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.**

No payment or gift is provided to respondents.

**10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulations, or agency policy.**

Respondents are informed that the information collected will become part of the Consolidated Health Record that complies with the Privacy Act of 1974. These forms are part of the system of records identified as 24VA19 "Patient Medical Record – VA" as set forth in the Compilation of Privacy Act Issuances via online GPO access at <http://www.gpoaccess.gov/privacyact/index.html>.

## SUPPORTING STATEMENT FOR 2900-0091, Continued

VA realizes that information requested by the on-line 10-10EZ is sensitive. In addition to the routine security measures, information from the applicant's computer to the VA is protected using Secure Sockets Layer (SSL) encryption. This is handled by most browsers, and is widely accepted as protection for Internet information transmission. Information received by VA is immediately moved behind a "firewall" into the protected internal VA environment. Information does not stay on Internet servers. VA firewalls and servers are regularly updated and monitored to further protect the systems from inappropriate access.

**11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private; include specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.**

The personal information asked on these forms is necessary to better serve the veteran and for the effective delivery of health care. VA Form 10-10EZ collects information relative to an applicant's religion, which may be considered sensitive. However, this information is necessary to provide religious counseling in the event the patient becomes seriously ill. The form also collects the applicant's race and ethnicity to assist in the analysis of health outcomes and other health data. The applicant is informed of why we need the information and can refuse to provide it if the patient so chooses. VA Forms 10-10EZ and 10-10EZR collect financial information relative to a veteran's household income, assets and net worth, which may also be considered sensitive. This information is necessary to make a determination of the individual's ability to defray the cost of needed health care related benefits.

**12. Estimate of the hour burden of the collection of information:**

a. The total number of annual respondents for this data collection is 2,071,812 and the total annual burden is 1,113,865 hours.

(1) Veterans wishing to enroll in the VA health care system are required to complete VA Form 10-10EZ. This number of respondents is estimated at 703,440 annually. This is based on the yearly number of new veterans applying for enrollment in the VA health care enrollment system. The time estimated to complete each form is 45 minutes.

$$703,440 \text{ initial applications} \times 45 \text{ minutes}/60 = 527,580 \text{ hours}$$

(2) Veterans wishing to update their financial and demographic information in the VA healthcare system are required to complete VA Form 10-10EZR. This number is estimated at 1,201,500 annually. This is based on the yearly number of veterans submitting updated financial and demographic information in the VA healthcare enrollment system. The time estimated to complete and or update the form is 20 minutes. VA must contact the respondent to resolve discrepancies in approximately 190,515 cases annually. This places an additional 25-minute burden on these individuals. The total average burden for each VA Form 10-10EZR is 24 minutes.

$$1,201,500 \text{ respondents} \times 24 \text{ minutes}/60 = 480,600 \text{ hours}$$

(3) Veterans wishing to apply for a waiver of the beneficiary travel deductible are required to complete VA Form 10-10EZ or 10EZR. Since VA collects financial information from all veterans applying for enrollment or copay exemptions, except service-connected veterans rated 50% or greater, this group of veterans would be required to provide this information in order for VA to determine if this waiver. Based on fiscal year 2007 data, the number of veterans rated 50% or greater service-connected who use VA health care services is 782,311 users of which 226,041 users had income above the VA means test threshold based on receipt of VA compensation alone. Therefore, only 556,270 users would potentially have income below the VA means test threshold based on receipt of VA compensation alone. Of 556,270 users, it is assumed that only 30 percent or

## SUPPORTING STATEMENT FOR 2900-0091, Continued

166,881 users would apply for a waiver. The annual respondents for this group of users are estimated at 166,881 and the total annual burden is 105,685. This is based on the yearly number of service-connected veterans applying for a waiver. The time estimated to complete each 10-10 EZ form is 45 minutes and 10-10EZR form is 24 minutes.

111,245 respondents x 45 minutes/60 = 83,434 hours

55,627 respondents x 24 minutes/60=22,251 hours

**b. If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB 83-I.**

**c. Provide estimates of annual cost to respondents for the hour burdens for collections of information. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included in Item 14.**

The cost to the respondents for completing the VA Forms 10-10EZ and 10-10EZR is \$16,707,975(1,113,865hours X \$15 per hour). We do not require any additional recordkeeping.

**13. Provide an estimate of the total annual cost burden to respondents or record keepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14).**

- a. There are no capital, start-up, operation or maintenance costs.
- b. Cost estimates are not expected to vary widely. The only cost is that for the time of the respondent.
- c. There is no anticipated recordkeeping burden.

**14. Provide estimates of annual cost to the Federal Government.**

- a. The total cost to the Federal Government for this data collection is \$ 8,449,500.
- b. VA Form 10-10EZ

Maintenance of online form & population of database	\$ 75,000
Printing Storage/Distribution of paper form	\$ 20,000
Follow-on maintenance for online site	\$ 35,000
Follow-on maintenance for placing data into VistA	\$ 5,000
500,000 x 45 minutes / 60 x \$14.26 (GS 5/5) per hour	\$5,347,500
<hr/> Estimate of annual cost to the federal government	<hr/> \$5,482,500

## SUPPORTING STATEMENT FOR 2900-0091, Continued

c. VA Form 10-10EZR

Maintenance of online form	\$ 35,000
Printing / Storage / Distribution	\$ 40,000
Follow-on maintenance for online site	\$ 35,000
Follow-on maintenance for placing data into VistA	\$ 5,000
500,000x 24 minutes / 60 x \$14.26 (GS 5/5) per hour	\$2,852,000
<hr/> Estimate of annual cost to the federal government	<hr/> \$2,967,000

**15. Explain the reason for any program changes or adjustments reported in Items 13 or 14 of OMB 83-I.**

a. We project an adjustment of +3,180 hours due to an anticipated fluctuation in the number of individuals submitting forms.

b. VA does not collect income information on veterans rated service-connected 50% or greater. This change would cover this group of veterans who may request a waiver of their beneficiary travel deductible.

**16. For collections of information whose results will be published, outline plans for tabulation and publication.**

There are no plans to publish the results of the information collected.

**17. If seeking approval to omit the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.**

VA seeks to minimize the cost to itself of collecting, processing, and using the information by not displaying the expiration date. We seek an exemption that waives the display of the expiration date. These are on-going requirements and there is a continuing and reoccurring need for this information collection.

**18. Explain each exception to the certification statement identified in Item 19, "Certification for Paperwork Reduction Act Submissions," of OMB 83-I.**

There are no exceptions.

B. Employing Statistical Methods

The collection of information does not employ statistical methods.
