

Farm and Ranch Irrigation Survey (2003)

Volume 3, Special Studies
Part 1

AC-02-SS-1

2002 CENSUS OF AGRICULTURE

Issued November 2004

U.S. Department of Agriculture
Ann M. Veneman, Secretary
Dr. Joseph J. Jen, Under Secretary for
Research, Education, and Economics
NATIONAL AGRICULTURAL STATISTICS SERVICE
R. Ronald Bosecker, Administrator

Acknowledgments

This report was prepared under the direction of the U.S. Department of Agriculture (USDA), National Agricultural Statistics Service (NASS). Many people participated in the various activities of the 2003 Farm and Ranch Irrigation Survey and deserve recognition for their contributions to the program.

NASS pays special tribute to the farm and ranch operators who furnished the information requested. Their cooperation and support made it possible to collect and publish the data in this report. Economic Research Service (ERS), other USDA agencies, and representatives from State departments of agriculture offered significant advice during the planning, data collection, and processing phases of this survey. They provided invaluable assistance at the local level to farmers and ranchers completing census report forms. Also, NASS acknowledges our partnership with the U.S. Department of Commerce, National Processing Center in Jeffersonville, IN and the services they provided to collect and capture data.

Members of the Advisory Committee on Agriculture Statistics and representatives of both public and private organizations made significant recommendations that helped establish data content. NASS appreciates their strong and consistent support for census programs.

NASS expresses gratitude to the press, farm magazines, radio and television stations, farm organizations, State departments of agriculture, and enumerators from the National Association of State Departments of Agriculture for their help in publicizing the census and encouraging cooperation of farmers and ranchers.

If you would like to learn more about the statistics available from NASS or have questions concerning this report, visit our Web site at www.usda.gov/nass/, send e-mail to nass@nass.usda.gov, or call the Agricultural Statistics Hotline at 800.727.9540.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, S.W., Washington, DC 20250-9410, or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

Introduction

PURPOSE AND SCOPE OF THE SURVEY

The 2003 Farm and Ranch Irrigation Survey provides data that supplement the basic irrigation data collected from all farm and ranch operators in the 2002 Census of Agriculture. Irrigation data from this survey combined with 2002 census data provide one of the most complete and detailed profiles of irrigation in the United States.

The 2003 Farm and Ranch Irrigation survey collected detailed data for on-farm irrigation practices in 2003. These data include acres irrigated by category of land use, acres and yields of irrigated and nonirrigated crops, quantity of water applied and method of application to selected crops, acres irrigated by type of water distribution system, and number of irrigation wells and pumps. Also, included are data for irrigation expenditures in 2003 for maintenance and repair of irrigation equipment and facilities; purchase of energy for on-farm pumping of irrigation water; investment in irrigation equipment, facilities, and land improvement; and cost of water received from off-farm water suppliers.

The 25,014 operations sampled for the 2003 survey were selected from farms and ranches reporting irrigated acres in the 2002 census, including American Indian reservations. Farms that reported horticultural crop sales of at least \$10,000 and all institutional, research, and experimental farms were excluded from the survey. Therefore, 23,767 irrigation operations were excluded from the sample. Most of the irrigated farms (23,116) excluded were horticultural specialty farms which accounted for 1,011,012 acres irrigated, or 2 percent of the land irrigated in 2002. In the 2002 census, 806 institutional, research, and experimental farms accounted for 125,535 acres irrigated, or less than 1 percent of all acres irrigated in the nation.

Some changes occurred between the 2002 Census of Agriculture and the 2003 Farm and Ranch Irrigation Survey. Between 2002 to 2003, 16,088 farms irrigating 2.9 million acres in 2002 ceased operation under the name identifying them in the 2002 census. In addition, results of the 2003 survey show 32,489 irrigation operations reporting irrigation on 1.85 million acres in 2002 did not irrigate in 2003. No attempt was made to identify and select new irrigation operations for 2003.

HISTORY

Selected irrigation data for on-farm irrigation operations have been collected in the census of agriculture since 1890. A census of farms which reported irrigation in the 1900 Census of Agriculture was authorized by Congress. Surveys of irrigation in humid areas were taken in connection with the 1954 and 1959 censuses.

The 2003 Farm and Ranch Irrigation Survey is the sixth survey devoted entirely to collecting on-farm irrigation data for the United States. The 1979, 1984, 1988, and 1994 Farm and Ranch Irrigation Surveys were conducted by the U.S. Department of Commerce, Bureau of Census. Responsibility for the survey was transferred from the Bureau of Census to the U.S. Department of Agriculture (USDA), National Agricultural Statistics Service (NASS) in 1997. The 1998 survey utilized the resources of the 45 NASS State Statistical Offices (SSO) which expanded opportunities for telephone follow-up or personal enumeration of nonresponse cases. The 1998 Farm and Ranch Irrigation Survey was the first survey to collect and publish data for each of the 50 States. Previous farm and ranch irrigation surveys published data only for leading irrigation States, with a U.S. total, excluding Alaska and Hawaii.

AUTHORITY

The census of agriculture is required by law under the "Census of Agriculture Act of 1997", Public Law 105-113 (Title 7, United States Code, Section 2204g). The law authorizes the Secretary of Agriculture to conduct surveys deemed necessary to furnish annual or other data on the subjects covered by the census. The 2003 Farm and Ranch Irrigation Survey was conducted under the provisions of this section.

FARM DEFINITION

The census definition of a farm is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year. The definition has changed nine times since it was established in 1850. The current definition was first used for the 1974 Census of Agriculture and has been used in each subsequent agriculture census and related surveys. This definition is consistent with the definition used for current USDA surveys.

WATER RESOURCES AREAS MAP

The map on page 1 shows Water Resources Areas delineated on the basis of county boundaries that approximate actual basin boundaries based on topographic drainage characteristics. Data are tabulated separately for each of the 20 water resources areas shown on the map.

PERCENT OF NORMAL PRECIPITATION MAP

The map on page 2 shows the areas of the United States with deviations from normal precipitation during 2003. The map is included for reference purposes only.

TABLES AND APPENDIX

Table 1 shows farms and acres irrigated for the 1982 through 2002 censuses for each State. Tables 2 through 41 present detailed irrigation operation data collected in the survey from irrigation operations that reported irrigated land in the 2002 census and also irrigated in 2003. Table 42 presents data for farm operations that irrigated in 2002, but discontinued

irrigation either temporarily or permanently in 2003 while continuing to operate a farm or ranch. Data from the 2003 survey are reported for each State and for the 20 Water Resources Areas. Additional text tables are shown in the General Explanation. The appendix provides facsimiles of the report form used to collect the data.

RESPONDENT CONFIDENTIALITY

In keeping with the provisions of Title 7 of the United States Code, no data are published that would disclose information about the operations of an individual farm or ranch. All tabulated data are subjected to an extensive disclosure review prior to publication. Any tabulated item that identifies data reported by a respondent or allows a respondent's data to be accurately estimated or derived, was suppressed and coded with a 'D'. However, the number of farms reporting an item is not considered confidential information and is provided even though other information is withheld.

DATA PRODUCTS

The 2003 Farm and Ranch Irrigation Survey data, as well as the 2002 Census of Agriculture Volume 1 Geographic Area Series and related reports, are available on the Internet at www.usda.gov/nass and in printed reports. Printed reports can be ordered by calling 1-800-727-9540.

CUSTOM TABULATIONS

Special studies such as the 2003 Farm and Ranch Irrigation Survey and 2005 Census of Aquaculture are part of the census program and provide supplemental information to the 2002 Census of Agriculture in the respective subject area. Results are published in print and on the internet.

Custom-designed tabulations may be developed when data are not published elsewhere. These tabulations are developed to individual user specifications on a cost-reimbursable basis and shared with the public. The census Volume 1 on CD-ROM is an alternative data source that should be investigated before requesting a custom tabulation.

All special studies and custom tabulations are subject to a thorough disclosure review prior to release to prevent the disclosure of any individual respondent data. Requests for custom tabulations can be submitted via the internet from the NASS home page, by mail, or by e-mail to:

Associate Administrator
National Agricultural Statistics Service
1400 Independence Avenue, S.W.
Washington, D.C. 20250
or
HQ AA@nass.usda.gov

DEFINITIONS AND EXPLANATIONS

Definitions and explanations of selected terms used in the tables are defined in the General Explanation.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used throughout the tables:

- Represents zero.
- cwt Hundredweight.
- (D) Withheld to avoid disclosing data for individual farms.
- gpm Gallons per minute.
- (NA) Not available.
- psi Pounds per square inch.
- WRA Water Resources Areas.
- (X) Not applicable.
- (Z) Less than half of the unit shown.

General Explanation

PLANNING AND DEVELOPMENT

Planning for the survey started in 1999 with a review of the previous farm and ranch irrigation survey. Letters were sent to more than 200 individuals in water-related government organizations, industry, and academic positions to solicit their comments on report form content and table format. Presentations were made to several associations seeking their comments. Sixty responses were received. All responses were reviewed and categorized to evaluate data collection feasibility and priority needs.

METHOD OF ENUMERATION AND DATA COLLECTION

The 2003 Farm and Ranch Irrigation Survey was conducted primarily by mail and was supplemented by telephone calls and personal enumeration by NASS State Statistical Office (SSO) staff and enumerators. A sample of 25,014 irrigators was selected and mailed a report form in January 2004. This was a 6 percent increase over the 1998 sample size and was designed to enhance data quality for the 2003 survey. The initial mail packet included a report form and letter requesting a prompt response. The operators were asked to complete and return the report form. The initial mailing was followed by one follow-up mailing to those who had not responded in the first 4 weeks. The follow-up packet included a reminder letter and a report form. Six weeks after the initial mailing, the SSOs were provided nonresponse lists. SSOs made telephone calls and personal visits to maximize the response. For a description of the adjustment for nonresponse, see Statistical Methodology.

DATA PROCESSING

All report forms were reviewed by NASS staff prior to data keying to identify inconsistencies and ensure that

the data could be keyed. Major inconsistencies, respondent remarks, blank forms, and large irrigation cases were reviewed by analysts and adjusted prior to data keying as needed. All forms with data were scanned and keyed from image. Data from each report form were processed through a computer edit which flagged inconsistent entries. Each flagged entry was reviewed manually. During the edit process, an imputation program supplied missing data and made adjustments based on responses of similarly sized farms within the same geographic area. Data entries of large magnitude and data items that were changed significantly in the computer edit process were reviewed and verified by analysts.

Prior to publication, tabulated totals were reviewed to identify and resolve remaining inconsistencies and potential coverage problems. Comparisons were made to 2002 census data and other available check data.

DATA COMPARABILITY

The 2002 Census of Agriculture introduced new methodology to account for all farms in the United States. All 2002 published census items were reweighted for incompleteness in the mail list. This adjustment for undercoverage was also used for the 2003 Farm and Ranch Irrigation Survey. To provide comparable data, 1998 data published in 2003 were also reweighted for undercoverage. An explanation of the methodology is included in the 2002 Census of Agriculture Volume 1, Appendix C.

Differences exist between the expanded results of the 2003 Farm and Ranch Irrigation Survey and published data from the 2002 Census of Agriculture. Some of these are as follows:

1. The survey excludes horticultural specialty farms and institutional, research, and experimental

farms. The effect of these exclusions is listed in the following table:

	Irrigated farms	Acres irrigated
2002 U.S. totals ..	299,583	55,311,236
Excluded from survey	23,767	1,136,547
Eligible for selection in survey	275,816	54,174,689

2. The survey includes data only for operators who irrigated in both 2002 and 2003. Operators in some areas, especially the Eastern States, irrigate intermittently according to moisture needs. Operators having irrigation capabilities may not irrigate depending on the amount of rainfall for a particular year or geographic area. The number of operators who irrigated in 2002 but discontinued irrigation in 2003 is tabulated in Table 42 by reason of discontinuance.
3. Some operators reported that they had been misclassified as irrigators and did not irrigate in either 2002 or 2003. An estimated 22,719 operators with 948,400 acres irrigated in 2002 were misclassified as irrigators in the 2002 census. This is estimated by expanding reports in the survey where the respondents reported that they did not irrigate in 2003 or 2002. In addition to errors in processing data, some operators misreported or misinterpreted the questions. Most of the operators misreporting irrigation in the 2002 census reported irrigation of small acreages of vegetables, fruits and nuts, tobacco, potatoes, or berries. Small amounts of water were applied to these crops at the time of transplanting.
4. Some respondents indicated they had quit farming, retired, moved, gone bankrupt, etc., since 2002. After analytical review of the 2003 receipts, an estimated 16,088 operators accounting for 2,941,413 acres irrigated in 2002 after expansion, were dropped from processing because they were no longer farming. Special care was taken with large operations to ensure that they were not erroneously dropped due to reorganization or name

change rather than discontinuing agricultural operations. This included the use of field and telephone enumeration.

5. New irrigators in 2003 (not included in the 2002 census) did not have a chance of being selected in the sample and, therefore, were excluded from the survey. It is believed that the impact of new irrigators is probably minimal. This conclusion is supported by comparisons between the 1997 and 2002 censuses which show little change in acres of irrigated cropland harvested.
6. For the 2002 census and the 2003 Farm and Ranch Irrigation Survey, farms were classified by type of activity or activities according to the North American Industry Classification System (NAICS). Table 33 provides irrigation data for farms classified by NAICS.

Table A. Farms with Irrigation by Acres Irrigated: 2003 Survey Compared with 2002 Census

Item	2002 Census of Agriculture	2003 Farm and Ranch Irrigation Survey	
	U. S. totals	U.S. totals (expanded)	Percent of 2002 census totals
Acres irrigatedfarms	299,583	220,163	73.5
..... acres	55,311,236	52,583,431	95.0
1 to 49 acres farms	183,120	116,256	63.5
..... acres	2,032,251	1,658,408	81.6
50 to 99 acresfarms	27,094	22,288	82.3
..... acres	1,878,687	1,551,154	82.6
100 to 199 acresfarms	28,011	24,657	88.0
..... acres	3,851,651	3,454,895	89.7
200 to 499 acresfarms	31,449	28,032	89.1
..... acres	9,883,105	8,922,430	90.3
500 to 999 acresfarms	17,329	16,771	96.8
..... acres	12,001,034	11,827,596	98.6
1,000 acres or more farms	12,580	12,159	96.7
..... acres	25,664,508	25,168,948	98.1

When comparing the number of farms and irrigated acres between the 2003 survey and the 2002 census published U.S. totals, most of the differences are for operators reporting less than 100 acres irrigated. This is expected since the excluded horticultural farms average 48 acres irrigated per farm and the other categories of discontinued or excluded irrigators

generally are smaller than average irrigators. Table A shows acres irrigated in the 2003 survey (expanded) compared with U.S. totals from the 2002 census. The expanded survey accounts for 95 percent of all land reported as irrigated in the 2002 census and all irrigation characteristics associated with that land.

DEFINITIONS AND EXPLANATIONS

This section provides definitions and explanations of selected items that are used on the report form or in the tables. A facsimile of the 2003 Farm and Ranch Irrigation Survey report form is in the appendix.

Water Resources Areas (WRA)

Data from the 2003 Farm and Ranch Irrigation Survey were tabulated by WRA. Boundaries of these areas are shown on the map on page I. These boundaries are essentially the same as the water resources regions (WRR) delineated and defined in the past by the U.S. Water Resources Council. The areas differ somewhat from the regions because of the method used for boundary delineation. Region boundaries are delineated on the basis of topographic drainage characteristics, whereas areas are delineated on the basis of county boundaries which approximate actual drainage-basin boundaries. Geographic descriptions of each water resources region that were used to approximate the area included in each water resources area are as follows:

01 New England Region - The drainage within the United States that ultimately discharges into the Bay of Fundy and the Atlantic Ocean. These points of discharge are located within and between Maine and Connecticut; Long Island Sound and the St. Francis River, a tributary of the St. Lawrence River.

02 Middle Atlantic Region - The drainage within the United States that ultimately discharges into the Atlantic Ocean, whose point of discharge is located within and between New York and Virginia, and the Richelieu River, a tributary of the St. Lawrence River.

03 South Atlantic-Gulf Region - The drainage that ultimately discharges into the Atlantic Ocean, whose point of discharge is located within and between North Carolina and Florida; and the Gulf of Mexico, whose

point of discharge is located within and between Florida and Mississippi, including the Pearl River.

04 Great Lakes Region - The drainage within the United States that discharges into the Great Lakes system, including the Lakes' surfaces; and the St. Lawrence River as far east as, but excluding the Richelieu River.

05 Ohio Region - The drainage of the Ohio River, excluding that of the Tennessee River.

06 Tennessee Region - The drainage of the Tennessee River.

07 Upper Mississippi Region - The drainage of the Mississippi River above the mouth of the Ohio River, excluding drainage of the Missouri River above a point immediately below the mouth of the Gasconade River.

08 Lower Mississippi River - The drainage of the Mississippi River below the mouth of the Ohio River, but excluding the drainage of the Arkansas, White, and Red Rivers and above the points of highest backwater affects of the Mississippi River in those parts; and the coastal streams, other than the Mississippi River, that discharge into the Gulf of Mexico from the boundaries of, but excluding the Pearl and Sabine Rivers.

09 Souris-Red-Rainy Region - The drainage within the United States of the Souris, Red, and Rainy Rivers.

10 Missouri Region - The drainage within the United States of the Missouri River above a point immediately below the mouth of the Gasconade River and the Saskatchewan River.

11 Arkansas-White-Red Region - The drainage of the Arkansas River above the point of highest backwater affect of the Mississippi River, the Red River above the point of highest backwater affect of the Mississippi River, and the White River above the point of highest backwater affect of the Mississippi River near Peach Orchard Bluff, AR.

12 Texas-Gulf Region - The drainage that discharges into the Gulf of Mexico from and including Sabine Pass to, but excluding the Rio Grande and the Lower Rio Grande Valley.

13 Rio Grande Region - The drainage within the United States of the Rio Grande; the San Luis Valley, North Plains, San Augustine Plains, Mimbres, Estancia Jonado del Muerto, Tularosa, Salt, and various smaller closed basins; and the Lower Rio Grande Valley.

14 Upper Colorado Region - The drainage of the Colorado River above the Lee Ferry Compact Point, which is about 1 mile below the mouth of the Paria River; and the Great Divide closed basin.

15 Lower Colorado Region - The drainage within the United States of the Colorado River below the Lee Ferry Compact Point, which is about 1 mile below the mouth of the Paria River; the Rios Yaqui, Magdalena, Sonoita, and other lesser streams that ultimately discharge into the Gulf of California; and the Animas Valley, Wilcox Playa, El Dorado Valley, and other smaller closed basins.

16 Great Basin Region - The drainage of the Great Basin that ultimately discharges into Utah and Nevada.

17 Pacific-Northwest Region - The drainage within the United States that ultimately discharges into the Straits of Georgia and Juan de Fuca and the Pacific Ocean. The point of discharge is within Washington and Oregon, including the Columbia river.

18 California Region - The drainage within the United States that ultimately discharges into the Pacific Ocean, whose point of discharge is within California, which includes the Central Valley; and that portion of the Great Basin and other closed basins in California.

19 Alaska - entire State.

20 Hawaii - entire State.

Acre-Foot of Water - An acre-foot of water is the quantity of water required to cover 1 acre to a depth of 1 foot. This is equivalent to 43,560 cubic feet or 325,851 gallons.

Acres and quantity harvested - If two or more crops were harvested from the same land during the year, the acres were counted for each crop. Therefore, the total acres of all crops harvested generally exceeds the acres of harvested cropland. Exceptions to this procedure

are hay crops. When more than one cutting of hay was taken from the same acres, the acres were counted only once, but the quantity harvested included hay from all cuttings.

For interplanted crops or “skip-row” crops, acres were reported according to the portion of the field occupied by each crop. If a crop was interplanted in an orchard or vineyard and harvested, then the entire orchard or vineyard acreage was reported under the appropriate fruit crop and the interplanted estimated crop acreage was reported under the appropriate crop.

Acres of land in bearing and nonbearing orchards, citrus or other groves, vineyards, and nut trees were reported as harvested cropland regardless of whether the crop was harvested or failed. Abandoned orchards were reported as cropland idle, not harvested cropland.

Acres irrigated - Acres irrigated are the acres of agricultural land to which water was artificially applied by controlled means including preplanted, partial, supplemental, and semi-irrigation. Land flooded during high water periods was to be included as irrigated only if the water was diverted to agricultural land by dams, canals, or other works.

All other land - This category includes land in house lots, barn lots, ponds, roads, ditches, wasteland, etc. It includes those acres in the farm operation not classified as cropland, pastureland, or woodland.

Average operating pressure - This is the pressure at the well head.

Average pumping capacity - This category includes the gallons per minute discharged from wells.

Chemigation - This is the process of applying pesticides, fertilizers, other chemicals, or animal waste through agricultural irrigation water.

Cropland harvested - This category includes land from which crops were harvested and hay was cut, and land used to grow short-rotation woody crops, land in orchards, citrus groves, Christmas trees, vineyards, nurseries, and greenhouses. Land from which two or more crops were harvested was counted only once. Land in tapped maple trees was included in woodland

not pastured. The 1997 census definition for harvested cropland was the same as the 2002 definition. Short-rotation woody crops were not explicitly referenced in the 1997 census definition, but were included as “Other nursery and greenhouse crops.”

Cropland used only for pasture or grazing - This is land used only for pasture or grazing that could have been used for crops without additional improvement. Also included are acres of crops hogged or grazed but not harvested prior to grazing. However, cropland that was pastured before or after crops were harvested was to be included as harvested cropland rather than cropland for pasture or grazing.

Crops unit of measurement - Respondents were instructed to report crops in the units published.

Flowing or artesian wells - Flowing or artesian wells are wells which flow freely and provide water used for irrigation without pumping. All flowing or artesian wells were excluded from pumping data on Tables 14 and 15. This should be taken into consideration when using data from these two tables. The 1998 survey was the first time the question was a respondent-reported item. Past surveys subtracted the reported number of pumped wells from the reported total wells used to derive the number of artesian wells.

Institutional, research, experimental, and American Indian reservation farms - Institutional, research, and experimental farms were previously called abnormal farms. In the 2002 census, these farms were combined with Indian Reservation farms into one category. However, in the 2003 survey American Indian Reservations are included while the others are excluded. Research farms include farms operated by private companies as well as those operated by universities, colleges, and government organizations for the purpose of expanding agricultural knowledge.

Irrigated farms - Irrigated farms or ranches are those with any agricultural land irrigated by any artificial or controlled means in the specific calendar year. The acreage irrigated may vary from a very small portion of the total acreage in the farm or ranch to irrigation of all agricultural land in the farm or ranch. Livestock lagoon waste water distributed by sprinkler or flood systems was also included.

Land in farms - The acreage designated as “land in farms” consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator’s total operation. Large acreages of woodland or wasteland held for nonagricultural purposes were deleted from individual reports during the edit process. Land in farms includes acres in the Conservation Reserve and Wetlands Reserve Programs.

Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. Land used rent free was reported as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as “land in farms” provided it was part of a farm or ranch. Land under the exclusive use of a grazing association was reported by the grazing association and included as land in farms. All land in American Indian reservations used for growing crops or grazing livestock was included as land in farms. Land in reservations not reported by individual American Indians or non-Native Americans was reported in the name of the cooperative group that used the land. In many instances, an entire American Indian reservation was reported as one farm.

Market value of agricultural products sold - The market value of agricultural products sold represents the gross market value before taxes and production expenses of all agricultural products sold or removed from the place in 2003 regardless of who received the payment. It is equivalent to total sales. It includes sales by the operator as well as the value of any shares received by partners, landlords, contractors, or others associated with the operation. The market value of agricultural products sold represents the sum of all crops, including nursery products, and livestock and poultry and their products. It does not include income from farm-related sources, such as custom work or agricultural services, or income from nonfarm sources.

The 2003 Farm and Ranch Irrigation Survey is the first time sales data from the survey year has been collected. In the previous surveys, these data were taken from the previous census report forms of the irrigation survey respondents. Therefore, the market value of sales did not always match up to the commodities reported in the

survey due to differing yields and prices and operation changes from year to year.

North American Industry Classification System - Beginning with the 1997 Census of Agriculture and the 1998 Farm and Ranch Irrigation Survey, farms were classified by type of activity according to the North American Industry Classification System, (NAICS). Prior to 1997, the Standard Industrial Classification System (SIC) was used. An establishment primarily engaged in crop production (major group 111) or production of livestock and animal specialties (major group 112) is classified in the four-digit industry and three-digit industry group which accounts for 50 percent or more of the total value of sales of its agricultural products. If the total value of sales of agricultural products of an establishment is less than 50 percent from a single four-digit industry, but 50 percent or more from the products of two or more four-digit industries within the same three-digit industry group, the establishment is classified in the miscellaneous industry of that industry group. Otherwise, it is classified as "All Other Crop Farming" in industry 11199 or a general livestock farm in industry 11299.

Classifications of irrigated farms by selected NAICS groupings are shown in Table 33. The NAICS codes for the 2003 survey respondents were determined from their 2002 census report.

Off-farm water supply - Off-farm water supply is water from off-farm water suppliers, such as the U.S. Bureau of Reclamation; irrigation districts; mutual, private, cooperative, or neighborhood ditches; commercial companies; or community water systems.

On-farm surface supply - On-farm surface supply is water from a surface source not controlled by a water supply organization. It includes sources such as streams, drainage ditches, lakes, ponds, and reservoirs on or adjacent to the operated land.

Other cropland - Other cropland includes cropland not harvested and not grazed which was used for cover crops or soil-improvement crops, land on which all crops failed, land in cultivated summer fallow, idle cropland, and land planted in crops that were to be harvested after the survey year.

Other pastureland and rangeland - This land use category is very inclusive and encompasses all grazable land that does not qualify as cropland pasture. It may be irrigated or dry land. In some areas, it can be a high quality pasture that could not be cropped without improvements. In other areas, it is barely able to be grazed and is only marginally better than wasteland.

Sprinkler systems - Sprinkler irrigation is divided into four areas to reflect current trends in irrigation. The center pivot and mechanical-move methods have, by definition, high-pressure delivery with water delivered at 60 psi or more, medium pressure delivery with water delivered at 30 to 59 psi, and low pressure delivery with water delivered at less than 30 psi. The mechanical-move systems are classified as either linear move, side roll, wheel move, or big gun where the sprinkler device is moved across the field either by self-propelled methods or by tractor. Since all big guns operate at high pressure, pressure was not asked.

Hand move systems include distribution systems laid out in the spring and removed at the end of the season, as well as other sprinkler systems which are moved without mechanical assistance. Solid set and permanent systems are sprinklers placed in the ground permanently and used mostly for perennial crops.

Total cropland - This category includes cropland harvested, cropland used only for pasture or grazing, cropland idle or used for cover crops or soil improvement but not harvested and not pastured or grazed, cropland on which all crops failed or were abandoned, and cropland in cultivated summer fallow.

Woodland - Woodland includes natural or planted woodlots or timber tracts, cutover and deforested land with young growth which has or will have value for wood products and woodland pastured. Land covered by sagebrush or mesquite was reported as other pastureland and rangeland or other land. Land planted for Christmas tree production and short rotation woody crops was reported in cropland harvested and land in tapped maple trees was reported as woodland not pastured.

STATISTICAL METHODOLOGY

Target Population

The target population for the survey was composed of all farms irrigating in the reference year 2003, excluding horticultural specialty farms and institutional, research, or experimental farms. To obtain measurement for this target population, the frame population was constructed to include all farms that reported irrigated acres in the 2002 Census of Agriculture except for farms that reported horticultural crop sales of at least \$10,000 and all institutional, research, and experimental farms. The farms in the excluded categories represented 11 percent of the total number of irrigators and 2 percent of the irrigated land reported in the 2002 census.

Undercoverage existed in the frame population to the extent that there were farms that either erroneously reported not irrigating in the 2002 census, started irrigating in 2003, or had succeeding irrigators in 2003 (i.e., an operator who, since 2002, took over control of an irrigating farm through sales, rental, or other arrangements). Overcoverage existed in the frame because some operations were misclassified as irrigators and did not irrigate in 2002 or had either stopped farming or irrigating in 2003. Farms in these groups that were selected into the sample were identified during the survey and estimates of their number and acres irrigated are provided. Table B provides the farm count and acres irrigated by State for both the survey frame population and the 2002 census.

Sample Design

Sampling frames were created at the State level and consisted of the farm operations reported in that State in the 2002 census that satisfied the frame definition stated above. The survey estimates were based on a probability sample of farms from each State frame. The sample design consisted of a stratified systematic sample selected independently from each of the 50 State frames. All farms in a sampling frame were stratified on the basis of total irrigated acres reported in the 2002 census. The stratification boundaries varied among the States and were dependent on the distribution of total acres irrigated variable within the State. A certainty stratum, whose farms were selected

with probability one, was included in each State so that the major irrigators in each State were included.

The State sample sizes necessary to obtain the desired level of precision were determined by analyzing the variation of the total acres irrigated variable in each State's sampling frame. These sample sizes were adjusted using historical nonresponse data to the survey. The total national sample size was 25,014 farms; 1,823 of these farms were selected from the certainty strata and the remaining 23,191 farms were systematically selected from the noncertainty strata. Table B provides the State sample sizes.

Survey Error

The statistics in this report are estimates derived from a sample survey. There are two types of errors possible in an estimate-based sample survey: sampling and nonsampling. Sampling error is the error caused by observing only a sample instead of the entire population. The sampling error is subject to sample-to-sample variation. Nonsampling errors include all other errors and can arise from many different sources. These sources may include respondent or enumerator error or incorrect data keying, editing, or imputing for missing data. Nonsampling error due to mail list incompleteness and duplication, as well as misclassification of records on the mail list, is referred to as coverage error.

Measures of Precision

The survey sample was one of a large number of possible samples of the same size that could have been selected using the same sample design. Survey estimates derived from the different samples will differ from each other.

The relative standard error is used as an indicator of the precision in the survey estimates and is reported for major survey items in Table C. The relative standard error expresses the standard error of an estimate as a percent of the estimated value. The standard error of a survey estimate is a measure of the variation among the estimates from all possible samples. It is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples.

The relative standard errors given in Table C can be used to construct confidence intervals for the major survey items. Confidence intervals are another way to express the precision of an estimate by calculating the upper and lower bounds for a level of confidence. This confidence interval is designed to contain the true value being estimated. If all possible samples were selected, each of the samples were surveyed under essentially the same conditions, and an estimate and its standard error were calculated from each sample, then:

1. Approximately 67 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples.
2. Approximately 90 percent of the intervals from 1.65 standard errors below the estimate to 1.65 standard errors above the estimate would include the average value of all possible samples.

The computations necessary to construct the confidence intervals associated with these statements are illustrated in the following example: Assume that the estimated number of irrigated acres of a certain item is 669,813 and the relative standard error of the estimate is 1.6 percent (0.016). Multiplying 669,813 by 0.016 yields 10,717, the standard error. Therefore, a 67 percent confidence interval is 659,096 to 680,530 (i.e., 669,813 \pm 10,717). Similarly, a 90 percent confidence interval is 652,130 to 687,496 (i.e., 669,813 \pm 1.65 x 10,717).

Estimation

Estimates were produced for the Nation as a whole, for each of the 50 States, and for the geographic domains known as Water Resources Areas (WRA). The estimation methodology accounted for both selection of the survey sample and survey nonresponse. The estimator for the State totals was a direct expansion reweighted estimator. The expansion factor was the inverse of the selection probability for the sample farms in a stratum. This expansion factor was reweighted at the stratum level to account for whole-farm nonresponse. The nonresponse adjustment factor used to reweight the expansion factor was the ratio of the number of sample farms in a stratum to the number of sample farms that responded to the survey in that

stratum. The assumption underlying this weighting approach to survey nonresponse was that survey respondents and nonrespondents within a stratum constitute a homogeneous population, thus allowing respondents to represent nonrespondents. The reweighted expansion factor is the product of these two factors and is equal to the ratio of the total number of farms in the stratum to the total number of sample farms that responded to the survey in that stratum. An expanded data value for a sample record was obtained by multiplying the data value by the reweighted expansion factor. State totals for a characteristic were estimated by summing the expanded data values from all responding sample records across all strata within the State. National estimates were obtained by summing across all States. The WRA estimates were obtained by summing the expanded data values for the portion of the sample falling into the WRA.

EDITING

Reported data that were obviously incorrect due to misinterpretation of a question were either corrected or deleted prior to the computer edit. In some cases, respondents may have failed to provide all of the information requested, only indicating the presence of an item but not the amount. Imputations were made for missing data on acres irrigated, quantity of water used, method of water distribution, yield of crops harvested, maintenance and repair costs, cost of water received from off-farm water suppliers, well characteristics, and energy cost of well pumps.

QUALIFICATIONS OF THE DATA

Analysts reviewing the returned report forms and results of the computer edit detected a few inquiries that were not uniformly interpreted by all respondents. Data users should be aware that respondent interpretation of some questions may affect the final results in their use of these selected statistics. Clarification of data items with potential extortions and data impacted by unique problems or definitions are provided below.

Irrigated land - Irrigated land is defined as “all land watered by artificial or controlled means.” No attempt has been made to define the degree or intensity of irrigation. Therefore, the figures for irrigated land

include land with as little as one inch of water applied as well as land having several feet of water applied.

Nonirrigated crop yields - Data users are reminded that the nonirrigated crop yield averages in Table 27 are for nonirrigated crops harvested from farms having land irrigated and may not be comparable with crop yield averages for total farms in the State. Yields for sweet corn, tomatoes, and lettuce were asked for the first time in 2003. However, many respondents left yields blank which required a large amount of imputation and the yields that were reported for these crops covered an extremely large range indicating respondents did not always use the hundredweight unit requested on the form. Therefore it was decided that these three vegetable yields would not be published.

Estimated quantity of water applied - Most water used for irrigation is not metered or measured accurately. The quantity of water data are on the basis of best estimates provided by irrigators. Generally, in areas of water scarcity such as southern California and Arizona, irrigators are more likely to be able to provide actual quantities of water used than in Mountain States such as Montana, Wyoming, and Idaho where scarcity of water is less of a problem. In the Mountain States where water from snow-melt is diverted for use in season, the amount of water used may be a rough estimate, seldom a measured figure.

Farms using off-farm water - In 2003, respondents were asked to report the amount (none, some, all, or unknown) of off-farm water supplied by the U.S. Bureau of Reclamation, other federal agencies, and all other suppliers. However, many respondents did not answer this question. No imputation was used to determine an amount by source. Instead, the edit set the entry to unknown. The number using water from U.S. Bureau of Reclamation, other federal agencies, and all other suppliers may be understated.

Average hours of operation - The total hours a well pump operated was collected for each of the first three wells reported. For the remaining number of well pumps, respondents were asked to report the average hours the pumps operated. Some data collected in this entry exceeded 8,760 hours, the maximum number of hours in a year, meaning that some respondents had entered their total pump operating hours rather than the

average hours used. Records exceeding the 8,760 hour threshold were edited, but other records may have been tabulated with inflated operating hours.

Application of commercial fertilizers or pesticides in irrigation water - This inquiry was intended to measure the number of farms and acres on which fertilizer and pesticides were distributed through irrigation systems. The question was redesigned in 2003 to avoid the overstated farm count and acres thought to have occurred in 1998 because respondents misinterpreted the inquiry to include conventional application of fertilizer and pesticides to the irrigated crop as well. Review of the 2003 data suggests that farmers may have missed the question on the report form and left it blank. Therefore, farms and acres may be understated in 2003.

Cost of water received from off-farm water suppliers - Irrigators receiving water from off-farm water suppliers are generally required to pay for the water in charges, fees, or assessment. The computer edit procedures called for imputing an estimate for cost of water based on other reports from the same geographic area. The final tabulated results for this item may be overstated because it was not possible to distinguish cases where the respondent received free water from cases where the cost amount was omitted in error, leading to imputation of a dollar amount. States with small sample sizes, mostly in the Northeast, reported a wide range for the cost of water with data skewed to the high end which may be due to the use of expensive municipal water on small acres.

Irrigation wells - The question was intended to capture only those wells used for irrigation purposes. However, some farm operators reported wells used for domestic purposes or livestock as well. When such errors were identified, these entries were deleted.

Artesian wells - A specific entry space was provided for artesian wells. The data for well pumps exclude any pumps that may have actually been used to pump water from artesian wells.

Irrigation pumps - The inventory figures for number of irrigation pumps reported in Table 16 include reserve pumps not actually used in 2003, but exclude any pumps on wells not used in 2003. By definition,

flowing or artesian wells do not have well pumps.

Expenditures for maintenance and repair and investment in irrigation facilities and equipment -

The data reported are for expenditures that occurred only in 2003. Some respondents found it difficult to separate expenditures for maintenance and repairs from investment in irrigation facilities and equipment as defined on the report form. For example, replacement of worn-out sprinkler nozzles, pumps, and motors could be considered as either repair cost or investment in new equipment. Data users are reminded that the distinction between the two expenditure categories was left up to the respondent.

Government programs - This item shows the effect of government programs on irrigation practices.

Improvements to irrigation systems that reduce energy and/or conserve water used in irrigation -

This item shows the benefits of new resource-conserving irrigation systems. Respondents were asked to respond for the period covering 1998 to 2003. The information was tabulated as reported. No imputation was made for a blank response.

Sources of irrigation information - This question identifies where farmers look for help in making irrigation decisions. The information for this item was tabulated as reported. No imputation was made for a blank response.

Reason for discontinuance of irrigation since 2002 -

The data shown in Table 42 reflect the expansion of reported entries. Some respondents reported multiple reasons, while others gave no specific reason.

Table D. Leading Irrigation States: 2002, 1997, and 1992 Censuses

¹ 1992 data have not been adjusted for farms not on the mail list.

SUMMARY

Irrigated Crops

Compared with 1998, the number of farms and ranches irrigating fell 2 percent to 220,163 in 2003, and total land irrigated was down 3 percent to 52.6 million acres. The leading States in total acreage of irrigated land in 2003 were California (16 percent of U.S. total), Nebraska (14 percent), and Texas (9 percent). Table D shows the top twenty states from the 2002 census and their previous census acres irrigated and rank.

Corn for grain or seed continues to be the dominant irrigated crop accounting for nearly 19 percent of irrigated land. The top irrigated crops in the United States in 2003 were corn for grain or seed, alfalfa hay, soybeans, land in orchards, and cotton. These crops accounted for 56 percent of all irrigated land. Irrigated pastureland accounted for 3.63 million acres in 2003, down 8 percent from 1998.

Estimated Quantity of Water Applied

The total quantity of water applied in 2003 was down 11 percent from 1998. Nationally, irrigators estimated a total of 86.9 million acre-feet of water was applied to the 52.6 million acres irrigated in 2003 for an average of 1.7 acre-feet per acre irrigated. Table E shows the average acre-feet of water applied per irrigated acre in the U.S. over the last 29 years. The average amount of water applied per acre in 2003 ranged from a high of 5.6 acre-feet in Massachusetts, to a low of 0.4 acre-feet in several States.

Table E. Average Acre-Feet of Water Applied: 2003 and Earlier Surveys and 1974 Census

Year and source	Amount applied (acre-feet)
2003 Farm and Ranch Irrigation Survey	1.65
1998 Farm and Ranch Irrigation Survey	1.79
1994 Farm and Ranch Irrigation Survey	1.72
1988 Farm and Ranch Irrigation Survey	1.82
1984 Farm and Ranch Irrigation Survey	1.8
1979 Farm and Ranch Irrigation Survey	1.86
1974 Census of Agriculture	2.09

Method of Irrigation

In 2003, farmers and ranchers irrigated 52.6 million acres by different water distribution systems. Of the total acres irrigated, 26.9 million acres were irrigated by sprinkler systems and 23.1 million acres by gravity flow systems. For the first time, the Farm and Ranch Irrigation Survey shows more acres irrigated with sprinkler systems than gravity flow systems.

Sprinkler systems were used on 51 percent of the total land irrigated in 2003 compared with 46 percent in 1998, 46 percent in 1994, and 40 percent in 1988. Gravity flow systems were used on 43 percent of the land in 2003, compared with 50 percent in 1998, 50 percent in 1994, and 59 percent in 1988. Table F shows acres irrigated by method in 2003 and 1998.

Table F. Acres Irrigated by Method of Irrigation: 2003 and 1998 Surveys

Method	1998 acres irrigated	2003 acres irrigated	Percent change
Sprinklers	24,865,142	26,937,835	+ 8.3
Center pivot - low pressure	9,292,022	9,696,930	+ 4.4
Center pivot - medium pressure	7,419,409	9,657,353	+30.2
Center pivot - high pressure	1,983,869	1,938,808	- 2.3
Linear move towers	284,756	344,162	+20.9
Solid set and permanent	1,222,683	1,177,953	- 3.7
Side roll	2,033,825	1,825,901	-10.3
Big gun or traveller	765,794	633,188	-17.3
Hand move	1,862,784	1,663,540	-10.7
Gravity flow	27,273,419	23,124,131	-15.2
Down rows or furrows	14,025,125	11,723,084	-16.4
Controlled flooding	8,472,646	8,847,392	+ 4.4
Uncontrolled flooding	3,273,796	2,297,956	-29.8
Other gravity	1,501,852	255,699	-83.0
Drip, trickle, or low-flow	2,259,176	2,988,101	+32.3
Subirrigation	549,655	279,522	- 49.2

Data tabulations for farms having only one of the four kinds of distribution systems - sprinklers, gravity, drip, or subirrigation - show noticeable differences in the amount of water applied per acre by each system. For example, farms using only sprinkler systems applied 1.3 acre-feet per acre irrigated, compared with 2.0 acre-feet for farms using only gravity flow systems.

Source of Water

Of the 52.6 million acres irrigated by water from all sources in 2003, about 32.3 million acres (61 percent) were irrigated from farm irrigation wells, 7.28 million acres (13 percent) from on-farm surface sources, and 13.9 million acres (26 percent) from off-farm water suppliers. Of the 86.9 million acre-feet of water estimated to be used for irrigation in 2003, 43.5 million were pumped from wells, 11.8 million were provided by on-farm surface sources, and 31.6 million came from off-farm water suppliers. Table G shows how these data correspond to previous farm and ranch irrigation surveys.

Table G. Irrigation Water Used by Source: 2003 and Earlier Surveys

Source	2003	1998	1994	1988	1984
Total:					
Acre-feet (million)	86.9	97.3	79.6	84.1	82.7
Wells:					
Acre-feet (million)	43.5	43.8	39.4	40.5	36.2
Percent	50	45	49	48	44
On-farm:					
Acre-feet (million)	11.8	11.9	8.6	8.9	10.2
Percent	14	12	11	11	12
Off-farm:					
Acre-feet (million)	31.6	41.5	31.6	34.9	36.2
Percent	36	43	40	41	44

The average amount of water applied per acre varies significantly by source. Land irrigated from wells only averaged 1.2 acre-feet per acre, while land irrigated from off-farm water suppliers averaged 2.3 acre-feet per acre. Sprinkler irrigation is more closely related to the distribution of well water, while gravity flow systems are generally used to distribute water from off-farm water suppliers.

Irrigation Wells

There were 401,193 irrigation wells capable of being used on 104,776 farms. Of these, 375,851 wells were actually pumped in 2003 and 3,823 were artesian or free flowing. All irrigation wells supplied 43.5 million acre-feet of water to 32.3 million acres of land,

averaging 1.35 acre-feet of water applied and 85.2 acres irrigated per well. Farms with wells used in 2003 averaged 3.6 wells per farm. Nearly 66 percent of the farms using wells in 2003 used one or two wells. However, the majority of wells used, 229,626, were on the 18,618 farms using more than five wells, indicating the impact of the large irrigators. Pumped wells for the United States averaged 238 feet in well depth, 158 feet in pumping depth, 819 gallons per minute in pumping capacity, and 1,039 hours in operation.

Irrigation Expenditures

Pumping costs - There were 497,443 irrigation pumps of all kinds used on 153,117 farms in 2003 irrigating 42.9 million acres of land. These pumps were powered by fuels and electricity costing irrigators a total of \$1.55 billion or an average of \$10,135 per farm. The principal energy source used was electricity, for which \$953 million was spent to power 319,102 pumps that irrigated 24.1 million acres at an average cost of \$39.50 per acre. Solar energy was reported as the source for pumping wells on 360 farms irrigating 16,430 acres.

Cost of water from off-farm water suppliers - The 31.6 million acre-feet of water received from off-farm water suppliers to irrigate 13.9 million acres cost irrigators \$579 million, for an average cost of \$18.29 per acre-foot of water or \$41.73 per acre irrigated. There were 20,349 farms receiving off-farm water at no cost.

Maintenance and repair cost - Expenditures for maintenance and repairs totaled \$492 million on 119,952 farms, for an average of \$4,099 per farm.

Expenses for hired and contract labor - In 2003, 62,260 farms paid \$658 million for labor, an average of \$10,559 per farm or \$24.13 per acre. Nearly 90 percent of the wages were paid to hired laborers.

Investment in irrigation equipment, facilities, and land improvement - Investments totaled \$1.13 billion for an average of \$13,056 per farm in 2003. The

principal investment was the purchase of irrigation equipment and machinery which totaled \$817 million and represents 73 percent of total investments.

Discontinuance of Irrigation in 2003

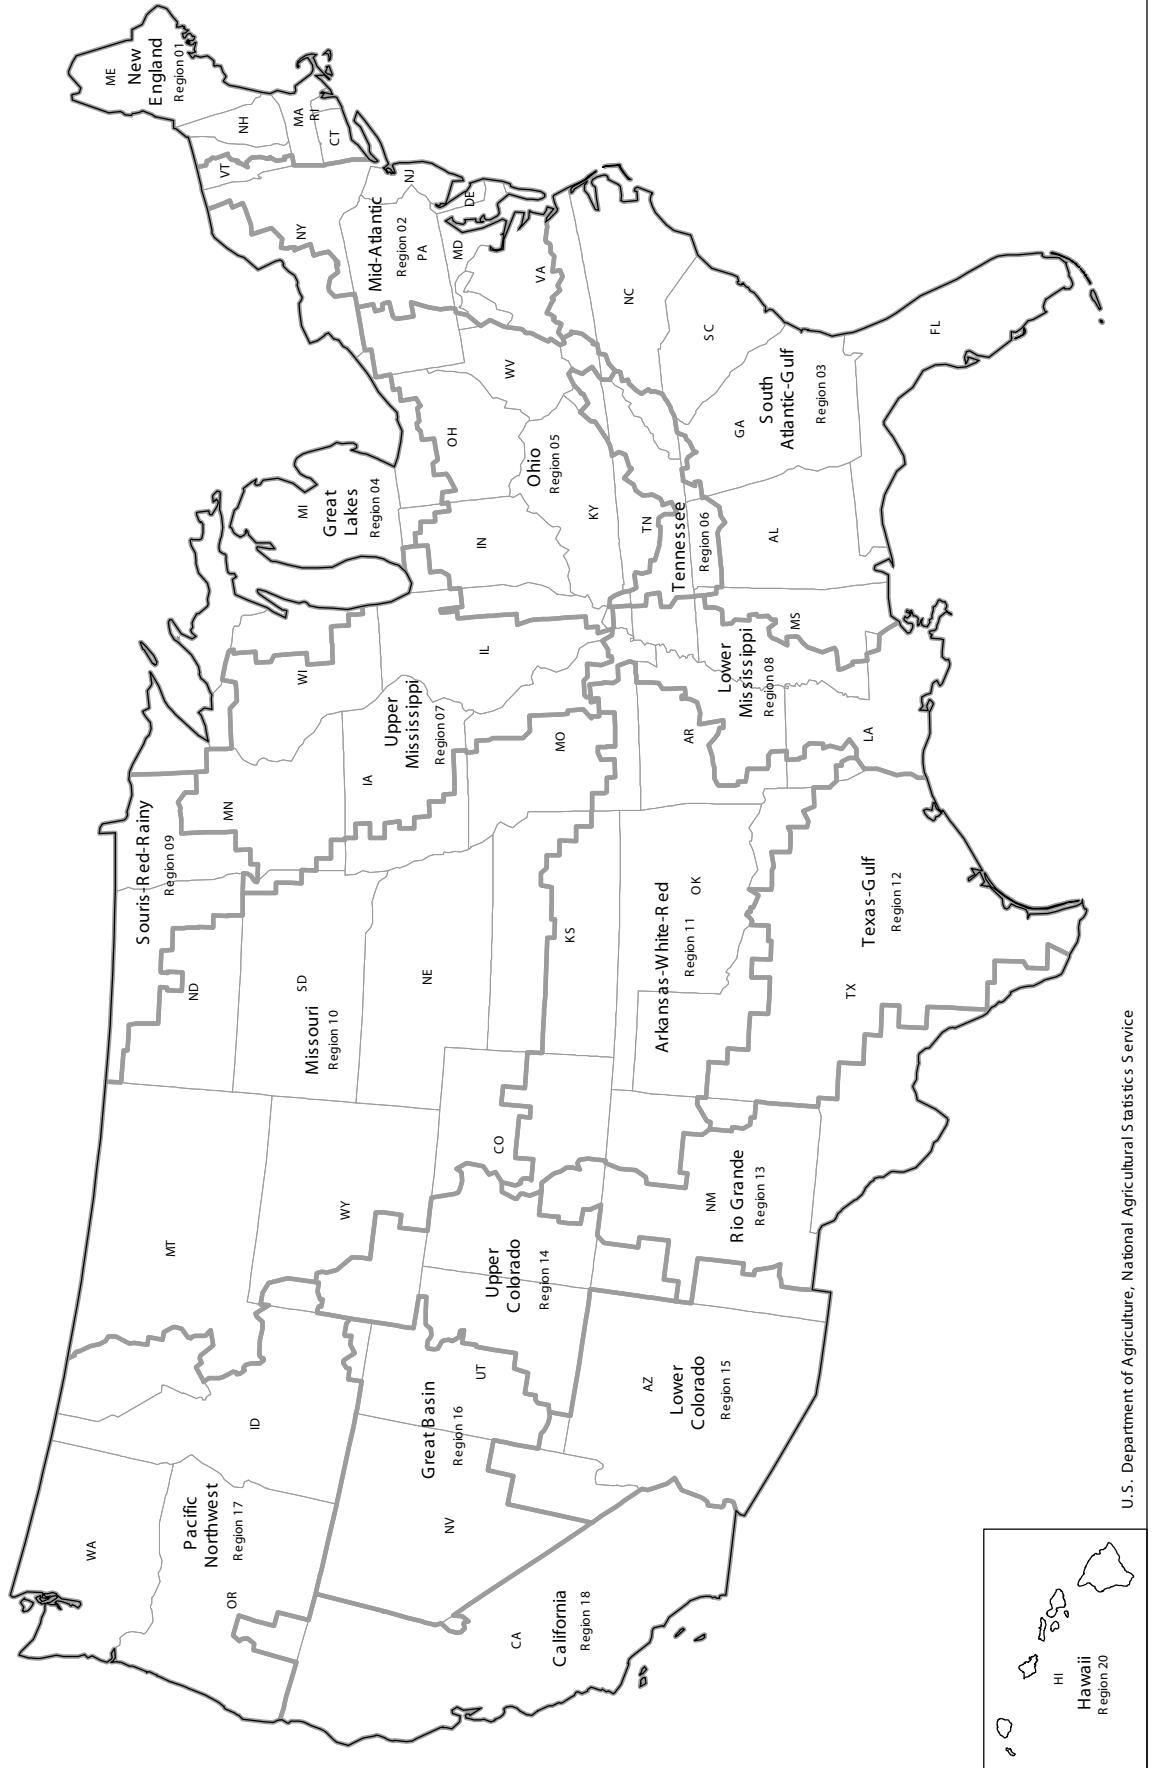

An estimated 32,489 farmers who irrigated a total of 1.85 million acres in 2002, according to the 2002 census, did not irrigate in 2003. The majority, 91 percent, of these operators reported that their discontinuance was not permanent.

Improvements to Irrigation Systems

Approximately 26.4 million acres irrigated were reported to have had improvements made on them to reduce energy use or conserve water since 1998. These improvements resulted in reduced water requirements on 18.5 million acres irrigated, improved crop yield on 18.7 million acres irrigated, and decreased energy costs on 15.3 million acres irrigated.

Water Resources Areas Map of the United States

Note: Water resource regions outline the major drainage areas of the United States. These boundaries which often split county lines are defined by the U.S. Geological Survey. For this report, the boundaries of the water resource regions have been modified to conform to the nearest county line. Regions are shown as contiguous areas for this map.

U.S. Department of Agriculture, National Agricultural Statistics Service

Percent of Normal Precipitation, Jan. - Dec. 2003

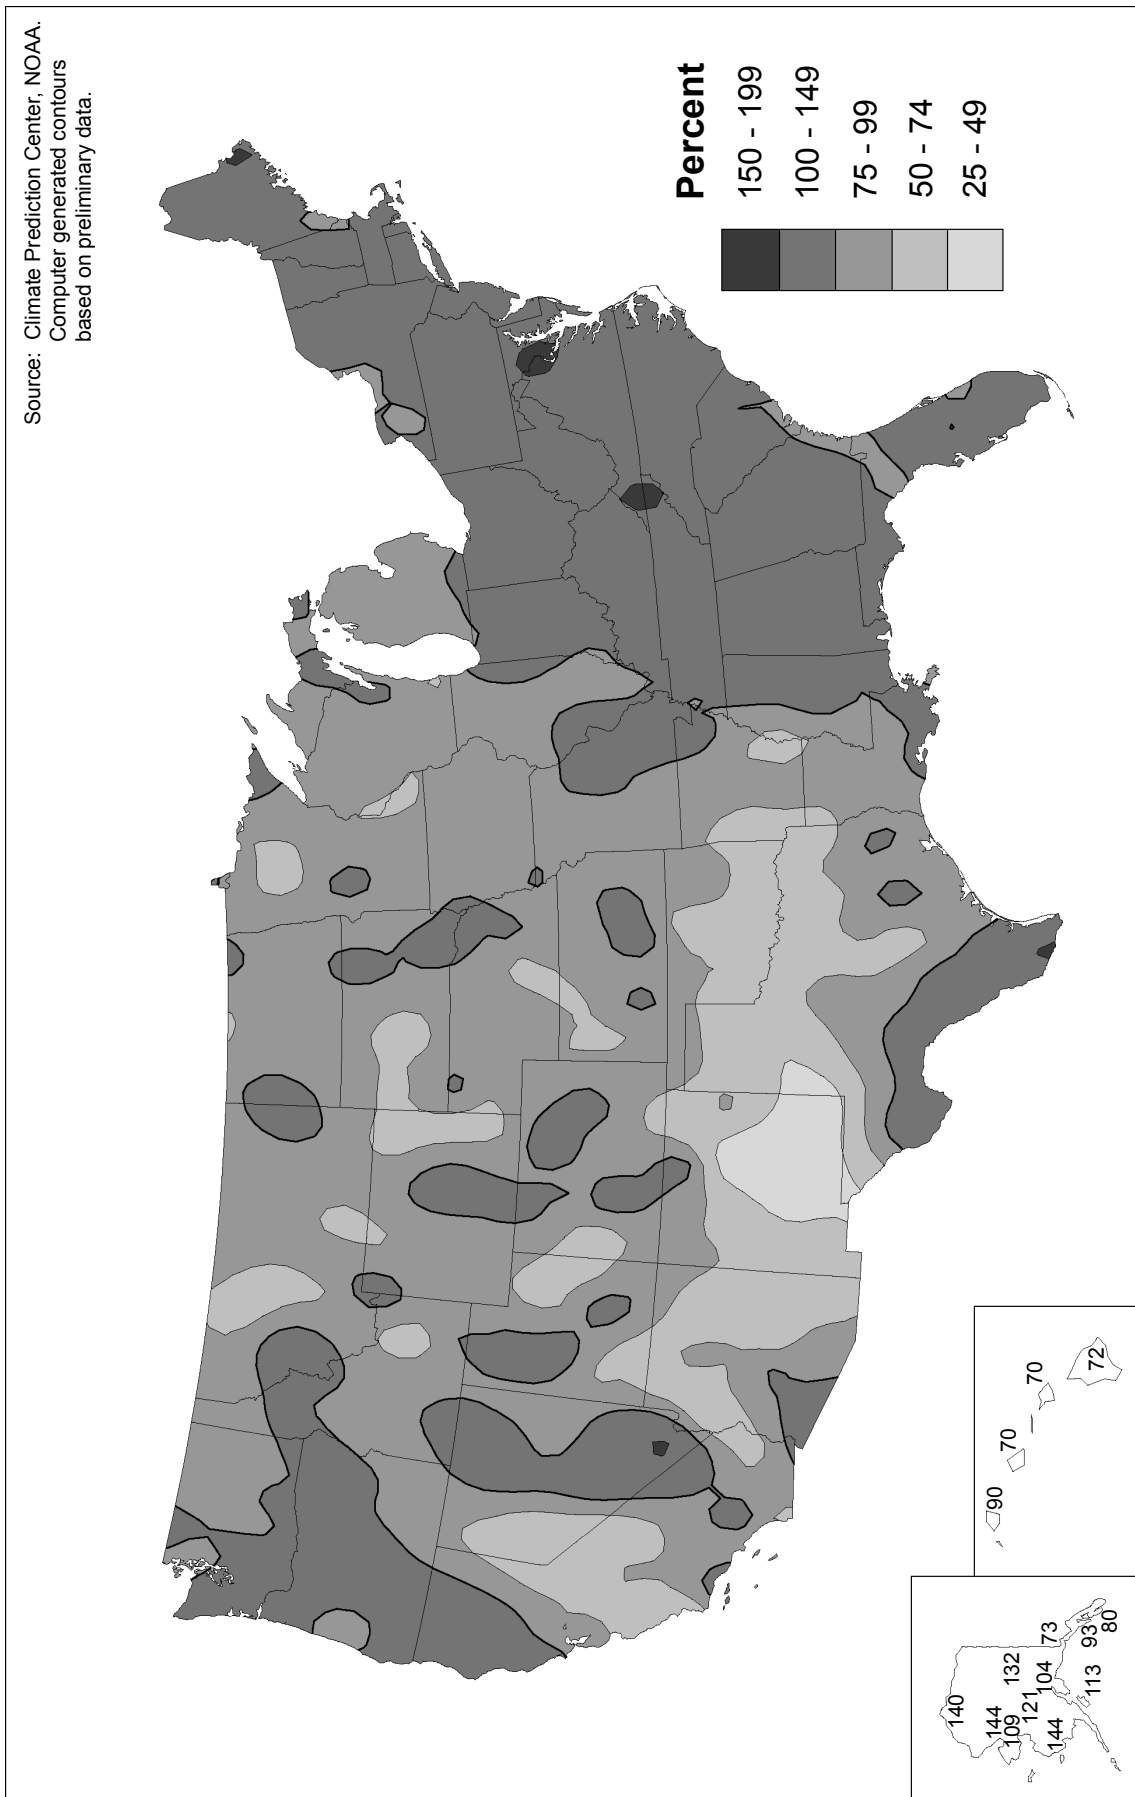

Table 1. Irrigated Farms in the Censuses of Agriculture: 2002 and Earlier Censuses

[For meaning of abbreviations and symbols, see introductory text]

¹ Increases and decreases in depth are reported over a five year period.

² Data do not include flowing or artesian wells.

³ Depth at the start of the irrigation season.

⁴ Depth to bowls or impellers.

Table 16. Characteristics for Irrigation Wells Used on Farms: 2003 and 1998

[Excludes abnormal and horticultural specialty farms. For meaning of abbreviations and symbols, see introductory text]

Geographic area	Average well depth ¹				Number of wells for farms with an average pumping depth of -					
	For all pumped wells (feet)	For farms with one well (feet)	For farms with two wells (feet)	For farms with three wells (feet)	Under 50 feet	50 to 99 feet	100 to 199 feet	200 to 299 feet	300 to 499 feet	500 feet or more

¹ Data include only well pumps for wells used.

Table 18. Irrigation Pumps on Farms for Wells: 2003 and 1998

[Excludes abnormal and horticultural specialty farms. For meaning of abbreviations and symbols, see introductory text]

Geographic area	Farms	Pumps ¹	Average pumping capacity (see text) for -				Well pumps with average pumping capacity of -							
			All pumped wells (gpm)	Farms with one well (gpm)	Farms with two wells (gpm)	Farms with three wells (gpm)	Less than 499 gpm	500 to 749 gpm	750 to 999 gpm	1,000 to 1,499 gpm	1,500 to 1,999 gpm	2,000 or more gpm		
												Well pumps	Average gpm

¹ Includes both dry hay and haylage and greenchop yields in 2003, with no conversion to a dry weight basis made for the haylage and greenchop yields.
² Includes both dry hay and haylage, grass silage, and greenchop yields in 2003, with no conversion to a dry weight basis made for the haylage, grass silage, and greenchop yields.
³ Included in land in vegetables.

Table 28. Estimated Quantity of Water Applied and Method of Distribution by Selected Crops Harvested: 2003 and 1998

[Excludes abnormal and horticultural specialty farms. For meaning of abbreviations and symbols, see introductory text]

¹ Includes both dry hay and haylage and greenchop yields in 2003, with no conversion to a dry weight basis made for the haylage and greenchop yields.
² Includes both dry hay and haylage, grass silage, and greenchop yields in 2003, with no conversion to a dry weight basis made for the haylage, grass silage, and greenchop yields.
³ Included in land in vegetables.

¹ Respondents could choose more than one improvement project.

² Acres irrigated and acre-feet applied are totals for all irrigation on these farms and not the amounts conserved as a result of the conservation improvement.

Table 40. Barriers to Making Improvements to Reduce Energy Use or Conserve Water: 2003 and 1998

[Excludes abnormal and horticultural specialty farms. For meaning of abbreviations and symbols, see introductory text]

¹ Respondents could choose more than one reason for not irrigating in 2003.

² Acres irrigated are totals for all irrigation on these farms. Data were acquired from the 2002 and 1997 Censuses of Agriculture results.

Appendix

Report Form and Instruction Sheet

The report form and instruction sheet are shown on the following pages.

NOTICE - Response to this inquiry is required by law (Title 7, U.S. Code). By the same law, YOUR REPORT IS CONFIDENTIAL and it will only be used for statistical purposes. Your report CANNOT be used for purposes of taxation, investigation, or regulation. The law also provides that copies retained in your files are immune from legal process.

2003 FARM AND RANCH IRRIGATION SURVEY

Form Number: 03-A62
(10/28/03)

**United States
Department of
Agriculture**

Please return your
completed report to:

**Census of Agriculture
1201 East 10th Street
Jeffersonville, IN 47132**

OFFICE USE ONLY

016	017	018
-----	-----	-----

USE BLUE OR BLACK BALL POINT PEN

Please make corrections to name, address, and ZIP Code if necessary.

We need to receive your report. The statistical sampling procedures we follow do not allow other farms or ranches to take your place in this survey. If you have any questions about this report call us on our toll-free number **1-888-424-7828**. If you received extra report forms for the **SAME** operation, complete one form and return **all** others in the same envelope. Thank you for taking part in this effort to improve the quality of agricultural statistics.

**National Agricultural
Statistics Service**

SECTION 1 ACREAGE IN 2003

Report land owned, rented, or used by you, your spouse, or by the partnership, corporation, or organization named on the label above.

(Include ALL LAND, REGARDLESS OF LOCATION OR USE - cropland, Conservation Reserve Program (CRP) and Wetlands Reserve Program (WRP) land, pastureland, rangeland, wasteland, woodland, idle land, farmsteads, etc. Exclude land used on a per-head or animal unit month (AUM) basis under a grazing permit.)

			NUMBER OF ACRES
1. All land owned _____ →	<input type="checkbox"/>	None 025	
2. All land rented or leased FROM OTHERS, including land worked by you on shares, used rent free, in exchange for services, payment of taxes, etc. (Include Federal, State, and railroad land leased on a per-acre basis. Exclude all land (i.e., private, Federal, State, railroad, etc.) used on a per-head or animal unit month (AUM) basis under a grazing permit.) _____ →	<input type="checkbox"/>	026 +	
3. All land rented or leased TO OTHERS, including land worked on shares by others and land subleased _____ →	<input type="checkbox"/>	027 -	
4. TOTAL ACRES IN "THIS OPERATION" - (Items 1 + 2 - 3 = 4) _____ →	<input type="checkbox"/>	028 =	

PENALTY FOR FAILURE TO REPORT

062018

SECTION 2 LAND USED IN 2003

Distribute all acres in "THIS OPERATION" in column 1. Distribute all irrigated land in "THIS OPERATION" in column 2, items 1 through 4. If the same land had more than one use in 2003, report that land only once in the first use listed below that applies.

For column 2, in addition to fully irrigated land, report as irrigated any land to which partial, supplemental, or semi-irrigation was applied. Also include any acreage which received only preplant irrigation (watered before planting). Hayland, pastureland or rangeland should be reported as irrigated if spring flood water was spread by canals, ditches, spreader dikes, pipes, or other works.

<p>1. Cropland - Report acres only once in one of the following categories</p> <p>a. Cropland harvested - Include all land from which crops were harvested or hay was cut, and all land in orchards, citrus groves, and vineyards →</p> <p>b. Cropland used only for pasture or grazing - Include rotation pasture and grazing land that could have been used for crops without additional improvements →</p> <p>c. Other cropland - Include cropland used for cover crops, cropland on which all crops failed, cropland in cultivated summer fallow, and cropland idle →</p> <p>2. Woodland - Include woodland pastured and woodland not pastured →</p> <p>3. Other pastured land and rangeland - Include any pastured land other than cropland and woodland pastured →</p> <p>4. All other land - Include any land not reported above. Include land in farmsteads, buildings, livestock facilities, ponds, roads, wasteland, etc. →</p> <p>5. TOTAL ACRES - ADD acres in each column and enter the totals. (Column 1 total should be equal to item 4 in section 1.) →</p>	<p>None</p> <p>029</p> <p>031</p> <p>033</p> <p>035</p> <p>037</p> <p>039</p> <p>041</p>	<p>Column 1 TOTAL ACRES</p> <table border="1" style="width: 100%; height: 100px;"> <tr><td style="width: 25px;"> </td><td style="width: 25px;"> </td><td style="width: 25px;"> </td><td style="width: 25px;"> </td></tr> </table>					<p>None</p> <p>030</p> <p>032</p> <p>034</p> <p>038</p> <p>042</p>	<p>Column 2 ACRES IRRIGATED</p> <table border="1" style="width: 100%; height: 100px;"> <tr><td style="width: 25px;"> </td><td style="width: 25px;"> </td><td style="width: 25px;"> </td><td style="width: 25px;"> </td></tr> </table>				
		"THIS OPERATION"	IRRIGATED									

NOTE: If the total irrigated acres in column 2, item 5 is '0', go to section 20.

6. For "THIS OPERATION" what county and state had the most irrigated acres?

County Name	State
950 <table border="1" style="width: 100%; height: 20px;"></table>	951 <table border="1" style="width: 100%; height: 20px;"></table>

SECTION 3 GOVERNMENT PROGRAMS

1. During 2003, did you receive direct payments, counter-cyclical payments, loan deficiency payments, marketing loans, or participate in any quota programs or any buy-out programs?

691 1 **Yes** 2 **No**

2. In the past 5 years have you received cost-share payments for irrigation or drainage improvements from any of the following organizations?

795 1 **Yes - Continue** 2 **No - Go to section 4**

a. Mark (X) all that apply. ↗

- 698 1 **USDA - Environmental Quality Incentive Program (EQIP)**
- 2 **Non-USDA Federal programs - Include EPA, Bureau of Reclamation, or other programs**
- 3 **State programs, local water management or supply district programs**
- 4 **Other - Specify** →

062026

FORM 03-A62 (10-28-03)

SECTION 4 METHOD OF WATER DISTRIBUTION IN 2003

Report acres irrigated by each type of ON FIELD distribution or delivery system listed below. If same land was irrigated by more than one method of distribution, report acres irrigated by each method used.

DO NOT report information for the delivery system used to convey water from the source to the field, only report information for the FIELD distribution system.

1. GRAVITY IRRIGATION

- a. Down rows or furrows → **None**
- b. Controlled flooding (between borders or within basins) →
- c. Uncontrolled flooding (rangeland, pastureland, etc.) →
- d. Other →

ACRES IRRIGATED BY GRAVITY SYSTEM (FIELD WATER CONVEYANCE METHOD)					
TOTAL	OPEN UN-LINED DITCH	OPEN LINED DITCH	POLY TUBING (or other single-year-use, lay-flat tubing)	ABOVE-GROUND PIPE (except poly-tubing) ^{1/}	UNDER-GROUND PIPE ^{2/}
855	859	857	056	057	858
865	869	867	066	067	868
875	879	877	076	077	878
885	889	887	086	087	888

1/ Includes gated-pipe, and riser or hydrant systems connected to above ground pipe.
2/ Includes riser or hydrant systems connected to underground pipe.

2. SPRINKLER IRRIGATION - Inlet pressure

- a. Center pivot systems (circle) → **None**
- b. Linear move tower systems (and other linear continuous move drive systems) →
- c. Solid set and permanent systems (except low-flow micro systems) →
- d. Mechanical move systems -
 - (1) Side roll, wheel move, or other mechanical move systems (and other discrete move systems) →
 - (2) Big Gun or Traveller systems →
- e. Hand move systems →

ACRES IRRIGATED BY SPRINKLER SYSTEMS			
VERY LOW PRESSURE (UNDER 15 PSI)	LOW PRESSURE (15 TO 29 PSI)	MEDIUM PRESSURE (30 TO 59 PSI)	HIGH PRESSURE (60 PSI OR MORE)
569	576	575	570
571	577	578	579
568	565	566	567

3. DRIP, TRICKLE OR LOW-FLOW MICRO IRRIGATION (except poly and lay-flat tubing)

- a. Surface drip (on or above ground) → **None**
- b. Sub-surface drip (root zone) →
- c. Low-flow micro sprinklers (sprays) (apply water at low pressure and are not self-propelled or easily moved) →

4. SUB-IRRIGATION - Water seepage, or use of a drainage system to maintain aquifer water table at a predetermined depth (Exclude methods reported above)

- **None**

ACRES IRRIGATED (ALL PRESSURES)
240
241
242
ACRES IRRIGATED (ALL PRESSURES)
248
246
247
ACRES IRRIGATED
249

SECTION 5 ACRES IRRIGATED and ESTIMATED QUANTITY OF WATER USED ON "THIS OPERATION" BY SOURCE IN 2003

Report quantity of water in the unit or units of measure most convenient for you. If measurements are not available, give your best estimate for quantity of water used. If average acre-feet cannot be estimated, give combined pumping capacity and duration in days, or total depth of water applied, or in flow quantities and duration of flow in days.

1. **ACRES IRRIGATED** (Include cropland and pastureland.) →
2. **ESTIMATED QUANTITY OF WATER USED ON "THIS OPERATION" IN 2003** (Report for only one of the following options items a through e, in the unit most convenient for you.)
 - a. Total acre feet (If total feet is reported, go to item 3) →
 - or
 - b. Average acre-feet per acre irrigated (One acre foot covers one acre one foot deep) →
 - or
 - c. Average inches applied per acre →
 - or
 - d. { Average gallons of water applied per minute (GPM) →
 - { Total number of 24-hour day equivalents water was applied →
 - or
 - e. { Average flow in cubic feet per second (CFS) →
 - { Total number of 24-hour day equivalents water flow was applied →

BY WATER SOURCE

062042

FORM 03-A62 (10-28-03)

SECTION 6 WATER TRANSFERS IN 2003

Water leased or rented on an annual or multi-year basis for use off your farm when the permanent right to the water is maintained by the operator. **Include** water rented or leased directly by your operation or your irrigation provider.

1. In 2003, did you rent or lease water to others for use off your farm?
(*Include both agricultural and non-agricultural purposes.*)

531 1 **Yes - Continue** 2 **No - Go to section 7**

2. Report quantity of water transferred to others in 2003 -

- a. Ground water from on-farm wells None
- b. Surface water from on-farm sources None
- c. Water normally received from an off-farm supplier None

WATER QUANTITY ACRE - FEET	
532	
533	
534	

3. Report recipients or uses of transferred water - *Check all that apply.*

- 535 1 Other agricultural producers
 - 2 Municipal or industrial water users
 - 3 Environmental uses (*water quality, instream flow, habitat improvement*)
 - 4 Unknown use of transferred water - (*if unknown, check item a or b below*)
- 536 1 a. Water was part of a pool used for several purposes
- 2 b. Water rented or leased was arranged by your irrigation provider

SECTION 7 EXPENDITURES for IRRIGATION FACILITIES and EQUIPMENT ON "THIS OPERATION" IN 2003

Report expenditures made and sources of funding assistance in 2003 for the construction of irrigation facilities and purchase of irrigation equipment and machinery on "THIS OPERATION". **Include** estimates of expenditures made or shared with others (*landlords, government agencies, including programs such as Environmental Quality Incentive Program (EQIP), etc.*). **Report the cost of maintenance and repairs in section 13.**

	TOTAL EXPENDITURES DOLLARS	PRINCIPAL PURPOSE OF EXPENDITURES Mark (X) only one	PRIMARY SOURCE OF FUNDING ASSISTANCE Mark (X) only one
1. Purchase of new or replacement irrigation equipment and machinery (<i>Include sprinklers, pipes, siphons, nozzles, pumps, motors, engines, etc., at net cost. DO NOT include computers.</i>) <input type="checkbox"/> None	511 \$.00	512 1 <input type="checkbox"/> Replacement 2 <input type="checkbox"/> Water Conservation 3 <input type="checkbox"/> New Expansion	513 1 <input type="checkbox"/> EQIP cost share program 2 <input type="checkbox"/> Other USDA cost share programs 3 <input type="checkbox"/> Other public cost share programs 4 <input type="checkbox"/> No public funding
2. New well construction or deepening of existing wells (<i>Include drilling costs, cost of casing, and any costs to prepare well for installation of pump. DO NOT include cost of pumps or motors.</i>) <input type="checkbox"/> None	515 \$.00	516 1 <input type="checkbox"/> Replacement 2 <input type="checkbox"/> Water Conservation 3 <input type="checkbox"/> New Expansion	517 1 <input type="checkbox"/> EQIP cost share program 2 <input type="checkbox"/> Other USDA cost share programs 3 <input type="checkbox"/> Other public cost share programs 4 <input type="checkbox"/> No public funding
3. Construction or improvement of permanent storage and distribution systems (dams, ponds, reservoirs, permanent ditches, canals, flumes, etc.) <input type="checkbox"/> None	519 \$.00	520 1 <input type="checkbox"/> Replacement 2 <input type="checkbox"/> Water Conservation 3 <input type="checkbox"/> New Expansion	521 1 <input type="checkbox"/> EQIP cost share program 2 <input type="checkbox"/> Other USDA cost share programs 3 <input type="checkbox"/> Other public cost share programs 4 <input type="checkbox"/> No public funding
4. Land clearing and leveling for irrigation purposes <input type="checkbox"/> None	523 \$.00	524 1 <input type="checkbox"/> Replacement 2 <input type="checkbox"/> Water Conservation 3 <input type="checkbox"/> New Expansion	525 1 <input type="checkbox"/> EQIP cost share program 2 <input type="checkbox"/> Other USDA cost share programs 3 <input type="checkbox"/> Other public cost share programs 4 <input type="checkbox"/> No public funding
5. Computers, control panels, and software for irrigation water management <input type="checkbox"/> None	544 \$.00	545 1 <input type="checkbox"/> Replacement 2 <input type="checkbox"/> Water Conservation 3 <input type="checkbox"/> New Expansion	546 1 <input type="checkbox"/> EQIP cost share program 2 <input type="checkbox"/> Other USDA cost share programs 3 <input type="checkbox"/> Other public cost share programs 4 <input type="checkbox"/> No public funding

SECTION 2 ACRES HARVESTED and CROP YIELDS IN 2003

For each crop harvested, report separately the acreage and average yield from irrigated land and non-irrigated land.

Report harvested crops as irrigated if any water was artificially applied either before planting or during the crop growing season in 2003. Report the crop as irrigated if water was applied to supplement rainfall, even if the amount of water applied was not sufficient to obtain maximum yields.

	None	IRRIGATED CROP <i>Include preplant and supplemental or semi irrigation</i>					NON-IRRIGATED CROP			
		IRRIGATED ACRES HARVESTED	AVERAGE YIELD PER IRRIGATED ACRES HARVESTED	ESTIMATED QUANTITY OF WATER APPLIED PER ACRE AVERAGE			NON-IRRIGATED ACRES HARVESTED	AVERAGE YIELD PER NON-IRRIGATED ACRES HARVESTED		
				ACRE-FEET PER ACRE	OR	INCHES PER ACRE				
1. Corn for grain or seed <i>(Excluding popcorn and sweetcorn.)</i>	<input type="checkbox"/>	050	051	Bu.	052	or	053	054	055	Bu.

1/ Off-farm water supplies may include water purchased from the U.S. Bureau of Reclamation; a state, county, or local district; mutual, private, cooperative, or neighborhood ditches; commercial or municipal water systems.

SECTION 10 NUMBER OF IRRIGATION WELLS ON "THIS OPERATION" IN 2003, WELL DEPTH, and PUMPING CAPACITY

1. Did "THIS OPERATION" irrigate with water from wells in 2003?

760 1 Yes - Continue 2 No - Go to section 11

NUMBER OF WELLS USED
460

2. Wells used in 2003

a. For the first 3 primary wells pumped in 2003, report the following information -

Well #
1 →
2 →
3 →

Depth of well FEET	Depth to water at start of irrigation season FEET	Depth to bowls or impellers FEET	Pump capacity (Discharge from well) GPM	Operating pressure at well head PSI	Size of engine (For all motors - including electric) HP	Total hours operated (for the season)
461	462	463	464	676	761	762
465	466	467	468	677	763	764
469	470	471	472	678	765	766
Average depth of well FEET	Average depth to water at start of irrigation season FEET	Average depth to bowls or impellers FEET	Average pump capacity (Discharge from well) GPM	Average operating pressure at well head PSI	Average size of engine (For all motors - including electric) HP	Total hours operated (for the season)
481	482	483	484	681	767	768

b. Of all other wells pumped in 2003, report the average for all other wells

3. How many pumping stations (wells from item 2 above with associated piping systems) used backflow prevention devices (check valves) in 2003?

None

NUMBER
770
ACRES
771

a. In 2003, how many acres were irrigated with these wells (item 3 above)?

4. How many wells (from item 2 above) had flow meters or other flow measurement devices?

None

NUMBER OF WELLS METERED
683
ACRES
772

a. In 2003, how many acres were irrigated with these systems (item 4 above)?

5. Has the average depth to water for the wells supplying this operation changed in the last five years?

773 1 Yes - Continue 2 No - Go to item 6

a. If yes, check one below. Increased depth Decreased depth

487 1 Increased depth 2 Decreased depth

None

NUMBER
486

6. How many of the wells used in 2003 are free flowing (artesian wells)?

7. Wells not used in 2003, but capable of being used (Exclude abandoned wells.)

None

NUMBER OF WELLS NOT USED
485

062083

FORM 03-A62 (10-28-03)

SECTION 11 PUMPS, OTHER THAN WELL PUMPS, USED FOR IRRIGATION ON "THIS OPERATION" IN 2003

Report for all pumps, other than well pumps, on "THIS OPERATION" whether they are in use or not.

- 1. Tailwater pits None
- 2. Ponds, lakes, reservoirs, rivers, canals, etc. None
- 3. Relifting or boosting water within system None

Number of pumps	Vertical lift AVG. FEET	Discharge capacity AVG. GPM	Discharge operating pressure AVG. PSI
490	774	491	687
492	775	493	688
494	776	777	778

SECTION 12 ENERGY USE ON "THIS OPERATION" IN 2003 FOR PUMPING IRRIGATION WATER

Report for all fuel and power used in 2003 for irrigation pumping on "THIS OPERATION". Include in the cost figures any additional charges such as the "fuel adjustment charge" or any other type of additional charge which is based on the amount of power or fuel purchased. Include landlord's share.

- 1. Electricity None
- 2. Natural gas None
- 3. LP gas, propane, or butane None
- 4. Diesel fuel None
- 5. Gasoline and gasohol None
- 6. Solar and other renewable None

Number of wells or pumps powered by type of energy used	Total cost of energy used Dollars	Acres irrigated by water source	
		Water from wells 1/	Surface water 2/
495	496 \$.00	497	781
498	499 \$.00	500	782
501	502 \$.00	503	783
504	505 \$.00	506	784
507	508 \$.00	509	785
779		780	786

1/ Include only acres for wells reported in section 10, item 2.
2/ Include only acres for pumps reported in section 11.

SECTION 13 IRRIGATION MAINTENANCE and REPAIR COSTS FOR IRRIGATION EQUIPMENT and FACILITIES ON "THIS OPERATION" IN 2003

Report all expenses in 2003 for keeping irrigation equipment and facilities in working order. Include expenses for tune-ups, oil changes, and repairs to pumps, motors, pipes, canals, sprinkler systems, ditch and canal cleanout, etc. (Exclude construction or improvement costs reported in section 7.)

- 1. Amount spent for maintenance and repairs of irrigation equipment and facilities in 2003 including maintenance of on-farm ditches (Include payments made by landlord's - Give estimate if actual figures are unavailable.) None

DOLLARS	
510	
\$.00

SECTION 14 LABOR COSTS FOR IRRIGATION ACTIVITIES ON "THIS OPERATION" IN 2003

(Include gross cash payments to employees, including family members, before deductions for social security, taxes, insurance premiums, etc. and payments for contract labor. Exclude customwork.)

- 1. Cash wages paid for -
 - a. Hired irrigation labor None
 - b. Contract irrigation labor None

DOLLARS	
787	
\$.00
788	
\$.00

SECTION 15 IRRIGATION PRACTICES IN 2003

1. How did you decide when to schedule water use in 2003? Mark (X) all that apply.

- 527
- 1 Condition of crop (*observation*)
 - 2 Feel of the soil
 - 3 Use of soil moisture sensing devices such as moisture blocks or tensiometers
 - 4 Use of plant moisture sensing devices such as pressure (*chamber*) bombs or infrared (IR) thermometer
 - 5 Use of irrigation scheduling service (including commercial and government)
 - 6 Reports on daily crop-water evapo-transpiration (ET) use (*Internet, newspapers, radio, TV, fax and email*)
 - 7 Water delivered by irrigation organization in turn (no choice by water user)
 - 8 Personal calendar schedule
 - 9 Computer simulation models (*not from a commercial service*)
 - 10 When neighbors begin to irrigate
 - 11 Other - *Specify* _____

2. Did you have to discontinue irrigation during 2003 long enough to affect crop yields?

- 669
- 1 **Yes - Continue** 2 **No - Go to section 16**

a. Mark (X) all that apply.

- 670
- 1 Shortage of surface water (*water from reservoirs, lakes, streams, water supply organizations, etc.*)
 - 2 Shortage of ground water (*lowering water level of wells or depletion of ground water*)
 - 3 Irrigation equipment failure
 - 4 Energy price increases or energy shortage
 - 5 Poor water quality
 - 6 Loss of water rights not due to voluntary transfers
 - 7 Cost of purchased water
 - 8 Other - *Specify* _____

SECTION 16 OTHER USES OF IRRIGATION WATER ON "THIS OPERATION" IN 2003

1. Report irrigation used for any of the following purposes -

- a. Prevent freeze damage _____
- b. Crop cooling to delay early budding, blooming, or to reduce heat stress (*cool crop canopy*) _____
- c. Leaching to remove salts from the soil (*salinity control*) _____
- d. Disposal of liquid livestock waste _____
- e. To provide wildlife or waterfowl habitat _____
- f. Other - *Specify* _____

FORM 03-A62 (10-28-03)

SECTION 17 WATER MANAGEMENT PRACTICES FOR OPERATORS USING GRAVITY IRRIGATION SYSTEMS

1. Did you use gravity irrigation systems to irrigate any land in 2003 (acres reported in section 4, item 1)?

671 1 Yes - Continue 2 No - Go to section 18

2. On how many acres did you use the following techniques?

- a. Irrigation water captured for further use (tailwater pits) _____ →
- b. Water restricted from running off by diking end of field _____ →
- c. Surge flow or cablegation technique _____ →
- d. Shortening of furrow length _____ →
- e. Limited irrigation set time or number of irrigations, to reduce water applied _____ →
- f. Alternate row irrigation _____ →
- g. Water-soluble polyacrylamide (PAM) _____ →
- h. Mulch or other types of row covers _____ →
- i. Gravity system with laser leveling _____ →
- j. Special furrowing techniques, such as wide-spaced bed furrowing, compacted furrowing, or furrow diking
Specify technique used _____ →

None	NUMBER OF ACRES

SECTION 18 IMPROVEMENTS TO IRRIGATION SYSTEMS THAT REDUCE ENERGY and/or CONSERVE WATER

Consider as an improvement changes in equipment or management practices.
For example - retrofitting a sprinkler system for low pressure operation or adopting irrigation scheduling as a management practice.

1. Have you implemented improvements to your irrigation system on existing irrigated acres since 1998?

693 1 Yes - Continue 2 No - Go to item 3

2. What were the results of these improvements on a per acre basis? - Mark (X) all that apply.

- 694
- 1 Improved crop yield or quality
 - 2 Reduced energy costs
 - 3 Reduced water applied
 - 4 Reduced labor costs
 - 5 Reduced fertilizer or pesticide losses
 - 6 Reduced soil erosion
 - 7 Reduced tailwater
 - 8 None of the above

3. What are barriers to implementing improvements that might reduce energy and/or conserve water in your irrigation system? - Mark (X) all that apply.

- 695
- 1 Investigating improvements not a priority at this time
 - 2 Risk of reduced yield or poorer quality crop yields from not meeting water needs
 - 3 Physical field/crop conditions limit system improvements
 - 4 Improvement(s) will reduce costs, but not enough to cover installation costs
 - 5 Can not finance improvements
 - 6 Landlord(s) will not share cost of improvements
 - 7 Uncertainty about future availability of water
 - 8 Will not be farming this operation long enough to justify new improvements
 - 9 Other - Specify _____

SECTION 19 SOURCES OF IRRIGATION INFORMATION

1. What are the sources of information that you rely on for guidance in reducing irrigation costs or to conserve water used for irrigation? - Mark (X) all that apply, then go to section 21.

- 696 1 Extension agents or university specialists
- 2 Private irrigation specialists or crop consultants hired by owner or operator
- 3 Irrigation equipment dealers
- 4 Local irrigation district employees or others hired by the water supplier
- 5 Government specialists from the Natural Resources Conservation Service, Local Conservation District, Bureau of Reclamation or other Federal and State agencies
- 6 Media reports or information in the press
- 7 Neighboring farmers
- 8 Electronic information services (World Wide Web, DTN, Internet links to private or public data sources, etc.)
- 9 Other - Specify _____

SECTION 20 IRRIGATED LAND IN 2002 - DO NOT answer this section if you irrigated ANY land in 2003, go to section 21

1. Was any land irrigated on "THIS OPERATION" in 2002?

- 528 1 Yes - Continue 2 No - Go to section 21

2. Reasons for not irrigating in 2003 - Mark (X) all that apply.

- 529 1 Sufficient soil moisture - no irrigation needed
- 2 Shortage of surface water (water from reservoirs, lakes, streams, water supply organizations, etc.)
- 3 Shortage of ground water (lowering water level of wells or depletion of ground water)
- 4 Irrigation uneconomical due to high fuel and power costs and/or low commodity prices
- 5 Abandoned irrigation because of land degradation (soil erosion, soil salinity, etc.)
- 6 Loss of water rights (not due to voluntary transfers)
- 7 Sold or leased water rights or annual water allocation
- 8 Converted to non-agricultural use
- 9 Converted to an agricultural enterprise not requiring irrigation
- 10 Available surface water too salty due to drought conditions
- 11 Other - Specify _____

3. Do you consider your discontinuance of irrigation to be permanent?

- 530 1 Yes 2 No

SECTION 21 VALUE OF SALES

1. What was the total value of sales for both crops and livestock produced and sold from "THIS OPERATION" in 2003? Check only one below.

- 980 1 \$0 - \$24,999 2 \$25,000 - \$49,999 3 \$50,000 - \$99,999 4 \$100,000 - \$249,999
- 5 \$250,000 - \$499,999 6 \$500,000 - \$999,999 7 \$1,000,000 and over

2. What percent of total farm sales were from irrigated crop sales? _____ →
3. What percent of total farm sales were from livestock sales? _____ →

PERCENT
981
982

SECTION 22 PERSON COMPLETING THIS FORM - Please print

Name _____	Date _____	Telephone with Area Code _____
------------	------------	--------------------------------

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The time required to complete this information collection is estimated to average 30 to 60 minutes per response.

Do You Need Help? Do not hesitate to contact the National Agricultural Statistics Service if you need more help. Please use our Toll Free number 1-888-424-7828. **We Thank You Very Much for the prompt return of your completed survey.**

Would you like to receive a summary of the results of this survey in the mail? _____ →

Results will also be available on the Internet at <http://www.usda.gov/nass/>, in the fall of 2004.

FORM 03-A62 (10-28-03)

INSTRUCTION SHEET 2003 FARM AND RANCH IRRIGATION SURVEY

Completing the 2003 Farm and Ranch Irrigation report form

Please use a blue or black ballpoint pen.

Instructions by Section

Section 1 - Acreage in 2003

Report land owned, rented, or used by the respondent, spouse, partnership, corporation, or organization identified on the questionnaire. **Include** all land, regardless of location or use, Conservation Reserve Program (CRP) and Wetlands Reserve Program (WRP) land cropland, pastureland, rangeland, woodland, idle land, house lots, etc. **Exclude** land used under grazing permit. All responses should be rounded to whole acres. If you have an operation that is less than one acre, report it as a whole acre.

Item 1 - All land owned - land owned by the operation. Be sure to include all separate fields, and tracts of cropland, pastureland, woodland, wasteland, idle land, farmsteads, etc.

Item 2 - All land rented or leased from others - includes land worked by the respondent on shares, used rent free, in exchange for services, for taxes, etc. even if used for part of the year. Includes federal, state, and railroad land that is not BLM permit land. Do not include land used on a per head basis under a grazing permit. Include all land rented or leased from others regardless of location.

Item 3 - All land rented or leased to others - include land rented or leased to others for cash or for a share of the crops, whether the person whose name appears on the label owned the land himself/herself or rented the land and subleased it to others.

Item 4 - Total acres in this operation - should equal items 1 + 2 - 3. All answers to this questionnaire should refer only to the acres included as **this operation**. It is important to get this number correct as it is used in editing to establish consistency throughout the questionnaire. The acreage of **this operation** should equal Section 2, item 5 (column 1).

Section 2 - Land used in 2003

Distribute all acres in **this operation** in column 1 and all irrigated land in **this operation** in column 2, items 1 through 4. If the same land had more than one use in 2003, report that land only once in the first use listed that applies.

In addition to fully irrigated land, report as irrigated any land to which partial, supplemental, or semi-irrigation was applied. Also include any acreage which received only preplant irrigation (watered before planting). Hayland, pastureland or rangeland should be reported as irrigated if spring flood water was spread by canals, ditches, spreader dikes, pipes, or other water works.

Conservation Reserve Program (CRP) land should be reported where it best fits into a use for that year. If you were allowed to cut CRP land for hay, then this land should be considered cropland harvested. If it was pastured, it is cropland used for pasture. Except for emergency uses, almost all CRP should be reported in item 1c as other cropland.

Item 1a - Cropland harvested - Land from which hay was cut and land in groves and orchards should be reported as cropland harvested. If you did not double crop then item code 029 should equal the sum of acres across crops harvested, while item code 030 should equal irrigated cropland acres.

If you did double crop, all or part of your crop acreage, the sum of acres for crops harvested and irrigated crops harvested will exceed item codes 029 and 030, respectively.

For winter wheat, report the 2003 acres harvested.

Item 1b - Cropland used only for pasture or grazing - include rotation pasture and grazing land that could have been used for crops without additional improvements. **Exclude** land used under a grazing permit.

Item 1c - Other cropland - include cropland used for cover crops, cropland on which all crops failed, cropland in summer fallow, idle cropland, and cropland diverted for government programs (including CRP unless used for hay or forage or pasture). Most CRP land should be reported here in item 1c, but CRP land cut for hay or forage should be in item 1a, and CRP land that was pastured should be reported in item 1b. CRP land should be reported only once.

Some crops require more than one growing year and are not harvested during the period covered by the survey. These may include crops such as sugarcane and pineapples. Land on which a crop is being grown, but which has not been harvested, (other than short rotation woody crops) is reported as other cropland, item 1c.

Item 2 - Woodland - Short rotation woody crops are to be reported as cropland harvested regardless if the trees were cut or not and should not be reported here. Do report both woodland pastured and woodland not pastured.

Item 3 - Other pastured land and rangeland - include any pastured land other than cropland and woodland pastured. Most BLM lease land goes into this category. BLM or Forest Service land used on an AJM or fee per head basis will not be included. This is where large acreage of unallocated land should go.

Item 4 - All other land - any land that does not fit into one of the above categories. This could be roads, buildings, farmsteads, wasteland etc.

Item 5 - Total acres - this should equal the sum of all land uses listed above (in items 1-4). Also, acres in **this operation** should equal acres in Section 1, item 4.

Anyone who irrigated any land in 2003 should complete the whole report form. Anyone who did not irrigate any land in 2003 should skip to Section 20. **Note:** If none of your land was irrigated in 2003, enter zero in column 2, item 5 (acres irrigated) and skip to Section 20.

Item 6 - County and state with your largest irrigated acreage - Please report the county and state with the largest amount of irrigated land for **this operation**. If you irrigate in more than one county and the amount irrigated happens to be the same, then report the county that includes your farmstead.

Section 3 - Government programs

If you received any government payment, you should answer this section for those questions that apply.

Section 4 - Method of water distribution in 2003

This section refers to the method used to spread water over the land. Report the acres of land irrigated by each of the distribution systems listed. If the same land was irrigated by more than one method, report acres irrigated by each method used.

Remember: Do not report information for the delivery system used to convey water from the source to the field. Report only information for the field distribution system.

Item 1 - Gravity irrigation - refers to free flowing application of water across a field. The water is distributed across a field using either pipes or open ditches near the head of the field from which water is released to flow down furrows or to flood the field.

- a. Down rows or furrows - row crops are generally irrigated by water flowing down furrows.
- b. Controlled flooding between borders or within basins - some crops such as rice or cranberries are flooded across the entire field with water contained within borders or basins within or surrounding the field.
- c. Uncontrolled flooding - is often used to water pasture or rangeland. There are no furrows or borders within the field when uncontrolled flooding is used.
- d. Other - include here if not reported in any of the above categories.

Item 2 - Sprinkler irrigation - sprinkler irrigation is separated into five categories: center pivot, linear move tower, mechanical move, hand move, and solid set and permanent systems. It is important to report the pressure at the nozzle, not pump pressure.

- a. Center pivot - a center pivot system uses a boom half the width of the field. It is anchored at the center of the field and sweeps in a circle creating the familiar circular fields common in some irrigated areas.
- b. Linear move tower systems (and other linear continuous move drive systems)
- c. Solid set and permanent systems (except low-flow micro systems)
- d. Mechanical move systems - these are self-propelled systems that travel in straight lines across the field.
 - (1) - Side roll, wheel move, or other mechanical move systems (and other discrete move systems)
 - (2) - Big gun or Traveler systems- these are similar to the pulsating sprinklers used in nurseries or lawns which sweep across the area being watered.
- e. Hand move - any non-self-propelled system which must be moved manually.

Item 3 - Drip, trickle or low-flow micro irrigation - the water is distributed down the rows by tapes which meter out small amounts of water at low pressure near the plants' roots.

- a. Surface drip (on or above ground)
- b. Sub-surface drip (root zone)
- c. Low-flow micro sprinklers (sprays) (apply water at low pressure and are not self-propelled or easily moved)

Item 4 - Subirrigation - this is sometimes referred to as water seepage. It is used to maintain a water table at a predetermined depth. Normally these systems are permanently in place below the rootline. Water is usually applied by using emitters.

The total of acres, by method of water distribution, should be equal to, or greater than item code 042 (total acres irrigated). Every acre reported as irrigated in Section 2 needs to be reported by method of irrigation in Section 4.

Section 5 - Acres irrigated and estimated quantity of water used by source in 2003

If you do not keep complete records of water usage, use a best estimate. One method of calculating an estimate is to multiply the hours recorded on the pump engine by the gallons per minute (g.p.m.).

Water usage for this survey will be published in acre-feet. This is the quantity of water needed to cover one acre to the depth of one foot, or 326,000 gallons. You can report whichever value is available.

The sum of acres irrigated in Section 5 must be equal to item code 042 (total acres irrigated). If you use multiple sources of water for the same acres, this sum may be larger than item code 042 (total acres irrigated).

Item 1 - Report acres irrigated by ground water, on farm surface water, or off farm surface water.

Item 2 - Please report estimated quantity of water used on **this operation** by one of the following methods:

- a. total acre feet
- b. average acre feet per acre
- c. average inch applied per acre
- d. average gallons of water applied per minute (GPM) and duration in total no. of 24-day equivalents
- e. average flow in cubic feet per second (CFS) and duration in total no. of 24-day equivalents

Definitions for water sources

Ground water is water from a well or wells located on this farm or a neighboring farm

On farm surface water is a water supply not controlled by a water supply organization and included water from a stream, drainage ditch, lake, pond, spring, or reservoir on or adjacent to your farm.

Off farm surface water is surface or ground water from U.S. Bureau of Reclamation, etc.

Item 3 - Report total cost of off farm water in whole dollars.

Item 4 - Supplier of off-farm water

Section 6 - Water transfers in 2003

Item 1 - If you rented or leased part or all of the 2003 water allotment for the farm operation to others for use off the farm, then record a YES for item 1 and continue with items 2a and 2b. If your response to item 1 is NO, record the NO and then go to Section 7.

Item 2 - Record your best estimate of the quantity of water (in acre-feet) transferred to others in 2003 by water source (groundwater from wells, and/or surface water from a source on the farm, and/or water you normally would have received from an off-farm source).

[Be sure to include in your estimate only water you rented or leased to others for their use elsewhere (not on your farm).]

Item 3 - Water that is transferred off-farm may be put to one or more alternative uses. To the best of your knowledge, indicate the uses of the transferred water. Be sure to check only those uses that apply. Your response may include from 1 to 3 checks (for options 1 - 3).

However, some operators may not have received information on the use of the transferred water. In this case, if the use of the transferred water is "unknown" to you, check option 4 for "Unknown use of transferred water" and then check one of the reasons why the use of the transferred water was unknown. Check only one reason: a) water was part of a pool used for several purposes, or alternatively, b) water rented or leased was arranged by the district.

Section 7 - Expenditures for irrigation facilities and equipment

Please report expenditures for irrigation facilities and equipment in the following categories in column 1:

Item 1 - purchase of new and replacement irrigation equipment

Item 2 - new well construction or upgrades to existing wells

Item 3 - construction or improvement of permanent storage and distribution systems

Item 4 - land clearing and leveling for irrigation purposes

Item 5 - computers or control panels for irrigation

Section 8 - Acres harvested and crop yields

Report the acres of each crop harvested and its corresponding average yield per acre separately for irrigated acres and for dryland (non-irrigated) acres. Report acres of each crop harvested, even where multiple crops have been harvested off the same land. In addition, for each irrigated crop harvested, report the estimated average quantity of water applied per acre for the 2003 irrigation season. Report water applied in average acre-feet per acre or in inches per acre (but not both). Acre-feet per acre should be reported to the nearest tenth of a foot (for example, 1.6 or 2.3 acre-feet per acre), while acre-inches per acre should be reported to the nearest whole inch (for example, 19 or 28 inches per acre).

The sum of irrigated acres harvested should not be less than Section 2, item 5, item code 042 (total acres irrigated). The sum of irrigated and non-irrigated acres harvested should not be smaller than Section 2, item 5, item code 041 (total acres).

Any crop grown, which is not pre-listed, should be entered under item 20 "all other crops." Be sure to write-in the type of crop being reported. Report all crops irrigated on **this operation** in 2003.

Note: These crops should also be reported in the following Section 8. For winter wheat, report the acres harvested in 2003.

Section 9 - Method of water distribution, water source, and application of agricultural chemicals

For each crop with irrigated harvested acres reported in Section 8, report the primary type of irrigation system in column 1 by selecting the appropriate irrigation system ID code from the system ID code list above. Report the percent of the crop irrigated, using this system in the second column.

Then, for each irrigated crop, report the number of acres that were subjected to chemigation, that is, the application of fertilizers or pesticides through the irrigation water. Report the acres of chemigation separately for commercial fertilizer application and for pesticide application acres.

Note: For each crop, an irrigated acre harvested may be reported here in both the fertilizer and pesticide columns. Therefore, for each crop, the sum of chemigation acres may total more than the corresponding harvested irrigated acres reported for that crop in column 1 of Section 8.

Finally, there should be consistency between crops reported in Sections 8 and 9. Any crop reported as irrigated in Section 8 should have an entry in Section 9.

Section 10 - Number of irrigation wells, well depth, and pumping capacity on "this operation."

Item 1 - Please report if **this operation** irrigated any land with water from wells at any time during 2003. If no wells were used to supply water for irrigation on this operation in 2003, then check the "No" box and go to Section 11. If water from wells were used, check "Yes" and then respond to items 2-7.

Item 2 - Wells used in 2003 - this is the total number used during the 2003 growing season. Any well not used will be reported later in item 7.

- Report on well characteristics and use, separately, for the first 3 primary wells pumped in 2003. **Note:** The 3 primary wells should include those wells with the greatest quantity of water pumped in 2003. For each of the 3 primary wells, report the well characteristics and use even if these values are similar across wells. If less than 3 wells were pumped in 2003, then report for only those wells used.
- If you used more than 3 wells in 2003, then for all other wells (excluding the 3 primary wells), report only the average figure for each well characteristic and use.

Item 3 - Report the number of pumping stations for wells reported in item 2 above using backflow prevention devices (check valves) - these devices are a type of one-way valve which is installed at the well to prevent water from flowing back to the water source after the pump is shut off. Check the "none" box, if appropriate.

- Report the number of acres irrigated in 2003 with water pumped from backflow prevention devices which should be consistent with the acres irrigated using wells reported in item 3. If "none" was checked in item 3, then check "none" for item 3a.

Item 4 - Report the number of wells from item 2 above using flow meters or flow measuring devices (include the number of wells with any kind of flow measurement device). Check the "none" box if appropriate.

- Report the number of acres irrigated in 2003 with water from wells with flow measurement devices as reported in item 4. If "none" was checked for item 4, then check "none" for item 4a.

Item 5 - Change in depth to water - is defined as a change in the depth of water from the well-head to the water table level that has occurred over the last five years prior to the 2003 season.

Item 6 - Free flowing wells - this refers to artesian wells which are wells that do not require pumping. The water should be flowing to the surface under its own pressure. These are most commonly found in Florida and some western states. Pumps are used only to distribute the water from a holding pond or other type of basin to the field and for to create sufficient pressure for the field-level irrigation system. Report the number of free-flowing (artesian) wells used in 2003. Otherwise, check the "none" box if appropriate.

Item 7 - Operational wells not used in 2003 - report the number of operational wells that could have been used in 2003 but were not used. If all operational wells were in use check the "none" box. This includes any well that was not used due to needed repairs. Any well which is not operational, for which you have no plans to ever use again, should be considered abandoned.

Section 11 - Pumps, other than well pumps, used for irrigation

These are pumps used for lifting surface water from rivers and streams, irrigation channels, ponds and other water holding systems. Tailwater pits hold water that has run off irrigated land for recycling. Some irrigation systems using water from wells may also have pumps in places other than their wells to provide additional lift, especially on farms with large distribution systems or irregular terrain. These pumps are often referred to as booster pumps. Do not include pumps here that were reported in Section 10, items 2a or 2b.

Vertical lift here refers to the average surface-level feet-of-lift the pumps must raise the water in order to distribute the water through the field irrigation system. Discharge capacity here refers to average pumping capacity in gallons per minute (GPM). Discharge operating pressure here refers to the average operating pressure in pounds per square inch at the point of pump discharge

Section 12 - Energy used on this operation for pumping irrigated water

For each energy source report the number of wells and/or pumps, the cost of the fuel used to power pumps (include the landlords share of pumping costs), and the number of acres irrigated. For acres irrigated by type of energy, report the acres irrigated separately for those using water from wells from those using water from a surface-water source. The sum of acres irrigated across all energy types may be less than the total acres irrigated for the operation reported in Section 2, item 5, item code 042. The difference should equal those acres irrigated using no pumps to supply water to the field.

Section 13 - Maintenance and repair costs

Report any expense incurred in maintaining the irrigation system. Be sure to include the landlord's share. For this section do not include payments made for expanding the system, increasing efficiency, or new construction.

Section 14 - Irrigation labor costs

Report labor cost for irrigation activities involving hired labor in item 1a and report contract labor expenses for irrigation activities in item 1b. Labor costs here should pertain only to the operation and maintenance of the irrigation system and facilities. Include the landlords share of irrigation labor costs. Exclude cost for custom work and contract labor for harvesting.

Section 15 - Irrigation practices

Item 1 requests information on the method or approach used to decide when to schedule water applications in 2003. Mark all that apply. If you mark the box for "other," be sure to write in an entry under "other." For item 2, sometimes farmers have to discontinue irrigation during an irrigation season, which may affect crop yield. Item 2 requests information on whether this has occurred for this operation in 2003, and the reason(s) irrigation was discontinued. Mark all that apply. If you mark the box for "other," be sure to write in the reason for discontinuing irrigation.

Section 16 - Other uses for irrigation water

Write-in the use when reporting "other."

Section 17 - Water management practices for gravity irrigation

If you reported gravity irrigation in Section 4a, you should respond to this section. For items a through j, report the number of gravity irrigated acres using the specific water management practice. Check the "none" box for those items which do not apply.

Section 18 - Improvements to irrigation systems

For this section, the questions are only for improvements to existing irrigation systems. Any changes to the system to increase its size and bring more acres under irrigation should not be included here except for those changes on acres already irrigated. Item 2 is only for the results of improvements on existing irrigated acres. For example, if a farmer installs new equipment on 200 acres of existing irrigated land, and at the same time increases his irrigation by another 100 acres, the responses should only be for the original 200 acres.

Section 19 - Sources of irrigation information

Mark all that apply. If the response is "other," write in the source of information.

Section 20 - Irrigated land in 2002

Answer this section ONLY if you did not irrigate in 2003. Mark all that apply and write in any "other" response.

Section 21 - Farm sales

Please select the appropriate farm sales class from the list in item 1. Report whole percent in items 2 and 3.

Section 22 - Person completing this form

Enter your name, date, and telephone number.

Publication Program

2002 CENSUS OF AGRICULTURE

Results of the 2002 Census of Agriculture are published in a series of reports that provide data at the national, State, and county (or equivalent) levels for the United States. Data also are available for Puerto Rico, American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands of the United States.

VOLUME 1. GEOGRAPHIC AREA SERIES (AC-02-A-1 to 51)

National, State, and county data are published in detailed national and State tables for the United States, and in State and county tables for each State. These reports include data on number and size of farms; crop production; livestock, poultry, and their products; tenure, age, and principal occupation of operator and up to 3 operators; type of organization; value of products sold; government payments plus market value of agricultural products sold; production expenses; direct marketing; landlord expenses; computer use; production contracts; fertilizers and chemicals; machinery and equipment; farm labor and migrant workers; value of land and buildings; agricultural activity on American Indian reservations; grain storage capacity; land use; irrigation; and the North American Industry Classification System.

U.S. Summary and State Report (AC-02-A-51)

- Chapter 1. National-level data
- Chapter 2. State-level data

State and County Reports (AC-02-A-1 to 50)

- Chapter 1. State-level data
- Chapter 2. County-level data

Outlying Areas Data (AC-02-A-52 to 56) - Data are published for the municipios of Puerto Rico, the election districts on Guam, the municipalities of the Commonwealth of the Northern Mariana Islands, the districts and counties of American Samoa, and the islands of U.S. Virgin Islands.

Specialty Products - Data from the census are extracted and presented in several different product formats. They are the State and County Highlights, County Profiles, American Indian and Alaska Native, and Top Commodities.

VOLUME 2. SUBJECT SERIES (AC-02-S-1 to 5)

Agricultural Atlas of the United States (AC-02-S-1) graphically illustrates a profile of the Nation's agriculture at the county-level in a series of multicolor pattern and dot maps.

Congressional District Ranking (AC-02-S-2) provides selected statistics from the 2002 Census of Agriculture ranked by

congressional districts. The statistics include: operator characteristics, farm characteristics, selected livestock, and selected crops harvested.

ZIP Code Tabulations of Selected Items (AC-02-S-3) provides tabulations by ZIP Code for the total market value of products sold; number of farms by size; land in farms; inventory of cattle, calves, hogs, and pigs; cropland harvested; and selected crops from the 2002 census.

Congressional District Tabulations (AC-02-S-4) provides data by congressional district. The tables show the total market value of products sold and the number of farms by size; land in farms; inventory of cattle, calves, hogs, and pigs; cropland harvested; and selected crops.

History (AC-02-S-5) provides a detailed description of the planning and conduct of the 2002 Census of Agriculture. It explains the history of the agriculture census, farm definition, data collection and processing, data dissemination, and research.

VOLUME 3. SPECIAL STUDIES (AC-02-SP-1 to 2)

2003 Farm and Ranch Irrigation Survey

(AC-02-SP-1) provides data collected from a sample of irrigated farm operations in the 2002 Census of Agriculture at the national and state levels.

2005 Census of Aquaculture (AC-02-SP-3) provides statistics about the Nation's aquaculture production and structure of the aquaculture industry at the national, regional, and State levels.

PRINTED REPORTS

All of the reports listed above are available as printed reports, except Specialty Products for State and County Highlights, County Profiles, and Top Commodities and Volume 2, ZIP Code Tabulations of Selected Items (Part 3) and Congressional District Tabulations (Part 4).

ELECTRONIC PRODUCTS

Internet - Data from Volume 1, Volume 2, and Volume 3 are available online at the NASS Web site at www.usda.gov/nass/. Quick STATS (an online statistics database on the NASS Web site) are available for Volume 1, at the National, State and county-level and for municipios in Puerto Rico.

CD-ROM - Manipulable data files from Volume 1, Parts 1-52 are available.

For additional information, write the Customer Services Office, National Agricultural Statistics Service, USDA, Room 5835, South Building, 1400 Independence Avenue, SW, Washington, DC 20250-2000 or call 800-727-9540.
