

U.S. Department of State
DIRECTORATE OF DEFENSE TRADE CONTROLS
Guidelines for Completion of a Form DSP-84
Application for Amendment of a DSP-85 License,
PERMANENT/TEMPORARY EXPORT OR TEMPORARY IMPORT OF
CLASSIFIED DEFENSE ARTICLES AND RELATED CLASSIFIED
TECHNICAL DATA

The Form DSP-84 is used to request an amendment to a DSP-85 license authorized by the Directorate of Defense Trade Controls (DDTC) for the permanent/temporary export or temporary import of CLASSIFIED defense articles and related CLASSIFIED technical data. In accordance with 22 CFR §123.25, DDTC will consider approval of an amendment to the DSP-85 license for the following reasons:

1. Addition of a U.S. freight forwarder or U.S. consignor.
2. An obvious typographical error, the correction of which is supported by the documentation submitted with the original license request.
3. Addition of a source, change in manufacturer of the commodity, or a change in part number of the equipment originally authorized for export. When changing part numbers, the requester must certify that the change will not result in an enhancement, upgrade, or change to the capability of the commodity originally authorized for export (see Block 9).
4. A change in the name and address of the U.S. seller.
5. A change in the name and address of foreign consignee.
6. A change in the cognizant Defense Security Service security office.
7. A change in location of the license applicant or its subsidiary(s).
8. A change to a license due to an acquisition or merger.

Requests for changes due to change in location or because of an acquisition or merger (i.e., numbers 7 and 8 above) cannot be made until the registered applicant(s) have, in accordance with 22 CFR 122, amended the information contained in their Statement of Registration (DS-2032).

General Instructions

1. Prior to completing your request determine:
 - That the PM/DDTC registration is valid.
 - That the license you are amending is valid, and that there is a remaining balance to be shipped and that you have a copy to transmit with your request.
 - Whether the documentation supporting your application is available for submission with your request.
 - That the applicant and all parties are eligible to engage in licensing. If the eligibility requirements of 22 CFR §§120.1(c) and 126.13 are not met, you are not eligible to make this request without the submission of a transaction exception.
2. An asterisk preceding a block number indicates required information. Failure to provide the information may result in your request being Returned Without Action (RWA'd).
3. Identify the document(s) submitted with your request.
4. 22 CFR §123.25 identifies the amendments that can be requested. Section 123.25 also identifies in paragraph (e) specific types of changes that may not be requested.
5. Brokering authorizations may not be amended using the DSP-84 form.

Block 11(a). Type of correction. Select at least one.

1) Change the part number of the commodity identified on the license. A change in a part number, while not the subject of the original documentation, will be authorized to change a production/manufacturing part number. For changes in part numbers not supported by the original documentation (e.g., due to change in production numbers) the applicant should take care to ensure the validity of their certification since any error resulting in temporary export of an enhanced/upgraded defense article will be considered a false statement and a violation of the Arms Export Control Act (AECA) and the ITAR. Changes in a part number that results in a change to the defense article (e.g., upgrade) must be the subject of a new DSP-85 license application, supported by new documentation.

Note. Please ensure that the certification has been read since the applicant in selecting "change part number" is also certifying that the change in part number will not enhance, upgrade, or change the capability of the commodity authorized for export on the DSP-85 license.

2) Correct a typographical error. Changes due to typographical errors must be supported by attaching documentation that was submitted with the original DSP-85 submission. In summary, a change in commodity description can only be due to a typographical error, which must be supported by original documentation that is submitted in support of this request.

Block 11(b). State the specific reason for the change.

Block 11(d). Corrected commodity description/part number. No other changes to the description are permitted. Provide the line item of commodity described on the DSP-85 license.

Block 12. Correction to Quantity (DSP-85 license, Block 10) and/or U.S. Dollar Value (DSP-85 license, Block 14). You may correct as many line items as necessary. For each line item identified on the DSP-85 license for which a change is being requested, complete Blocks 12(a), 12(b), 12(c), and 12(d). See 22 CFR §123.25 regarding a change in value of a license prior to amending for that purpose.

Block 12(a). Type of correction. Select at least one: 1) correct quantity, 2) correct \$ value, or both. Corrections to the quantity and the unit value may only be requested when an error was made on the original submission and the error can be validated by the original DSP-85 license (Block 4 of this application) supporting documentation on file in DDTC which must also be attached to support this request. Value may be amended.
