What happens after USPTO receives the disk?

1. USPTO will check to see that your Customer Number is on file and matches

the Customer Number address provided on the spreadsheet. Remember, for each application you can designate a different Customer Number. You must apply for your customer numbers before submitting this disk.

2. After confirmation of a valid Customer Number, we check for two criteria: data validity, correct PCT application number and signature authorization. Applications that pass the two checks are uploaded. Ensure that the person(s) signing the batch update request is either the applicant, a person granted limited recognition, or a registered attorney or agent of record in each application on the spreadsheet. Any discrepancies will result in failure to update the PCT application(s).

3. USPTO ensures that WIPO Administrative Rules are followed. According to Rule 92*bis*, the PCT Applications Customer Number Upload Spreadsheet process does not permit changing PCT applications correspondence addresses. The Customer Number address provided on the spreadsheet is only used as point of contact for the Customer Number update request.

4. An Upload Report will be generated and provided to you. The report lists successful updates and application number(s) not updated for failing the system audits. Review the information provided and make corrections by: correcting invalid application number(s), providing the proper authorization signature or submitting a new POA form to make valid the authorization signature. Once corrected submit a new upload disk. The Upload Report lists all applications updated to reflect the Customer Number as designated. Please review carefully. If a file is not familiar, it may be that you updated another customer's file with your Customer Number.

5. Documents pertaining to Customer Number uploads are retained for no longer than twelve months after processing of the Customer Number Upload Request.

Note that this batch update can not be used to change the power of attorney.
