PRA Disclaimer

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0941. The time required to complete this information collection is estimated to average 24 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimates or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Baltimore, Maryland 21244-1850.

Exp. 12/31/2008 OMB # 0938-0941

User Guide

The screenshot shows a web browser window titled "MCMP-PAT User Guide". The browser's address bar is empty, and the navigation toolbar includes buttons for Hide, Back, Forward, Stop, Refresh, Home, Print, and Options. The left sidebar contains a "Contents" pane with a search box and a tree view of the user guide's structure. The "Abstraction Guidelines" page is selected and highlighted in blue. The main content area displays the page title "MCMP-PAT General Abstraction Guidelines" in a blue header, followed by two paragraphs of text and a bulleted list under the "Sources" section. The "Dates" section is partially visible at the bottom.

MCMP-PAT General Abstraction Guidelines

The MCMP-PAT General Abstraction Guidelines are designed to assist in determining how a question should be answered. All of the allowable values for a given question are outlined, and "notes" are often included which provide the necessary guidelines to abstract a data element. It is important to utilize the information found in the "notes" when entering or selecting the most appropriate answer.

When abstracting a medical record, the abstractor should first refer to the specific abstraction instructions for the data element. These notes should take precedence over the MCMP-PAT General Abstraction Guidelines.

Sources

- Documentation from any medical record source or other clinical information that is available at the point to care can be utilized in abstraction.
