Theft/Diversions Chemical Weapons/Chemical Weapon Precursors (CW/CWP) Chemicals of Interest - Details ..... 91

**Sabotage/Contamination Chemicals ..... 96**

Sabotage/Contamination Chemicals of Interest ..... 96

**Mission Critical Chemicals ..... 103**

Mission Critical Chemical Production ..... 103

**Economically Critical Chemicals ..... 107**

Economically Critical Chemical Production ..... 107

**Finish ..... 113**

## General

The Department of Homeland Security will use the information you provide in this Top-Screen/Chemical Security Assessment Tool to determine whether particular facilities present a high level of security risk. Your provision of accurate information in this Top-Screen is critical to enabling the Department to make well informed decisions designed to reduce the Nation's risk.

The Department will base its determinations, in part, upon the information provided in this Top-Screen/Chemical Security Assessment Tool. The information provided in the Top-Screen/Chemical Security Assessment Tool will not, therefore, be the sole or definitive basis upon which the Department will categorize facilities as presenting a high level of security risk.

In the first part of the Top-Screen/Chemical Security Assessment Tool, the Department seeks information concerning the presence and amounts of certain chemicals. The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

### Paperwork Burden Notice:

The public reporting burden for this form is estimated to be 30.3 hours. The burden estimate includes time for reviewing instructions, researching existing data sources, gathering and maintaining the needed data, and completing and submitting the form. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: NPPD/OIP/Chemical Security Compliance Division, Attention: Matthew Bettridge, Project Manager, U.S. Department of Homeland Security, Mail Stop 8100, Washington, DC 20528-8100.

(Paperwork Reduction Project (1670-0007)). Your response is mandatory according to Public Law 109- 295 Section 550. You are not required to respond to this collection of information unless a valid OMB control number is displayed in the upper right corner of this form. NOTE: DO NOT send your completed form to this address.

### Submission Statement:

My statements in this submission are true, complete, and correct to the best of my knowledge and belief and are made in good faith. I understand that a knowing and willful false statement on this form can be punished by fine or imprisonment or both. (See section 1001 of title 18, United States Code).

**Facility Name**

**Facility Name**  
[Q:1.0-66]

▲ Provide the name of the facility. The name must be specific to the site; if the site is part of a large corporation, the name may be the corporate name plus the location (for example, 'ABC Oil/Refining - Hightown Plant')

**Alternative Facility**

**Name** [Q:1.0-62]

Provide alternative names under which the facility may be known.

**Facility Description**

**NAICS Code for the Facility** [Q:1.1-63]

▲ Provide the five- or six-digit NAICS Industry code that corresponds most closely to the primary activity of this facility as a whole. NAICS codes are maintained by the U.S. Census Bureau. For a list of the codes see <http://www.census.gov/epcd/naics02/naicod02.htm>.

**Facility Data Universal Numbering System (DUNS)** [Q:1.1-64]

▲ Enter the nine digit Data Universal Numbering System (DUNS) identification code for the facility itself. If the facility does not have a DUNS number, leave this data element blank. Explain: The Data Universal Numbering System (DUNS) Number is a unique nine character identification number provided by Duns & Bradstreet (D&B). The DUNS Number is site-specific and division-specific. Therefore, each physical location of an entity will have its own DUNS Number. If the facility doesn't have a DUNS number, leave this field blank.

**Choose the facility type that best describes your facility** [Q:1.1-65]

- Chemical manufacturing, usage, storage, and distribution
- Petroleum refining
- Liquefied natural gas storage

**Facility Location**

**Facility Location Address** [Q:1.1-68]

▲ Enter the street address of the facility's physical location. [Note: This may be different from the mailing address.] Use local street and road designations, not post office or rural box numbers.

**Facility Location Address (continued)** [Q:1.1-69]

**Facility Location Address (continued)** [Q:1.1-70]

▲ Enter any additional street data for the facility's physical location. [Note: This may be different from the mailing address.] Use local street and road designations, not post office or rural box numbers.

**Facility Location City** [Q:1.1-71]

▲ Enter the city of the facility's physical location. [Note: This may be different from the mailing address.]

**Facility Location State** [Q:1.1-72]

▲ Select the state of the facility's physical location. [Note: This may be different from the mailing address.]

**Facility Location ZIP Code** [Q:1.1-73]

▲ Enter the ZIP Code (including the 4 digit extension, if applicable) of the facility's physical location. For example, XXXXX or XXXXX-XXXX are valid ZIP Code formats. [Note: This may be different from the mailing address.]

**Facility Coordinates**

Latitude/Longitude Instructions:

1. Go to The National Map on TerraServer <http://terraserver.microsoft.com/>, enter your street, city, and state then click GO.
2. TerraServer will present one or more "Available Image" links. Click on the most recent.
3. View the image that will be displayed to verify that your site is at the approximate latitude/longitude shown.
4. Copy the Latitude and Longitude from TerraServer into the boxes below.
5. Click here to verify your coordinates

**Facility Latitude**  
[Q:1.1-591]

▲ Enter the latitudinal coordinate of the approximate **center of the facility** in decimal degrees (XX.XXXXXX).

**Facility Longitude**  
[Q:1.1-75]

▲ Enter the longitudinal coordinate of the approximate **center of the facility** in decimal degrees. Longitude should begin with a negative sign with no space before the coordinates (-XX.XXXXXX).

**Enter the name of the county or equivalent jurisdiction (borough, parish) in which the facility is located. If the facility is located in more than one jurisdiction, enter all appropriate names.**

[Q:1.1-76]

### Facility Owner or Operator

**Who is the Owner of the facility?** [Q:1.2-78]

▲ The Owner is the person or entity that owns a facility. This may be a person, company, cooperative, state, municipality, etc. This may be different from the Operator.

**Who is the Operator of the facility?**  
[Q:1.2-594]

▲ The Operator is the person who has responsibility for the daily operations of a facility. This may be a person, company, cooperative, state, municipality, etc. This may be different from the Owner.

## Facility Regulatory Mandates

### Is the facility regulated pursuant to the Maritime Transportation Security Act of 2002, Public Law 107-295, as amended?

[Q:1.3-85]

- Yes, the facility is regulated pursuant to MTSA.
- No, the facility is not regulated pursuant to MTSA.
- Partially: The site includes both a facility regulated pursuant to MTSA and a facility not regulated pursuant to MTSA.

▲ If the site includes both a facility regulated pursuant to the Maritime Transportation Security Act of 2002, Public Law 107-295, as amended, and a facility not regulated pursuant to the Maritime Transportation Security Act, select "Partially" and continue to fill out the screen for the facility not subject to the Maritime Transportation Security Act.

### Is the facility a Public Water Systems, as defined by section 1401 of the Safe Drinking Act, Public Law 93-523, as amended?

[Q:1.3-86]

- Yes, the facility is a Public Water System.
- No, the facility is not a Public Water System.
- Partially: the facility contains a Public Water System regulated under the Safe Drinking Water Act, but also contains components that are not so regulated.

▲ If the facility contains a Public Water System as defined by the Safe Drinking Water Act, but also contains components that are not covered by that definition, select "Partially" and continue to fill out the screen for the portion of the facility not so defined under the Safe Drinking Water Act.

### Is the facility regulated as a Treatment Works as defined in section 212 of the Federal Water Pollution Control Act, Public Law 92-500, as amended?

[Q:1.3-87]

- Yes, the facility is regulated as a Treatment Works.
- No, the facility is not regulated as a Treatment Works.
- Partially: the site contains Treatment Works regulated under the Federal Water Pollution Control Act, but also contains a facility or portion of a facility not so regulated.

▲ If the facility contains a Treatment Works as defined by the Federal Water Pollution Control Act, but also contains components that are not covered by that definition, select "Partially" and continue to fill out the screen for the portion of the facility not so defined under the Federal Water Pollution Control Act.

### Is the facility owned or operated by the Department of Defense?

[Q:1.3-88]

- Yes
- No

▲ For further information or discussion of this type of exemption, please refer to the Interim Final Rule.

### Is the facility owned or operated by the Department of Energy?

[Q:1.3-89]

- Yes
- No

▲ For further information or discussion of this type of exemption, please refer to the Interim Final Rule.

### Is the facility subject to regulation by the Nuclear Regulatory Commission?

[Q:1.3-90]

- Yes
- No

▲ For further information or discussion of this type of exemption, please refer to the Interim Final Rule.

## EPA RMP Facility Identifier

### Does the facility operate any EPA RMP covered process(es) - Program 1, 2, or 3?

[Q:1.41-395]

- Yes
- No

▲ Program 1, 2, and 3 processes are those determined under RMP. See 40 CFR 68.10(b), (c), and (d), or Chapter 2 or EPA's General Guidance for Risk Management Programs (40 CFR 68). <http://yosemite.epa.gov/oswer/ceppoweb.nsf/content/index.html>

*If Yes, fill in EPA RMP Facility Identifier number*

**Provide the EPA RMP Facility Identifier, a unique, 12-digit number assigned to the facility by the RMP Reporting Center after the first RMP submission. The RMP Report Center included this number in their acknowledgment letter to your facility.**

[Q:1.42-396]

**EPA RMP Facility Identifier**

### Collocated Facility

**Specify if the facility is a host to a collocated tenant facility, is a collocated tenant facility itself, or if this is not applicable.**

[Q:1.43-397]

- Facility is host to a collocated tenant facility
- Facility is a collocated tenant facility
- Not applicable

▲ A facility that is collocated shares a site with another company's facility through either a host or a tenant agreement. If a facility does not share a site with another company's facility it is the sole tenant.

*If facility is host or tenant:*

**Enter the name of the host or tenant facility and its corresponding EPA RMP Facility Identifier.**

**Host/Tenant Facility**

[Q:1.44-398]

**Host/Tenant EPA RMP Facility Identifier**

[Q:1.44-399]

### Additional Facility Information

**Enter the number of full-time employees and contractors.**

**Number of Full Time Employees**

[Q:1.45-400]

▲ The number should represent the typical maximum number of employees/full-time contractors onsite at any given time. Do not include occasional times of a higher onsite workforce, such as turnarounds, in this estimate. Do not use commas when entering data.

**Parent Company Name and Data Universal Numbering System (DUNS)**

The parent company is the corporation or other business entity that owns at least 50 percent of the voting stock of the company. If the facility is owned by a joint venture, enter the first of the two major owners here. If the company does not have a parent company, leave these fields blank.

**Parent Company 1 Name** [Q:1.45-432]

**Parent Company 1 DUNS** [Q:1.45-433]

**Parent Company 2 Name** [Q:1.45-434]

**Parent Company 2 DUNS** [Q:1.45-435]

**Security Vulnerability Assessment (SVA)**

**Has a security vulnerability assessment been conducted for this facility?**

[Q:1.47-436]

- Yes
- No

▲ A Security Vulnerability Assessment (SVA), enables the identification of security hazards, threats, and the evaluation of security countermeasures and vulnerabilities.

*If Yes, answer SVA Methodology and SVA Date Fields*

**SVA Methodology**

**Enter the Name of the SVA Methodology**

**SVA methodology** [Q:1.482-653]

**Enter the date when the most recent security vulnerability assessment of this facility was completed.**

**Date of the most recent security vulnerability assessment** [Q:1.482-654]

▲ The response format is **mm/dd/yyyy**.  
(e.g. May 1, 2006 is entered as 05/01/2006.)

If the answer to question [Q:1.1-65], "Choose the facility type that best describes your facility" is Refinery, fill in Refinery Capacity, Refinery Market Share, Airport Fuels Supplier, and Military Installation Supplier fields.

If the answer to question [Q:1.1-65], "Choose the facility type that best describes your facility" is Liquefied Natural Gas Storage, fill in Liquefied Natural Gas Capacity and Liquefied Natural Gas Exclusion Zone fields

If facility is a chemical facility, go to [Release of Toxics](#) (page 16)

## Refinery Capacity

Enter the production capacity of the refinery in barrels per day. The production capacity, also known as the nameplate capacity, is the product output under conditions optimized for maximum quantity for the production facility, as demonstrated by one or more test-runs. Do not use commas when entering the numbers.

**Typical Operating Capacity (bpd)**

[Q:1.5-386]

Enter the design capacity, or theoretically calculated product output, of the refinery in barrels per day. The design capacity of an operable petroleum refinery is expressed in terms of barrels per day of crude capacity, cracking capacity, desulphurization, or amounts of products by grade. Do not use commas when entering the numbers.

**Maximum Design Capacity (bpd)**

[Q:1.5-387]

For each of the potential refinery crude sources (e.g., ship, pipeline, strategic petroleum reserve (SPR), rail, and truck) enter the typical contribution as a percentage of the total barrels per day.

**Crude % by Ship/Barge**

[Q:1.5-388]

**Crude % by Pipeline**

[Q:1.5-389]

**Crude % by SPR**

[Q:1.5-390]

**Crude % by Rail**

[Q:1.5-391]

**Crude % by Truck**

[Q:1.5-392]

**Refinery Market Share**

Enter the regional market shares (%) for each fuel type and description of state/region supplied. (Gasoline, Diesel, Jet Fuel/Kerosene, LPG, Home Heating Oil). State/region supplied can include the states or areas of the US where the refinery's products are sold.

Fuel Type	Regional Market Share (%)	State/Region Supplied
<b>Gasoline</b> [Q:1.51-655]	<input type="text"/>	<input type="text"/>
<b>Diesel</b> [Q:1.51-657]	<input type="text"/>	<input type="text"/>
<b>Jet Fuel/Kerosene</b> [Q:1.51-659]	<input type="text"/>	<input type="text"/>
<b>LPG</b> [Q:1.51-661]	<input type="text"/>	<input type="text"/>
<b>Home Heating Oil</b> [Q:1.51-663]	<input type="text"/>	<input type="text"/>

**Airport Fuels Supplier**

Is the refinery a direct supplier to a major metropolitan airport?  
[Q:1.52-374]

- Yes
- No

If "Yes", fill in Airport(s)

Enter the name of each airport supplied by this refinery. For each airport, enter the refinery's share (0% to 100%) of total deliveries of Aviation Gasoline (Avgas) and jet Fuel/Kerosene to the airport.

Airport Name [Q:1.53-375]	% Share of Aviation Gasoline [Q:1.53-376]	% Share of Jet Fuel/Kerosene [Q:1.53-378]
<input type="text"/>	<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>	<input type="text"/>

**Military Installation Supplier**

**Is the refinery a direct supplier to a military installation (products shipped from refinery to the installation)?**

[Q:1.54-380]

Yes

No

If "Yes", fill in Installation(s) and Product(s)

**Military Installation and Products**

Enter each military installation supplied by the refinery. Enter the refinery's share (0% to 100%) of total deliveries of Gasoline, Diesel, and Aviation Fuel to the installation.

**Military Installation**

[Q:1.55-381]

**% Share of Gasoline**

[Q:1.55-382]

**% Share of Diesel**

[Q:1.55-383]

**% Share of Jet Fuel/Kerosene**

[Q:1.55-384]

Go to [Release Toxics](#) (page 16)

**Liquefied Natural Gas (LNG) Capacity**

**Enter the total LNG storage capacity for the facility (in cubic meters).**

[Q:1.6-618]

▲ If there are multiple LNG storage tanks onsite the capacity reported is the total storage capacity of all LNG tanks.

**Enter the regasification rate (billion cubic feet (Bcf) per day).**

[Q:1.6-619]

▲ Regasification rate should be the annual average reported in Bcf per day.

**Enter the name of the natural gas pipeline system the facility feeds.**

[Q:1.6-620]

▲ The name of the natural gas pipeline system should be the name of the main tie-in point from this facility.

### Liquefied Natural Gas Exclusion Zone

**Indicate if this facility was sited according to the 49 CFR 193 exclusion zone requirements for thermal radiation and flammable vapor dispersion.**

[Q:1.92-667]

Yes

No

▲ 49 CFR 193 incorporates NFPA 59A by reference. As defined in NFPA 59A, the siting requirements are provisions to minimize the possibility of the damaging effects of fire reaching beyond a property line. Refer to the downloadable guidance on the DHS website for the specific requirements.

*If "No", provide a reason why the facility was exempted.*

### Liquefied Natural Gas Exclusion Zone Exception

**Provide the reason why the facility was exempted from this regulation.**

[Q:1.91-669]

### Liquefied Natural Gas Exclusion Details

**Provide the distance (in feet) of the 5kW/m2 thermal radiation zone using the 49 CFR 193 siting requirements.**

[Q:1.93-670]

Feet

## CSAT Top-Screen Questions

OMB No. 1670-0007  
Expires: 2/29/2008

**Provide the distance (in feet) to half the Lower Flammability Limit (1/2 LFL) using the 49 CFR 193 siting requirements.**

[Q:1.93-671]

Feet

Go to [Release Toxics](#) (page 16)

## Release Toxics

### Release Toxic Chemicals of Interest

The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

**Do you manufacture, process, use, store, or distribute any of the following release toxic chemicals of interest (COI) at or above the screening threshold quantity at your facility?**

Check "Yes" if the facility either currently possesses or possessed within the past 60 days the COI at or above the screening threshold quantity.

*(The default settings on this list indicate that the chemicals are NOT currently present on site nor have been onsite within the past 60 days. At the end of the list, you must indicate that these settings have been changed as applicable to the facility.)*

These chemicals were determined by the US Department of Homeland Security to be a potential security risk at "high risk chemical facilities" as defined in Section 550 the Department of Homeland Security Act of 2007. A facility should indicate which COI it either currently possesses or possessed within the past 60 days at or above the screening threshold quantity.

If "No" selected for all chemicals, go to [Release Flammables](#) (page 32)

# CSAT Top-Screen Questions

OMB No. 1670-0007  
Expires: 2/29/2008

[Q:2.0-121]

Chemical Name	CAS#	Min. Conc.	Screening Threshold Quantity	Do you manufacture, process, use, store, or distribute any of the following release toxic chemicals of interest (COI) at or above the screening threshold quantity at your facility?	
				Yes	No
Acrolein [2-Propenal or Acrylaldehyde]	107-02-8	1.00%	5,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Allyl alcohol [2-Propen-1-ol]	107-18-6	1.00%	15,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Ammonia (anhydrous)	7664-41-7	1.00%	10,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Ammonia (conc. 20% or greater)	7664-41-7	20.00%	20,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Arsenic trichloride [Arsenous trichloride]	7784-34-1	1.00%	15,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Arsine	7784-42-1	1.00%	1,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Boron trichloride [Borane, trichloro]	10294-34-5	1.00%	5,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Boron trifluoride [Borane, trifluoro]	7637-07-2	1.00%	5,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Boron trifluoride compound with methyl ether (1:1) [Boron, trifluoro [oxybis (methane)]-, T-4-]	353-42-4	1.00%	15,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Bromine	7726-95-6	1.00%	10,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Carbon disulfide	75-15-0	1.00%	20,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>

# CSAT Top-Screen Questions

OMB No. 1670-0007  
Expires: 2/29/2008

Chemical Name	CAS#	Min. Conc.	Screening Threshold Quantity	Do you manufacture, process, use, store, or distribute any of the following release toxic chemicals of interest (COI) at or above the screening threshold quantity at your facility?	
				Yes	No
Sulfur tetrafluoride [Sulfur fluoride (SF <sub>4</sub> ), (T-4)-]	7783-60-0	1.00%	2,500 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Sulfur trioxide	7446-11-9	1.00%	10,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Tetramethyllead [Plumbane, tetramethyl-]	75-74-1	1.00%	10,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>
Titanium tetrachloride [Titanium chloride (TiCl <sub>4</sub> ) (T-4)-]	7550-45-0	1.00%	2,500 lbs	<input type="checkbox"/>	<input type="checkbox"/>

**The list above has been reviewed and all chemicals of interest that the facility either currently possesses or possessed within the past 60 days at or above the screening threshold quantity have been indicated by selecting "Yes."**

[Q:2.0-631]

Yes No

**Release Toxic Chemicals of Interest - Detail**

Indicate the topography used in the RMP\*Comp calculation for the area where the facility is located.  
[Q:2.1-122]

- Urban
- Rural

▲ If this facility is covered by EPA RMP, the selection should be the same as that reported to EPA. For all other facilities, if the site is located in an area with few buildings or other obstructions, select Rural. If the site is in an urban location, or is in an area with many obstructions, select Urban.

Enter the total on-site quantity of the release toxic COI in pounds. Enter the distance of concern reported by RMP\*Comp in miles.

The total on-site quantity is the highest amount that the facility either currently possesses or possessed within the past 60 days. **Round the quantity to two significant digits** (e.g., round 247500 pounds to 250000 pounds, and round 7625 pounds to 7600 pounds). Do not use commas when entering data.

The Distance of Concern that should be reported is the downwind distance calculated using RMP\*Comp for total on-site quantity of the regulated chemical, using additional process conditions for this chemical. Report all distances shorter than 0.1 mile as 0.1 mile, and all distances 25 miles or longer as 25 miles. (RMP\*Comp can be downloaded from <http://yosemite.epa.gov/oswer/ceppoweb.nsf/content/comp-dwn.htm>)

Chemical Name	CAS#	Min Conc.	Screening Threshold Quantity	Total On-site Quantity (pounds) [Q:2.1-124]	Distance of Concern (miles) [Q:2.1-126]
Acrolein [2-Propenal or Acrylaldehyde]	107-02-8	1.00%	5,000 lbs		
Allyl alcohol [2-Propen-1-ol]	107-18-6	1.00%	15,000 lbs		
Ammonia (anhydrous)	7664-41-7	1.00%	10,000 lbs

**Enter the quantity of the release toxic COI in the Area of Highest Quantity in pounds. Enter the distance of concern reported by RMP\*Comp for each AHQ in miles.**

The Area of Highest Quantity (AHQ) is defined as an on-site area, with a radius of 170 feet, where the greatest amount of the release toxic COI is either currently present or has been present at any one time within the past 60 days. This amount may differ from the total on-site quantity. **Round the quantity to two significant digits** (e.g., round 247500 lbs. to 250000 lbs., and round 7625 lbs. to 7600 lbs.) Do not use commas when entering data.

Chemical Name	CAS#	Min. Conc.	Screening Threshold Quantity	Quantity in AHQ (pounds) <small>[Q:2.2-2792]</small>	Distance of Concern for AHQ (miles) <small>[Q:2.2-2793]</small>

## Release Flammables

### Release Flammable Chemicals of Interest

The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

**Do you manufacture, process, use, store, or distribute any of the following release flammable chemicals of interest (COI) at or above the screening threshold quantity at your facility?**

Check "Yes" if the facility either currently possesses or possessed within the past 60 days the COI at or above the screening threshold quantity.

*(The default settings on this list indicate that the chemicals are NOT currently present on site nor have been onsite within the past 60 days. At the end of the list, you must indicate that these settings have been changed as applicable to the facility.)*

These chemicals were determined by the US Department of Homeland Security to be a potential security risk at "high risk chemical facilities" as defined in Section 550 the Department of Homeland Security Act of 2007. A facility should indicate which COI it either currently possesses or possessed within the past 60 days at or above the screening threshold quantity.

The following list of release-flammables includes both release-flammable COI and fuel(s). The fuel(s) shown are mixtures of COI or other release-flammables. If the facility's release-flammable mixture is a fuel(s) from the list below, enter the amount of fuel(s) at the facility consistent with the release-flammable minimum concentration provision found in § 27.204(a)(2). If a facility counts a release-flammable mixture as a fuel, the facility should not count its constituent release-flammable COI in the release-flammable COI section of the Top-Screen.

If "No" selected for all chemicals, go to [Release Explosives](#) (page 52)

The list above has been reviewed and all chemicals of interest that the facility either currently possesses or possessed within the past 60 days at or above the screening threshold quantity have been indicated by selecting "Yes."

[Q:3.0-632]

Yes No

## Release Flammable Chemicals of Interest - Detail

Enter the total on-site quantity of the release flammable chemical of interest in pounds. Enter the quantity of the release flammable COI in the Area of Highest Quantity in pounds.

The total on-site quantity is the highest amount that the facility either currently possesses or possessed within the past 60 days. The Area of Highest Quantity (AHQ) is defined as an on-site area, with a radius of 170 feet, where the greatest amount of the release flammable COI is either currently present or has been present at any one time within the past 60 days. This amount may differ from the total on-site quantity. For release flammable COI, AHQ should be reported as an **aggregate amount of all release flammable COI located within the AHQ**. See the

# CSAT Top-Screen Questions

OMB No. 1670-0007

Expires: 2/29/2008

Chemical Name	CAS#	Min. Conc.	Screening Threshold Quantity	Total On-site Quantity (pounds) <small>[Q:3.1-131]</small>	Quantity in AHQ (pounds) <small>[Q:3.1-2794]</small>
Fuels: LPG					

## Release Explosives

### Release Explosive Chemicals of Interest

The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

**Do you manufacture, process, use, store, or distribute any of the following release explosive chemicals of interest at or above the screening threshold quantity at your facility?**

Check "Yes" if the facility either currently possesses or possessed within the past 60 days the COI at or above the screening threshold quantity.

*(The default settings on this list indicate that the chemicals are NOT currently present on site nor have been onsite within the past 60 days. At the end of the list, you must indicate that these settings have been changed as applicable to the facility.)*

These chemicals were determined by the US Department of Homeland Security to be a potential security risk at "high risk chemical facilities" as defined in Section 550 the Department of Homeland Security Act of 2007. A facility should indicate which COI it either currently possesses or possessed within the past 60 days at or above the screening threshold quantity.

A Commercial Grade (ACG) refers to any quality or concentration of a COI offered for commercial sale that a facility uses, stores, manufactures or ships.

*If the answer to question [Q:1.1-65], "Choose the facility type that best describes your facility" is Petroleum refinery or Liquefied natural gas storage, go to [Theft/Diversions WME](#) (page 75)*

*If "No" selected for all chemicals, go to [Theft/Diversions EXP/IEDP](#) (page 62)*

Tritonal	54413-15-9	ACG	5,000 lbs	<input type="checkbox"/>	<input type="checkbox"/>

The list above has been reviewed and all chemicals of interest that the facility either currently possesses or possessed within the past 60 days at or above the screening threshold quantity have been indicated by selecting "Yes."

[Q:4.0-711]

Yes No

**Release Explosive Chemicals of Interest - Detail**

Enter the total on-site quantity of the release explosive chemical of interest in pounds. Enter the quantity of the release explosive COI in the Area of Highest Quantity in pounds.

The total on-site quantity is the highest amount that the facility either currently possesses or possessed within the past 60 days. The Area of Highest Quantity (AHQ) is defined as an on-site area, with a radius of 170 feet, where the greatest amount of the release explosive COI is either currently present or has been present at any one time within the past 60 days. This amount may differ from the total on-site quantity. For release explosive COI, AHQ should be reported as an **aggregate amount of all release explosive COI located within the AHQ**. See the downloadable [Top-Screen Users Manual](#) for instructions. **Round both quantities to two significant digits** (e.g., round 247500 pounds to 250000 pounds, and round 7625 pounds to 7600 pounds). Do not use commas when entering data.

Chemical Name	CAS#	Min. Conc.	Screening Threshold Quantity	Total On-site Quantity (pounds) [Q:4.1-712]	Quantity in AHQ (pounds) [Q:4.1-2795]
Ammonium nitrate, [with more than 0.2 percent combustible substances, including any organic substance calculated as carbon, to the exclusion of any other added substance]	6484-52-2	ACG	5,000 lbs		
Ammonium perchlorate	7790-98-9	ACG	5,000 lbs		
Ammonium picrate	131-74-8	ACG	5,000 lbs		
Barium azide	18810-58-7	ACG	5,000 lbs		
Diazodinitrophenol	87-31-0	ACG	5,000 lbs		
Diethyleneglycol dinitrate	693-21-0	ACG	5,000 lbs		
Dingu [Dinitroglycoluril]	55510-04-8	ACG	5,000 lbs

## Theft/Diversion EXP/IEDP

### Theft/Diversion Explosive/IED Precursor (EXP/IEDP) Chemicals of Interest

The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

Do you manufacture, process, use, store, or distribute at the facility A Commercial Grade (including A Commercial Grade at or above any specified minimum concentration) of any of the following theft/diversion explosive/IED precursor chemicals of interest?

Check "Yes" if the facility either currently possesses or possessed within the past 60 days A Commercial Grade of the COI at or above the screening threshold quantity in transportation packaging.

*(The default settings on this list indicate that the chemicals are NOT currently present on site nor have been onsite within the past 60 days. At the end of the list, you must indicate that these settings have been changed as applicable to the facility.)*

These chemicals were determined by the US Department of Homeland Security to be a potential security risk at "high risk chemical facilities" as defined in Section 550 the Department of Homeland Security Act of 2007. A facility should indicate which COI it either currently possesses or possessed within the past 60 days at or above the screening threshold quantity.

Transportation packaging, as defined by 49 CFR § 171.8 includes, but is not limited to, cylinders, bulk bags, bottles (inside or outside a box), cargo tanks, and/or tank cars.

A Commercial Grade (ACG) refers to any quality or concentration of a COI offered for commercial sale that a facility uses, stores, manufactures or ships.

If "No" selected for all chemicals, go to [Theft/Diversion WME](#) (page 75)

The list above has been reviewed and all chemicals of interest that the facility either currently possesses or possessed within the past 60 days at or above the screening threshold quantity have been indicated by selecting "Yes."

[Q:5.0-714]

Yes No

## Theft/Diversion Explosive/IED Precursor Chemicals of Interest - Detail

Check if the chemical is available in portable, bulk transportation, or bulk storage containers.

A portable package can either be man-portable being movable by 1-3 people without the aid of powered mechanical devices or mechanically portable with the aid of a fork lift, truck or crane.

Bulk transportation containers include tank cars, rail cars and other large storage containers that could be hitched to a vehicle for removal from a site.

# CSAT Top-Screen Questions

OMB No. 1670-0007  
Expires: 2/29/2008

Bulk storage refers to a package or container from which the COI could be safely transferred into a portable package or container.

Chemical Name	CAS#	Min. Conc.	Screening Threshold Quantity	Portable [Q:5.1-233]	Bulk Transport [Q:5.1-234]	Bulk Storage [Q:5.1-235]
Aluminum (powder)	7429-90-5	ACG	100 lbs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Theft/Diversion WME

### Theft/Diversion Weapons of Mass Effect (WME) Chemicals of Interest

The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

**Do you manufacture, process, use, store, or distribute at the facility any of the following theft/diversion WME chemicals of interest?**

Check "Yes" if the facility either currently possesses or possessed within the past 60 days the COI at or above the screening threshold quantity in transportation packaging.

*(The default settings on this list indicate that the chemicals are NOT currently present on site nor have been onsite within the past 60 days. At the end of the list, you must indicate that these settings have been changed as applicable to the facility.)*

These chemicals were determined by the US Department of Homeland Security to be a potential security risk at "high risk chemical facilities" as defined in Section 550 the Department of Homeland Security Act of 2007. A facility should indicate which COI it either currently possesses or possessed within the past 60 days at or above the screening threshold quantity.

Transportation packaging, as defined by 49 CFR § 171.8 includes, but is not limited to, cylinders, bulk bags, bottles (inside or outside a box), cargo tanks, and/or tank cars.

A Commercial Grade (ACG) refers to any quality or concentration of a COI offered for commercial sale that a facility uses, stores, manufactures or ships.

If "No" selected for all chemicals, go to [Theft/Diversion CW/CWP](#) (page 85)

## Theft/Diversion CW/CWP

### Theft/Diversion of Chemical Weapons/Chemical Weapon Precursors (CW/CWP) Chemicals of Interest

The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

**Do you manufacture, process, use, store, or distribute at the facility any of the following theft/diversion CW/CWP chemicals of interest?**

Check "Yes" if the facility either currently possesses or possessed within the past 60 days the COI at or above the screening threshold quantity in transportation packaging.

*(The default settings on this list indicate that the chemicals are NOT currently present on site nor have been onsite within the past 60 days. At the end of the list, you must indicate that these settings have been changed as applicable to the facility.)*

These chemicals were determined by the US Department of Homeland Security to be a potential security risk at "high risk chemical facilities" as defined in Section 550 the Department of Homeland Security Act of 2007. A facility should indicate which COI it either currently possesses or possessed within the past 60 days at or above the screening threshold quantity.

NOTE: The STQ for chemical weapons is a cumulative 100 grams (CUM 100g). In order to determine whether or not a facility meets or exceeds this STQ, a facility must total the amount of any and all chemical weapons it possesses or possessed toward the single STQ of CUM 100 g which applies to all chemical weapons.

Transportation packaging, as defined by 49 CFR § 171.8 includes, but is not limited to, cylinders, bulk bags, bottles (inside or outside a box), cargo tanks, and tank cars.

*If the answer to question [Q:1.1-65], "Choose the facility type that best describes your facility" is Refinery or Liquefied Natural Gas Storage, or if "No" selected for all chemicals, go to [Sabotage/Contamination Chemicals](#) (page 96)*

The list above has been reviewed and all chemicals of interest that the facility either currently possesses or possessed within the past 60 days at or above the screening threshold quantity have been indicated by selecting "Yes."

[Q:7.0-721]

Yes No

**Theft/Diversions Chemical Weapons/Chemical Weapon Precursors (CW/CWP) Chemicals of Interest - Details**

Check if the chemical is available in portable, bulk transportation, or bulk storage containers.

A portable package can either be man-portable being movable by 1-3 people without the aid of powered mechanical devices or mechanically portable with the aid of a fork lift, truck or crane.

Bulk transportation containers include tank cars, rail cars and other large storage containers that could be hitched to a vehicle for removal from a site.

Bulk storage refers to a package or container from which the COI could be safely transferred into a portable package or container.

Chemical Name	CAS#	Min. Conc.	Screening Threshold Quantity	Portable [Q:7.1-260]	Bulk Transport [Q:7.1-261]	Bulk Storage [Q:7.1-262]

## Sabotage/Contamination Chemicals

### Sabotage/Contamination Chemicals of Interest

The presence or amount of a particular chemical is not the sole factor in determining whether a facility presents a high level of security risk. This information informs the subsequent parts of the Department's assessment. The Department will use its best judgment and all available information in determining whether a facility presents a high level of security risk.

**Does the facility ship or has it shipped any of the following chemicals of interest in a placarded amount?**

A facility meets or exceeds the STQ for a sabotage/contamination chemical of interest if it ships or has shipped the chemical and is or was required to placard the shipment of that chemical pursuant to the provisions of subpart F of 49 CFR part 172.

*(The default settings on this list indicate that the chemicals are NOT currently present on site nor have been onsite within the past 60 days. At the end of the list, you must indicate that these settings have been changed as applicable to the facility.)*

These chemicals were determined by the US Department of Homeland Security to be a potential security risk at "high risk chemical facilities" as defined in Section 550 the Department of Homeland Security Act of 2007. A facility should indicate which COI it either currently possesses or possessed within the past 60 days at or above the screening threshold quantity.

A Commercial Grade (ACG) refers to any quality or concentration of a COI offered for commercial sale that a facility uses, stores, manufactures or ships.

A Placarded Amount (APA) refers to the STQ for a sabotage and contamination chemical of interest, as calculated in accordance with § 27.203(d). If "No" selected for all chemicals, go to *Mission Critical Chemicals* (page 103)

## CSAT Top-Screen Questions

OMB No. 1670-0007  
Expires: 2/29/2008

**The list above has been reviewed and all chemicals of interest that the facility either currently possesses or possessed within the past 60 days at or above the screening threshold quantity have been indicated by selecting "Yes."**

[Q:8.1-718]

Yes No

## Mission Critical Chemicals

### Mission Critical Chemical Production

Does this facility account for 20% or more of the domestic production of any chemical AND supply the chemical to one or more of the following critical infrastructure sectors: Defense Industrial Base, Energy (electricity generation only), Public Health or Healthcare, and/or Public Drinking Water? The facility should answer this question for chemicals listed in Appendix A, as well as for those not listed in Appendix A.

[Q:9.0-692]

- Yes
- No

▲ This question should be answered "Yes" if this facility accounts for 20% or more of the domestic production of a chemical to one or more critical infrastructure sectors. A single facility may produce more than one chemical that meets the criteria.

If answered "No", go to [Economically Critical Chemicals](#) (page 107)

For each chemical, copy the following pages (104-106) and answer the following fields:

- "Chemical Name"
- "Enter the CAS# (if available)"
- "Is there another common name for this chemical?"
- "Select the facility's estimated domestic market share of this chemical."
- "What is the primary application of this chemical by this facility's customer(s)?"
- "Indicate the primary sector(s) for which this facility produces this chemical."
- "Exact (or direct) substitute(s) for this chemical produced to meet the supply needs of this facility's customer(s)"
  - Is there North American production?
  - Is there overseas production?
- "Functional substitute(s) for this chemical produced to meet the supply needs of this facility's customer(s)"
  - Is there North American production?
  - Is there overseas production?
- "What is this facility's estimated annual average Capacity Utilization Rate for this chemical?"
- "What is this facility's estimated National Emergency Production Rate for this chemical?"
- "What is the total annual production of this chemical (in pounds/year) from this facility?"
- "What is the estimated replacement cost of the production unit(s) for this chemical at this facility?"

After the above information has been entered, go to [Economically Critical Chemicals](#) (page 107)

**Enter the chemical name(s) that account for 20% of the domestic production to one or more critical infrastructure sectors. The critical infrastructure sectors are defined as Defense Industrial Base, Energy (electric generation only), Public Health and Healthcare, or Public Drinking Water.**

*For each chemical, enter the appropriate information.*

**Chemical Name**

[Q:9.1-693]

**Enter the CAS# (if available).**

**CAS#** [Q:9.3-852]

**Is there another common name for this chemical?**

[Q:9.3-733]

Enter another common name for this chemical.

▲ This question is optional if you provided a CAS#.

**Select the facility's estimated domestic market share of this chemical.**

[Q:9.3-734]

- 20% - 29%
- 30% - 39%
- 40% - 50%
- 50% - 99%
- 100%

**What is the primary application of this chemical by this facility's customer(s)?**

[Q:9.3-737]

**Indicate the primary sector(s) for which this facility produces this chemical. Check all that apply.**

[Q:9.3-1131]

- Defense Industrial Base
- Public Health or Healthcare
- Energy (electric generation only)
- Public Drinking Water

**Exact (or direct) substitute(s) for this chemical produced to meet the supply needs of this facility's customer(s):**

Is there North American production? [Q:9.4-755]  Yes  No

Is there overseas production? [Q:9.4-756]  Yes  No

**Functional substitute(s) for this chemical produced to meet the supply needs of this facility's customer(s):**

Is there North American production? [Q:9.4-759]  Yes  No

Is there overseas production? [Q:9.4-760]  Yes  No

**What is this facility's estimated annual average Capacity Utilization Rate for this chemical?**

**Capacity Utilization Rate** [Q:9.5-762]

- < 50%
- 50% - 69%
- 70% - 89%
- >= 90%

Explain: "Capacity Utilization Rate" (operating rate) is estimated by dividing the average amount of the chemical produced over the previous two years by the amount that could have been produced if the facility had been operating at full capacity during that period. The rate may be derived from the information your facility may have already provided as part of the U.S. Census Bureau's Annual Plant Capacity Utilization Survey (form MQ-C1, question 2c). The survey and instructions are available at <http://www.census.gov/cir/www/mqc1pag2.html>. Assumptions that should be used for estimating this rate are available in the related downloadable guidance on the DHS website.

**What is this facility's estimated National Emergency Production Rate for this chemical?**

**Emergency Production Rate** [Q:9.5-763]

- < 50%
- 50% - 69%
- 70% - 89%
- >= 90%

**Explain:** The National Emergency Production Rate is estimated by dividing the average amount of chemical produced over the previous two (2) years by the amount that could have been produced if the plant had been operating under national emergency conditions during that period. The rate may be derived from the information your facility may have already provided as part of the U.S. Census Bureau's Annual Plant Capacity Utilization Survey (form MQ-C1, question 2c). The survey and instructions are available at <http://www.census.gov/cir/www/mqc1pag2.html>. Assumptions that should be used for estimating this rate are available in the related downloadable guidance on the DHS website. Your rate of production at national emergency levels should be greater than or equal to the rate of full production capacity.

**What is the total annual production of this chemical (in pounds/year) from this facility?**

**Annual Production** [Q:9.5-764]

**Explain:** This information is similar to that which is reported under EPA's Inventory Update Rule (for updating the Toxic Substances Control Act Chemical Inventory Database) for those organic and inorganic substances manufactured or imported in quantities of 25,000 pounds per site per reporting year. Report production only, not imports. If your chemical is not on the TSCA Inventory, provide an estimate of your annual production.

**What is the estimated replacement cost of the production unit(s) for this chemical at this facility?**

**Replacement Cost(s) of Production Units** [Q:9.5-765]

- > \$1,000,000,000
- \$750,000,000 - \$1,000,000,000
- \$500,000,000 - \$749,999,999
- \$100,000,000 - \$499,999,999
- \$50,000,000 - \$99,999,999
- \$25,000,000 - \$49,999,999
- \$12,000,000 - \$24,999,999
- \$6,000,000 - \$11,999,999
- < \$6,000,000

**Explain:** Replacement Costs apply to the production unit(s) related to the manufacture of this chemical and any other onsite property likely to be damaged beyond repair that would need to be replaced to restore the original functionality of the unit or equipment to its design productivity levels. The economic value to repair or replace the damaged or destroyed unit(s) and its associated equipment, plus the economic value of any lost products, should be estimated in US dollars. For the purposes of this analysis use the historic (undepreciated) cost of the facility property plus the undepreciated value of betterments/improvements (excluding maintenance and repair) to the production unit less the amount that is covered by insurance.

**Have you listed all chemicals for which the facility accounts for 20% or more of domestic production and are supplied to the aforementioned critical infrastructure sectors?**

[Q:9.1-2772]

**Yes**

Go to *Economically Critical Chemicals* (page 107)

## Economically Critical Chemicals

### Economically Critical Chemical Production

**If you are a manufacturer, what is the total value of products shipped and other receipts from the facility? (In dollars - number without dollar sign or commas)  
If you are not a manufacturer, please enter "0".)**

[Q:10.0-3092]

▲ The total value will be the same as that provided in the Annual Survey of Manufactures (conducted annually for a sample of manufacturing sectors every year except those ending in "2" and "7") or in the Economic Census (a survey of all manufacturing sectors conducted only in years ending in "2" and "7"). Information and sample forms are available by searching for the survey names at the Census Bureau website <http://www.census.gov/index.html>. Facilities may provide the response from a recent Census Bureau survey if the information accurately reflects current facility operations.

**Does this facility account for 35% or more of the domestic production of any chemical (including Appendix A and non-Appendix A chemicals) and supply the chemical(s) to any sector of the US economy excluding these critical infrastructure sectors: Defense Industrial Base, Energy (electricity generation only), Public Health or Healthcare, and/or Public Drinking Water?**

[Q:10.0-771]

Yes

No

▲ This question should be answered "Yes" if this facility accounts for 35% or more of the domestic production of a chemical and this chemical is not supplied to Defense Industrial Base, Energy (electricity generation only), Public Health or Healthcare, and/or Public Drinking Water.  
If answered "No", go to page 113

For each chemical, copy the following pages (109-112) and answer the following fields:

- "Chemical Name"
- "Enter the CAS# (if available)"
- "Is there another common name for this chemical?"
- "Select the facility's estimated domestic market share of this chemical."
- "What is the application(s) of this chemical by this facility's customer(s)?"
- "Enter other application(s) of this chemical by this facility's customer(s) that were not listed on the previous page."
- "Indicate the primary sector(s) for which this facility produces this chemical."
- "Enter other primary sector(s) for which this facility produces this chemical that was not listed on the previous page."
- "Exact (or direct) substitute(s) for this chemical produced to meet the supply needs of this facility's customer(s)"
  - Is there North American production?
  - Is there overseas production?

## CSAT Top-Screen Questions

OMB No. 1670-0007  
Expires: 2/29/2008

- 
- *“Functional substitute(s) for this chemical produced to meet the supply needs of this facility’s customer(s)”*
    - *Is there North American production?*
    - *Is there overseas production?*
  - *“What is this facility’s estimated annual average Capacity Utilization Rate for this chemical?”*
  - *“What is this facility’s estimated National Emergency Production Rate for this chemical?”*
  - *“What is the total annual production of this chemical (in pounds/year) from this facility?”*
  - *“What is the estimated replacement cost of the production unit(s) for this chemical at this facility?”*

**Enter the name of the chemical(s) for which the facility accounts for 35% or more of domestic production excluding chemical(s) produced for the critical infrastructure sectors: Defense Industrial Base, Energy (electricity generation only), Public Health or Healthcare, and/or Public Drinking Water.**

*For each chemical, enter the appropriate information.*

**Chemical Name**

[Q:10.1-772]

**Enter the CAS# (if available).**

**CAS#** [Q:10.2-860]

**Is there another common name for this chemical?**

[Q:10.2-872]

Enter another common name for this chemical.

▲ This question is optional if you provided a CAS# above.

**Select the facility's estimated domestic market share of this chemical.**

[Q:10.2-873]

- 35% - 49%
- 50% - 75%
- 76% - 99%
- 100%

**What is the application(s) of this chemical by this facility's customer(s)? Check all that apply.**

[Q:10.3-793]

- Adhesive or Sealant
- Catalyst
- Coating
- Cosmetic additive
- Electronic chemical
- Fine chemical
- Flavor or fragrance
- Food additive
- Functional fuel or lubricant additive
- Institutional or industrial cleaner
- Oilfield chemical

## CSAT Top-Screen Questions

OMB No. 1670-0007  
Expires: 2/29/2008

- Paper additive
- Plastic additive
- Plastic compounding
- Rubber processing chemical
- Water management chemical
- Pharmaceutical (active ingredient)
- Consumer product (e.g., soaps, cosmetics, toiletries)
- Check for other application(s) not listed. [Q:10.3-911]

**Enter other application(s) of this chemical by this facility's customer(s) that were not listed on the previous page.**

[Q:10.4-912]

**Indicate the primary sector(s) for which this facility produces this chemical. Check all that apply.**

[Q:10.5-794]

- Agriculture and food
- Energy (except electric generation)
- National Monuments and Icons
- Banking and Finance
- Public Water Treatment Systems (not drinking water systems)
- Commercial facilities
- Dams, Locks & Levees
- Emergency Services
- Commercial Nuclear Reactors, Materials and Wastes
- Information Technology
- Telecommunications
- Postal and Shipping
- Transportation Systems
- Government Facilities
- Check for other primary sector(s) not listed. [Q:10.5-914]

**Enter other primary sector(s) for which this facility produces this chemical that was not listed on the previous page.**

[Q:10.6-915]

**Exact (or direct) substitute(s) for this chemical produced to meet the supply needs of this facility's customer(s):**

Is there North American production? [Q:10.7-815]  Yes  No

Is there overseas production? [Q:10.7-816]  Yes  No

**Functional substitute(s) for this chemical produced to meet the supply needs of this facility's customer(s):**

Is there North American production? [Q:10.7-812]  Yes  No

Is there overseas production? [Q:10.7-813]  Yes  No

**What is this facility's estimated annual average Capacity Utilization Rate for this chemical?**

**Capacity Utilization Rate** [Q:10.8-818]

- < 50%
- 50% - 69%
- 70% - 89%
- >= 90%

Explain: "Capacity Utilization Rate" (operating rate) is estimated by dividing the average amount of the chemical produced over the previous two years by the amount that could have been produced if the facility had been operating at full capacity during that period. The rate may be derived from the information your facility may have already provided as part of the U.S. Census Bureau's Annual Plant Capacity Utilization Survey (form MQ-C1, question 2c). The survey and instructions are available at <http://www.census.gov/cir/www/mqc1pag2.html>. Assumptions that should be used for estimating this rate are available in the related downloadable guidance on the DHS website.

**What is this facility's estimated National Emergency Production Rate for this chemical?**

**Emergency Production Rate** [Q:10.8-820]

- < 50%
- 50% - 69%
- 70% - 89%
- >= 90%

Explain: The National Emergency Production Rate is estimated by dividing the average amount of chemical produced over the previous two (2) years by the amount that could have been produced if the plant had been operating under national emergency conditions during that period. The rate may be derived from the information your facility may have already provided as part of the U.S. Census Bureau's Annual Plant Capacity Utilization Survey (form MQ-C1, question 2c). The survey and instructions are available at <http://www.census.gov/cir/www/mqc1pag2.html>. Assumptions that should be used for estimating this rate are available in the related downloadable guidance on the DHS website. Your rate of production at national emergency levels should be greater than or equal to the rate of full production capacity.

**What is the total annual production of this chemical (in pounds/year) from this facility?**

**Annual Production**

[Q:10.8-821]

Explain: This information is similar to that which is reported under EPA's Inventory Update Rule (for updating the Toxic Substances Control Act Chemical Inventory Database) for those organic and inorganic substances manufactured or imported in quantities of 25,000 pounds per site per reporting year. Report production only, not imports. If your chemical is not on the TSCA Inventory, provide an estimate of your annual production.

**What is the estimated replacement cost of the production unit(s) for this chemical at this facility?**

**Replacement Cost(s) of Production Units** [Q:10.8-822]

- > \$1,000,000,000
- \$750,000,000 - \$1,000,000,000
- \$500,000,000 - \$749,999,999
- \$100,000,000 - \$499,999,999
- \$50,000,000 - \$99,999,999
- \$25,000,000 - \$49,999,999
- \$12,000,000 - \$24,999,999
- \$6,000,000 - \$11,999,999
- < \$6,000,000

Explain: Replacement Costs apply to the production unit(s) related to the manufacture of this chemical and any other onsite property likely to be damaged beyond repair that would need to be replaced to restore the original functionality of the unit or equipment to its design productivity levels. The economic value to repair or replace the damaged or destroyed unit(s) and its associated equipment, plus the economic value of any lost products, should be estimated in US dollars. For the purposes of this analysis use the historic (undepreciated) cost of the facility property plus the undepreciated value of betterments/improvements (excluding maintenance and repair) to the production unit less the amount that is covered by insurance.

**Have you listed all chemicals for which the facility accounts for 35% or more of domestic production and are supplied to other than the aforementioned critical infrastructure sectors?**

[Q:10.1-2774]

- Yes**

## **Finish**

### **DHS Communications**

A letter with the preliminary tiering will be sent to the Submitter.

### **Preparer Copy**

**Do you want a copy of the letter with the preliminary tiering to be sent to the Preparer in addition to the Submitter?**

[Q:15.3-931]

- Yes
- No

### **Submission Statement**

**My statements in this submission are true, complete, and correct to the best of my knowledge and belief and are made in good faith. I understand that a knowing and willful false statement on this form can be punished by fine or imprisonment or both. (See section 1001 of title 18, United States Code).**
