Survey Summary

November 2008

# FEDERAL WAGE SYSTEM

## LOCALITY SURVEY OF BLUE-COLLAR OCCUPATIONS

### INTRODUCTION

The Federal Wage System (FWS) was established by law in 1972 and calls for paying Federal blue-collar workers wages which approximate local prevailing private sector rates for comparable skill levels. With the exception of employees of the Postal Service, Tennessee Valley Authority, and other similar government corporations, most Federal civilian blue-collar workers are covered by the FWS. There are approximately two hundred fifty thousand FWS employees nationwide.

### GEOGRAPHIC COVERAGE

The United States is divided into local wage areas for FWS pay setting purposes. These wage areas are established where there are large concentrations of FWS employment along with concentrations of private industry employment. Each wage area consists of a survey area (counties in which wage data are collected) and the adjacent area of application (counties where the FWS wage schedule is applied in addition to the survey area). The survey area is usually centered on a Metropolitan Statistical Area.

### INDUSTRY COVERAGE

FWS surveys cover a standard set of industries which includes manufacturing, wholesale trade, selected transportation industries and utilities. Other industries may be added if they have significant employment similar to local FWS employment. Firms with fewer than fifty employees are not included in the survey. In small survey areas, all firms meeting the industry and size specifications are contacted. This is referred to as a universe survey. In larger areas where this is not practical a sample survey is conducted; and the results are weighted to represent all the firms within the scope of the survey.

### OCCUPATIONAL COVERAGE

A standard set of 21 blue-collar jobs representing common FWS occupations and skill levels are surveyed in each area. In some areas, additional jobs are added if there is significant FWS employment in these kinds of jobs. Sometimes jobs are also added to obtain data for use in other areas. The tables in this summary may not cover all the jobs surveyed since jobs where fewer than three firms providing data are not shown.

The following provides information on FWS employment, geographic survey area boundaries, and survey industry coverage in your locality.

Type of survey: Statistical Sample

Number of establishments represented by survey: 175

Federal blue-collar FWS employment in the wage area: 1,127

Major FWS employer: Defense Logistics Agency

For industries surveyed see industry coverage.
