## KANSAS AGRICULTURAL STATISTICS PROCEDURES AND STAFF

It is a pleasure to present the 2007 edition of the Annual Farm Facts Report. This publication is a cooperative effort between the USDA – National Agricultural Statistics Service's Kansas Field Office, and the Kansas Department of Agriculture.

The Annual Report is published each year to meet the diverse needs for a reliable reference book on agricultural production, prices, farm income, and various other economic data within the State.

The data in this publication were made possible by the voluntary cooperation of the Kansas farmers and agribusiness who responded to our surveys. A special thanks to each producer and agribusiness who provided data on one of our surveys. We believe that the best source of agricultural data is from producers and agribusinesses.

The survey data were collected by mail, telephone interviews, personal interviews, and in-the-field observations. Most estimates are based on probability sample surveys. That is, information collected from a scientifically selected sample of all producers is used to estimate the activities of the entire group. Sampling is not only less costly in time and money than a complete count, but can be more accurate because reporting errors and data-handling errors are minimal compared to those in a complete count or census.

Kansas Agricultural Statistics staff includes highly trained agricultural statisticians with farm backgrounds and extensive experience in Kansas and other states, a support staff of statistical assistants, computer personnel, and printing-mailing specialists. Eddie Wells is the Deputy Director. Lead Statistician for Estimates is Bob White. Estimate Statisticians include Quentin Wearne, Dan Kolterman, Stephen Habets and Nick Pallotta. The Lead Statistician for Surveys is Joel Golz. Survey Statisticians include Matt Gregg, Sherri Hand, Darin Twete, and Arcus Pierce, assisted by Research Analyst Dona Ratliff. Candace S. Thomas provides research and editorial assistance while Rita Smith is our designer and Desktop Publisher. In addition, field and telephone staffs of part-time National Association of State Department of Agriculture (NASDA) interviewers, working under the direction of NASDA supervisors, collect data by personal and telephone interview. The office staff and crew of enumerators join me in thanking the many farmers and agri-business firms who provide the data and assist in planning our program of statistics.

Eldon J. Thiessen  
Director

## 2007 KANSAS AGRICULTURAL HIGHLIGHTS

Price wise, 2007 was a fantastic year for Kansas Agriculture. Wheat, corn, sorghum, and soybeans set new record highs for marketing year average price per bushel and farm value. Corn production set a new record high for the State, while the yield for sorghum grain tied the previous record highs set in 1992 and 1998. Cash receipts for all cattle and calves set another new record in 2007. Cattle price also set a new record. The number of cattle and calves on farms and ranches on January 1 was up from last year and tied for third largest on record. The December 1 hog inventory was also up from the previous year and at its highest level since 1980, with cash receipts being the second highest on record. Yearly prices for all hay and other hay were above last year, while the yearly price for alfalfa was below 2007. The value of all farmland and buildings continued their upward trend and was 16 percent above 2006.

Wheat seeding began the first week of September and progressed slightly behind average throughout the month. Dry weather the first week of October enabled farmers to push seedings to 75 percent complete, 3 percent ahead of the 5-year average. By October 29th, 96 percent of the wheat had been seeded. Ninety-eight percent of the crop had emerged by November 19th. Soil moisture conditions remained dry throughout the fall. As of November 26th, 63 percent of the topsoil moisture and 74 percent of the subsoil moisture was rated short to very short. Despite the shortage of soil moisture, condition was rated 51 percent good to excellent on November 26th. The winter months brought cold temperatures and increased snowfall compared to the prior year. The snow improved soil moisture conditions and as of March 18th, 85 percent of topsoil moisture was rated adequate to surplus and 75 percent of subsoil was rated adequate to surplus. Wheat condition was rated 70 percent good to excellent. Temperatures dropped below freezing for most areas the week ending April 8th, with some areas experiencing record lows. The State experienced moderate temperatures with scattered showers during the month of May. Heavy rains, up to 7 inches, fell in the central part of the State both the first and last weeks of the month. Disease presence was a concern with 38 percent of the crop considered to have moderate to severe presence at the end of May. Wheat headed was behind the 5-year average the first two weeks of the month but was near average at 97 percent headed at the end of May. Turning was behind the 5-year average with 36 percent of the crop turned at the end of May. The majority of harvest was delayed until the third week of June, primarily in the eastern third and the south central parts of the State due to precipitation. The southeast district received heavy rain resulting in flooding the last week of June. As of July 1, harvest was 59 percent complete compared to 93 percent last year and 82 percent for the 5-year average. Harvest was nearly complete across most of the State by the second week of July. Scattered showers the first two weeks of the month continued to hinder harvest in the southeast district area of the State.

Wheat production in 2007 was 283.8 million bushels, 3 percent below the 2006 crop of 291.2 million bushels. The yield, at 33 bushels per acre, was up 1 bushel from a year earlier. The acreage harvested for grain, at 8.60 million acres, was down 5 percent from 2006. Prices for wheat remained above 2006 all year. The months of July through December set new record highs surpassing the previous records set back in 1995 and 1996. The preliminary marketing year average price, at \$6.20 per bushel, was up \$1.64 from 2006 and generated a value of production of \$1.760 billion, 33 percent above the previous year. Both the marketing year average price and value of production set new record highs. Kansas also lost its first place status as the number one wheat state in the Nation to North Dakota in 2007.

Seeding of the 2008 wheat acres began early in September and progressed behind average throughout the fall. Soil moisture was mostly adequate throughout the fall. The major growing areas of the State did not receive a good soaking rain during the fall and seeding was nearly complete by the first week of November. Topsoil moisture at the end of November was rated 47 percent adequate to surplus while subsoil moisture was rated 55 percent adequate to surplus. Wheat emergence also progressed behind normal throughout the season. By November 25, 96 percent of the crop had emerged. Wheat condition was rated 3 percent excellent, 40 percent good, 42 percent fair, 13 percent poor, and 2 percent very poor by the end of November.

Wet conditions during April and May kept the 2007 corn planting progress well behind the average. By May 6, only 49 percent of the corn acreage had been planted compared to the average of 73 percent for that date. Corn planting was completed by the end of May. Crop development lagged slightly behind the average early in the growing season due to the later planting. Mostly adequate soil moisture conditions during the growing season allowed corn to progress well with the condition for the majority of the crop rated as good or excellent. Corn harvest began in late August. On August 26<sup>th</sup>, the crop was rated 10 percent very poor to poor, 28 percent fair, and 62 percent good to excellent. Harvest progressed steadily throughout the fall, and was virtually complete by November.

Corn production was 518.0 million bushels, up 50 percent from last year and set a new record. The previous record was 465.8 million bushels set in 2005. The 2007 yield was 140 bushels per acre, 25 bushels above the previous year. Acreage harvested for grain, at 3.90 million, was up 16 percent from 2006. This was the seventeenth year in a row that corn production exceeded sorghum production. Prices for corn remained above 2006 all year and set new records for October, November, and December. Based on the preliminary 2007 marketing year average price of \$4.00 per bushel, the value of production for the 2007 corn crop was \$2.072 billion, 95 percent above the 2006 value. Both the marketing year average price and value of production set new record highs. Corn acres harvested for silage was 140,000 acres, down 160,000 acres from last year.

Sorghum planting progress was also behind normal nearly all spring. By July 8, planting was nearly complete and 84 percent of the crop had emerged. Seventy-three percent of the crop was rated in good to excellent condition at that time. The State received heavy precipitation from May through July and became dry in August. Temperatures were hot, remaining in excess of 100 degrees the last part of July through August. By September 2, an estimated 67 percent of the crop remained in good to excellent condition which led to high yields compared to previous years. Harvest began in late September but remained behind average most of the fall due to the earlier delays in planting. However, by November 18, 97 percent of the crop had been harvested, compared to 88 percent for the 5-year average

Sorghum grain production was 212.0 million bushels in 2007, up 46 percent from the 2006 crop of 145.0 million bushels. The yield averaged 80 bushels per acre, up 22 bushels from the previous year and tied with the previous records set in 1992 and 1998. Harvested acreage for grain, at 2.65 million acres, was up 150,000 acres from 2006. Sorghum prices set new record highs for January, February, and September through December in 2007. The preliminary 2007 marketing year average price (\$3.98 per bushel) indicated a value of production of \$842.9 million, 73 percent above 2006 and also was a set new record high. Kansas retained its position as the number one sorghum grain producing State in the U.S. Sorghum acres harvested for silage were 80,000, up 20,000 acres from 2006.

Soybean planting progressed well behind last year and the 5-year average all spring with 57 percent planted on June 3<sup>rd</sup> compared to 75 percent last year and 71 percent for the 5 year average. Scattered showers fell during most of July and August but temperatures were hot throughout both months. By the end of the July, 72 percent of the crop was blooming and 34 percent was setting pods. While at the end of August, 94 percent of the crop was setting pods and 17 percent was dropping leaves. Topsoil moisture was 10 percent very short, 38 percent short, 51 percent adequate, and 1 percent surplus at that time. On October 1, 61 percent of the crop was rated as good to excellent condition and 11 percent had been harvested. Harvest picked up during November and moved ahead of both the 5 year average and last year.

Soybean production was 84.2 million bushels, down 15 percent from the last year's crop of 98.6 million. Yield, at 33 bushels per acre, was up 1 bushel from last year. Harvested acreage, at 2.55 million acres, was down 17 percent from last year's record of 3.08 million acres harvested. Planted acreage, at 2.60 million acres, was also down 17 percent from last year's record of 3.15 million acres planted. Soybean prices for year 2007 were above the previous year prices and set new record highs for September through December. Based on the preliminary marketing year average price of \$10.60 per bushel, the value of production for the 2007 crop was \$892.0 million, 42 percent above 2006. Both the marketing year average price and value of production set new record highs.

All hay production totaled 6.37 million tons, down 3 percent from 2006. Area harvested, at 2.90 million acres, was down 150,000 acres from the previous year. The preliminary marketing year average price of \$104.00 per ton indicated a value of production for the 2007 crop of \$602.8 million, down 4 percent from 2006. Grazing and stock water supplies were adequate across the State for 2007. Monthly prices for all hay in 2007 were at their highest level ever except for November and December.

All cattle and calves on farms and ranches on January 1, 2008, totaled 6.70 million head, up 300,000 head from January 1, 2007. The 5.35 million head of cattle marketed during 2007 was down 5 percent from the year earlier. Fed cattle marketings in 2007 were 5.14 million head, down 5 percent from the previous year. Cash receipts from the sale of cattle set a new record high \$6.32 billion, up 1 percent from last year's record of \$6.25 billion. Monthly cattle prices in 2007 were above last year except for January and February. March through September prices set new record highs, while October through December prices came in second to those posted in 2003. The 2007 calf crop, at 1.50 million head, was up 3 percent from last year.

The December 1, 2007 hog inventory in Kansas was 1.87 million head, 2 percent above the previous year. This was the largest December 1 hog inventory since 1980. Total cash receipts from hogs were \$406.9 million, up 9 percent from 2006 and down 2 percent from the record set in 1997 of \$414.8 million. Monthly hog prices in 2007 were mixed throughout the year.

## KANSAS' RANK IN U.S. AGRICULTURE, 2007

Crop or Livestock Item	Production or Number	Rank	Kansas Number as % of U.S. Total
Wheat Flour Milled .....	34,614,000 cwt.	1	8.3
Wheat Flour Milling Capacity .....	147,130 cwt.	1	9.6
Sorghum Grain Produced.....	212,000,000 bu.	1	42.0
Cattle Slaughtered .....	7,725,900 head	1	22.5
All Wheat Produced.....	283,800,000 bu.	2	13.7
Sorghum Silage Produced.....	1,120,000 tons	2	18.0
Cropland <sup>1/</sup> .....	29,542,022 acres	2	6.8
All Cattle and Calves on Farms, Jan. 1, 2008 .....	6,700,000 head	2	6.9
Cattle and Calves on Grain Feed, Jan. 1, 2008 .....	2,630,000 head	3	18.4
Red Meat Production by Com'l. Slaughter Plants .....	6,224,700,000 lbs.	3	12.8
Land in Farms .....	47,200,000 acres	3	5.1
Commercial Grain Storage Capacity, Dec. 1, 2007 .....	890,000,000 bu.	3	9.8
Sunflowers Produced .....	234,250,000 lbs.	3	8.1
All Other Hay (Excluding Alfalfa) Produced .....	3,570,000 tons	5	4.6
All Summer Potatoes Produced .....	1,789,000 cwt.	5	10.6
All Hay Produced.....	6,370,000 tons	6	4.2
Cash Receipts from Farm Marketings, 2007 <sup>2/</sup> .....	11,729,328,000 dol.	6	4.1
Irrigated Acres <sup>1/</sup> .....	2,678,277 acres	6	4.8
Exports of Farm Products, FY 2007 .....	3,834,800,000 dol.	6	4.7
All Beef Cows That Have Calved, Jan. 1, 2008.....	1,511,000 head	7	4.6
Corn Grain Produced.....	518,000,000 bu.	8	4.0
Hogs on Farms, Dec. 1, 2007.....	1,870,000 head	9	2.7
Alfalfa Hay Produced.....	2,800,000 tons	11	3.9
Soybeans Produced .....	84,150,000 bu.	11	3.3
All Market Sheep and Lambs, Jan.1, 2008.....	27,000 head	12	1.7
Corn Silage Produced .....	2,520,000 tons	14	2.4
All Sheep and Lambs on Farms, Jan. 1, 2008.....	98,000 head	15T	1.6
Dry Edible Beans Produced .....	138,000 cwt.	16	0.5
Upland Cotton Produced .....	50,000 bales	17	0.3
Oats Produced .....	1,330,000 bu.	18	1.5
All Meat & Other Goats, Jan. 1, 2008.....	27,400 head	19	1.1
Barley Produced.....	624,000 bu.	21	0.3
All Milk Goats, Jan. 1, 2008.....	3,850 head	26	1.3

<sup>1/</sup> Beginning with 1975, a farm is defined as any place with at least \$1,000 in annual sales of agricultural products. Between 1959 and 1975, a farm was defined as a place of 10 or more acres that had \$50 or more in annual sales of agricultural products or a place with fewer than 10 acres and annual sales of \$250 or more. Prior to 1959, a farm was defined as three acres or more with a value of farm products amounting to \$150 or more or fewer than three acres with sales of at least \$250. <sup>2/</sup> Land in farms estimates not available on an annual basis until 1950. NOTE: Complete data series available by request.

Year.....	1983	1866	1934	1913	1934	1889/1896	1866

<sup>1/</sup> Prior to 1926, no records kept on acres planted. <sup>2/</sup> Beginning in 1986, acres harvested for all purposes no longer included acres harvested as forage. <sup>3/</sup> Beginning in 1985, price per bushel is marketing year average price, which does not include an allowance for loans outstanding and government purchases. NOTE: Complete data series available by request.

## INDEX

<u>TABLE of CONTENTS.....</u>	i
<u>2007 AGRICULTURAL HIGHLIGHTS.....</u>	ii-iii
<u>GENERAL STATISTICS.....</u>	2-9
Agribusiness.....	5
Agricultural export shares.....	3
Agricultural statistics districts.....	Inside Back Cover
Commercial Grain Storage Capacity.....	4
Crops: acreage harvested and value, by county.....	6-7
Farms: number, by county.....	6-7
Feed: commercial, sales of..... mill feed produced.....	5 5
Fertilizer: sales.....	5
Flour production and value.....	5
Off-Farm Number of Grain Storage Facilities.....	4
Rank of Kansas agriculture.....	2
Stocks of Grain by Quarter.....	4
Value of livestock produced, by county.....	6-7
Weather data, by district and county.....	8-9
Weights and Measures.....	103
<u>CROP STATISTICS.....</u>	10-73
Corn: all, acres planted and harvested, by county.....	36-39
grain: acreage, yield, production and value, by county.....	36-39
irrigated and dryland grain production, by county.....	40-43
silage: acreage, yield, production and value, by county.....	44-47
Cotton: acreage, yield, production and value, by county .....	72
Dry Beans: acreage, yield, production and value, by county.....	73
Hay: Alfalfa: acreage, yield, production and value, by county.....	60-63
Other Hay: acreage, yield, production and value, by county.....	64-67
All Hay: acreage, yield, production and value, by county.....	68-71
Oats: acreage, yield, production and value, by district.....	72
Pasture: acres, by county, 2002 Census.....	70-71
Sorghum: all: acres planted and harvested, by county.....	24-27
grain: acreage, yield, production and value, by county.....	24-27
irrigated and dryland grain production, by county.....	28-31
silage: acreage, yield, production and value, by county.....	32-35
Soybeans: acreage, yield, production and value, by county.....	48-51
irrigated and dryland production, by county.....	52-55
State Summary: Acreage, yield, production, value, and number of farms.....	11
Sunflowers: all: acreage, yield, production, and value by county.....	56-57
oil & non oil: acreage, yield, production, and value, by district.	58-59
Wheat: acreage, yield, production and value, by county.....	12-15
summer fallow and continuous cropped grain production, by county	18-19, 22-23
irrigated and dryland grain production, by county.....	16-17, 20-21

<u>LIVESTOCK STATISTICS</u>	74-89
Cattle: calves born, by county.....	80-83
all cattle and calves, inventory and inventory value by county.....	80-83
beef cows, inventory, by county.....	80-83
commercial slaughter, by month.....	76
milk cows, inventory, by county.....	80-83
milk cows and production, by month.....	86
milk cows, production and value, by county.....	88-89
inventory, by classes.....	75
number of cattle operations.....	75
production, disposition, income.....	77
value of production, by county.....	84-85
Cattle on feed: classification and weight groups, by quarter.....	78
marketings and placements, by month.....	78
marketings - grain fed and other.....	77
marketings, by size group.....	77
inventory, by county.....	80-83
number of feedlots, by size group.....	77
Dairy: milk production and value.....	86
Hog: inventory and value, by district.....	87
inventory, by class.....	75
number of hog operations.....	75
pig crop, by district.....	87
production, disposition, income.....	79
value of production, by district.....	84-85
Honey: number of colonies, yield, production, stocks, price, and value.....	87
Sheep: inventory, by classes.....	75
number of sheep operations.....	75
lamb crop.....	75
production, disposition, income.....	79
Wool: production, price and value.....	79
 <u>ECONOMIC STATISTICS</u> .....	90-93
Farm income.....	91
Farmland values and rents.....	93
Income from farming, cash receipts, gross and net farm income.....	91
Production expenses.....	92
 <u>HISTORICAL STATISTICS</u> .....	94-100
Historical tables.....	95-100
corn: acreage, yield, production, price and value, 1870-2007.....	100
livestock, inventories and value, 1870-2008.....	96
number of farms and land in farms, 1900-2007.....	95
sorghum: acreage, yield, production, price and value, 1930-2007.....	98
soybeans: acreage, yield, production, price and value, 1925-2007.....	99
wheat: acreage, yield, production, price and value, 1890-2007.....	97

Bushel weights:  
Wheat & soybeans = 60 lbs.  
Corn, sorghum & rye = 56 lbs.  
Barley (grain) = 48 lbs  
Oats = 32 lbs.
