

April 2009

Supporting Statement
Citrus from Peru
OMB NO. 0579-0289

A. Justification

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection.

The United States Department of Agriculture is responsible for preventing plant pests and noxious weeds from entering the United States, preventing the spread of plant diseases not widely distributed into the United States, and eradicating those imported pests and noxious weeds when eradication is feasible.

Under the Plant Protection Act (7 U.S.C. 7701 – *et seq.*), the Secretary of Agriculture is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests new to the United States or not known to be widely distributed throughout the United States.

The regulations in “Subpart-Fruits and Vegetables” (7 CFR 319.56 through 319.56-48, referred to as the regulations), prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world, to prevent the introduction and dissemination of plant pests.

APHIS amended the fruits and vegetables regulations to allow the importation, under certain conditions, of fresh commercial citrus fruit (grapefruit, limes, mandarin oranges or tangerines, sweet oranges, and tangelos) from approved areas of Peru into the United States. Based on the evidence in a recent pest risk analysis, APHIS believes these articles can be safely imported from Peru, provided certain conditions are met.

This action provided for the importation of citrus from Peru into the United States while continuing to protect the United States against the introduction of plant pests.

APHIS is asking OMB to approve, for 3 years, its use of these information collection activities associated with its mission to relieve restrictions on the importation of grapefruit, limes, mandarin oranges, tangerines, sweet oranges, and tangelos, to prevent the spread of plant pests and diseases into the United States.

2. Indicate how, by whom, and for what purpose the information is used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

Foreign Phytosanitary Certificate – Each consignment of fruit must be accompanied by a phytosanitary certificate issued by the National Plant Protection Organization (NPPO) of Peru stating that the fruit has been inspected and found free of Ecdytoplopha aurantiana.

Recordkeeping (P.O.E.) – The NPPO of Peru, or its designated representative, must keep records that document the fruit fly trapping and control activities in areas that produce citrus for export to the United States. All trapping and control records kept by the NPPO of Peru or its designated representative must be made available to APHIS upon request for 5 years.

Grower Registration & Agreement – The production site where the fruit is grown must be registered for export with the NPPO of Peru, and the producer must sign an agreement with the NPPO of Peru whereby the producer agrees to participate in and follow the fruit fly management program established by the NPPO of Peru.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also, describe any consideration of using information technology to reduce burden.

APHIS has no control or influence over when foreign countries automate phytosanitary certificates.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purpose described in item 2 above.

The information APHIS collects is exclusive to its mission of preventing the entry of injurious plant pests, diseases, and noxious weeds and is not available from any other source.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

The information APHIS collects is the minimum needed to protect the United States from destructive plant pests while increasing the number and variety of fruits and vegetables that are imported from other countries. APHIS has determined that there are no small entities involved in this information collection.

6. Describe the consequences to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

If APHIS did not collect this information or if it was collected less frequently, APHIS could not verify that fruit was treated, verify that citrus canker, fruit flies, and other pests were destroyed by treatment, or that the treatment was adequate to prevent the risk of plant pests from entering the United States.

7. Explain any special circumstances that require the collection to be conducted in a manner inconsistent with the general information collection guidelines in 5 CFR 1320.5.

No special circumstances exist that would require this collection to be conducted in a manner inconsistent with the general information collection guidelines in 5 CFR 1320.5.

8. Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting form, and on the data elements to be recorded, disclosed, or reported. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, soliciting comments on the information collection prior to submission to OMB.

In 2007, APHIS held productive consultations with the following individuals concerning the information collection activities associated with its program to import citrus fruit from Peru.

Miguel Canala-Echeverria
General Manager
Association De Exportadores De Chile (ASOEX)
Cruz del Sur 133, Piso 2
Las Condes, Santiago, Chile
Tel. 56 2 206-6604

Orlando Morales Valencia
Chief, Plant Protection Department
Servicio Agricolay Ganadero (SAG)

On Tuesday, September 2, 2008, pages 51264-51265, APHIS published in the Federal Register a 60-day notice seeking public comments on its plans to request a 3-year renewal of this collection of information. No comments from the public were received.

9. Explain any decisions to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

This information collection activity involves no payments (other than appropriate, program-related payments) or gifts to respondents.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

No additional assurance of confidentiality is provided with this information collection. However, the confidentiality of information is protected under 5 U.S.C.552a.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and others that are considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

This information collection activity asks no questions of a personal or sensitive nature.

12. Provide estimates of the hour burden of the collection of information. Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated.

• **Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB Form 83-I.**

See APHIS Form 71 for hour burden estimates.

• **Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories.**

APHIS arrived at this figure by multiplying the hours of estimated response time (11,080 hours) by the estimated average hourly wage of the above respondents (\$12.05) = \$ 133,514.

The hourly rate is derived from the U.S. Department of Labor, Bureau of Labor Statistics May 2008 Report – Occupational Employment and Wages in the United States. See <http://www.bls.gov/oes/>

13. Provide estimates of the total annual cost burden to respondents or recordkeepers resulting from the collection of information, (do not include the cost of any hour burden shown in items 12 and 14). The cost estimates should be split into two components: (a) a total capital and start-up cost component annualized over its expected useful life; and (b) a total operation and maintenance and purchase of services component.

There is zero annual cost burden associated with capital and start-up costs, maintenance costs, and purchase of services in connection with this program.

14. Provide estimates of annualized cost to the Federal government. Provide a description of the method used to estimate cost and any other expense that would not have been incurred without this collection of information.

The estimated cost for the Federal Government is \$210,307.88 (see APHIS Form 79).

15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB Form 83-1.

There is an adjustment of 8,025 hours. Previous total burden hours was 3,055 hours, and there new total burden hours is **11,080 which is an increase due to an increase in the numbers of respondents.**

16. For collections of information whose results are planned to be published, outline plans for tabulation and publication.

APHIS has no plans to tabulate or publish the information APHIS collects.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

There are no USDA forms associated with this information collection.

18. Explain each exception to the certification statement identified in the "Certification for Paperwork Reduction Act."

APHIS is able to certify compliance with all the provisions in the Act.

B. Collections of Information Employing Statistical Methods

Statistical methods are not used in this information collection.
