

NOTE TO REVIEWER

This information collection submission under the Paperwork Reduction Act is to propose data elements to be collected in an individual record and used to calculate a quarterly report per the Final Rule for Priority of Service. Attached are the Supporting Statement, Individual Record Data Elements, and Quarterly Report format. The Supporting Statement provides a glossary of key terms, a description of the priority of service reporting framework, and collection and burden information. The attached Individual Data Elements and Quarterly Report format are not stand-alone forms; rather, they will be incorporated in existing information collection forms in the data system approved by OMB. In addition to this document, two other supplementary documents are included: 1) a Fact Sheet summarizing the Final Rule and 2) a Sample Data Collection Form that exemplifies how the data could be collected.

Background: The intent of the priority of service provision is to ensure that covered persons have access to and receive priority in receiving the full array of services available from Department of Labor (DOL)-funded programs/grants operated either independently or through the One-Stop service delivery system. There are two contexts within which priority of service applies – individual programs and grants and the integrated One-Stop service delivery system. For purposes of this Information Collection Request (ICR), the affected programs include those that serve over 1,000 covered persons per year, listed here in no specific order: Workforce Investment Act (WIA) Adult, WIA Dislocated Worker, Wagner-Peyser Employment Service/Jobs for Veterans State Grants, National Emergency Grants (NEGs), Trade Adjustment Assistance (TAA), and the Senior Community Service Employment Program (SCSEP). All other qualified job training programs, including those who serve less than 1,000 covered persons, are exempt from this information collection, but will be required to adopt the covered, non-covered, veteran and eligible spouse definitions as outlined in the JVA the next time their reporting requirements are renewed.

The new reporting requirements proposed for the programs mentioned above primarily involve: 1) identifying and recording *covered persons* at the *initial point of entry*; and, 2) expanding the collection of entrant data records to include those *covered persons* served by Wagner-Peyser State Grants.

Under the proposed information collection, a new customer classification would be created called *covered entrants* – this classification as a *covered entrant* occurs at the earliest point that a *covered person* contacts the system in either a physical location (e.g., One-Stop Career Center or affiliate site) or remotely through electronic technologies. Designation as a *covered entrant* occurs prior to receipt of a service. The *entry period* is the span of time that begins on the *covered person entry date* and ends on the date 45 days following the *covered*

person entry date. The *covered entrant* classification is in addition to the *participant* customer classification, which already exists in ETA reporting

In the event that the priority of service reporting requirement is authorized before DOL’s proposed Workforce Investment Streamlined Performance Reporting (WISPR) system is fully implemented, **DOL would need a mechanism to capture individual record information on all covered entrants to the public workforce investment system**. While the other programs listed above already collect individual records, the Wagner-Peyser Employment Service program traditionally has reported data only in aggregate quarterly reports. **Therefore, DOL would require that covered entrants for the Wagner-Peyser Employment Service program (accessed through a physical location or virtual self-services), be tracked in the Workforce Investment Act Standardized Record Data (WIASRD)**. This would serve two key purposes: 1) assist DOL in receiving individual records on all covered entrants who access workforce investment services; and, 2) support integration between the WIA and Wagner-Peyser Employment Service program activities.

The proposed data requirements for priority of service may amend existing reporting mechanisms, namely those stated in the table below. Alternatively, the proposed Workforce Investment Streamlined Performance Reporting (WISPR) system would replace all reporting systems listed in the table below with the exception of SPARQ. Therefore, if WISPR is implemented in time, the priority of service reporting requirements will only impact two reporting systems (WISPR and SPARQ) as opposed to three reporting systems. The following table displays the impact on existing ETA programs and records.

SUMMARY OF RECORDS IMPACTED BY THE INFORMATION COLLECTION REQUEST	
	Name of ETA Record
Workforce Investment Streamlined Performance Reporting (WISPR) System OMB No. 1205-0469	
The WISPR reporting system would cover the following programs: <ul style="list-style-type: none"> ▪ WIA Adult ▪ WIA Dislocated Worker ▪ Wagner Peyser ▪ National Emergency Grants ▪ Veterans Employment and Training Service Program ▪ Trade Adjustment Assistance 	
WIA Adult, Dislocated Worker, National Emergency Grants and *Wagner-Peyser Employment Service OMB No. 1205-0420	
	WIA Standardized Record Data (WIASRD)
Trade Adjustment Assistance (TAA) OMB No. 1205-0392	

SUMMARY OF RECORDS IMPACTED BY THE INFORMATION COLLECTION REQUEST	
	Name of ETA Record
	Trade Act Participant Report (TAPR)
Senior Community Service Employment Program (SCSEP) OMB No. 1205-0040	
	SCSEP Performance and Results Quarterly (SPARQ) Progress

* Note: The Wagner-Peyser Employment Service program (accessed through a physical location or virtual self-services) will submit individual records on *covered entrants* via the WIASRD in the absence of WISPR.
