* On October 31, 2008, EPA approved the State of Alaska Department of Environmental Conservation's (ADEC) application to run the NPDES permitting program in the state. Alaska intends to implement the program using a phased approach, meaning that different components will take effect on different years. In this ICR the burden associated with permittees in Alaska is included as part of the federal burden due to the recent nature of the authorization and the phased approach. In the next renewal cycle this burden will be shifted to the state calculations.

**EPA retains authority for NPDES discharge permits for agricultural facilities in Oklahoma; thus, only 44 States are authorized to issue permits to CAFOs. EPA is not aware of any CAFOs in the U.S. Virgin Islands
