[Privacy Policy](#)

The requested information is for NLSC use in contacting you in reference to your application and in determining language proficiency. Failure to provide the information will make it impossible to complete the processing of your application for membership.

Required information is indicated by a red asterisk (*) next to each data field.

1. Elementary proficiency.
When I engage in simple face-to-face conversations on familiar topics, I often misunderstand people, but I am able to ask them to slow down and repeat what they say. Within those limitations, I can understand them when they talk about basic survival needs such as getting a meal, obtaining a place to stay, getting directions and other travel-related information so long as the person is speaking more clearly than normal at a rate slower than normal, with frequent repetitions or rewording.

1+. Elementary proficiency.
I can understand face-to-face speech in standard pronunciation spoken at a normal pace, with some repetition and rewording even when spoken by a native speaker who is not used to speaking to people with limited proficiency in this language. I can understand speech dealing with everyday topics, common personal and family news, well-known current events, and routine work matters. I can understand descriptions of different places and discussions about past, current, and future events. I can follow the essential points of the average discussion on work-related topics in my field. I can understand the facts, such as reported in news broadcasts, but I do not grasp deeper/hidden meanings or implications expressed through more complex language.

Required information is indicated by a red asterisk (*) next to each data field.

2+. Limited working proficiency.
I can understand the essentials of all speech in standard pronunciation, including discussions within my field of interest or specialization. I can follow accurately the essentials of conversations between educated native speakers of the language, reasonably clear telephone calls, radio broadcasts, news stories, oral reports, some oral technical reports, and public presentations on non-technical subjects. I can infer meanings that are not directly stated. I have trouble understanding native speakers if they speak very quickly or use dialect or slang.

3+. General professional proficiency.
I can understand all forms and styles of speech pertinent to my social and professional needs. This includes speech involving extensive and precise vocabulary, subtleties and nuances in standard dialects of the language, and technical discussion on professional topics within the range of my knowledge. I can understand language tailored to different audiences and purposes, including persuasion, representation, counseling, and negotiating. I can readily infer meanings and implications. I can easily understand all social conversations, radio broadcasts, and phone calls. I may experience some difficulty understanding speech heard under unfavorable conditions, such
