

**Summary of Revisions to the Hispanic Community Health Study OMB
Clearance
December, 2008**

Questionnaires added:

-**Claudication Qx:** to document peripheral vascular disease

-**Food Propensity Qx:** to adjust nutrient recall information collected at the baseline exam

-**Exit interview form:** to help the study understand how to make the experience better for the participant

Revised:

Annual Follow Up Qx: modified to minimize participant burden by developing 3 variations of the AFU form as described in Section A.15 of the Supporting Statement.

Overall AFU burden unchanged.

Informant Interview: modifications highlighted

Personal Information Qx - added "Dominican or Dominican descent" as an option for Question 5 - Hispanic/Latino Heritage category

Physician Interview: modifications highlighted (English only; Spanish translation not applicable for this document)

X.walk attachment: revised to include Claudication and FPQ

Added:

OSMB Minutes - added minutes from most recent meeting held on June 8, 2008

IRB approvals: included updated IRB approvals.

Supporting Statement - Parts A & B revised. Modifications highlighted.
