Bureau of Labor Statistics Concurrence of Surveys Employing Statistical Methods

TO: Daphne Van Buren [VanBuren.Daphne@bls.gov]		DATE: January 28, 2009
FAX:		
FROM: Bonnie Naradzay, PRA Program Manager for ETA, and Eve MacDonald, Unemployment Insurance Program Manager for 1205-0332		
ACTION: Review the attached survey, indicate approval or disapproval and return to the sponsoring agency or program. Comments shall not be made on the proposed report but in the comments space below.		
TITLE OF SURVEY OR EVALUATION Unemployment Insurance Program Tax Performance System		
CLEARANCE		
<input type="checkbox"/> Approved <input type="checkbox"/> Disapproved (See comments below)		
<input checked="" type="checkbox"/> Approved with caveats (See comments below)		
COMMENTS		
<p>The OMB will be strengthening the application of their statistical standards for PRA packages over the next several years. It is likely that on the next cycle (2011-2012) the OMB will expect to see a substantial amount of additional mathematical work for this package. It will be important that the program management for this package complete all of the needed mathematical work well before initial submission of the package for BLS review in 2011.</p>
