The Census Bureau plans to conduct additional survey work under the generic clearance for Data User Evaluation Surveys (OMB number 0607-0760).

The Census Bureau's American Community Survey Office (ACSO), Data Analysis and User Education Branch, is planning a survey to determine the usage and usefulness of its "Compass for Understanding and Using American Community Survey Data" series e-tutorial. The feedback from this survey will help the Census Bureau decide what improvements are needed and how to implement the next version of the e-tutorial.

In September 2010, we will post the survey on the Web, to a random sample of 5,000 ACS data users. We will sample from persons who use the e-tutorial via the ACS Website .

ACSO and Systems Support Division staff have reviewed and internally tested the questionnaire for ease of use and content appropriateness. We estimate respondent burden at 5 minutes per questionnaire for a total respondent burden of 417 hours.

For further information about this study, please contact Anna Owens at anna.m.owens@census.gov.
