Experimental Race Questions

B4a (X14): tests removing "race" from Other Asian and Other Pacific Islander, alphabetizing Other Asian examples, and including "banners" for Asian and Native Hawaiian and Other Pacific Islander categories

I White		
Black, African	Am., or Negro	
American India	an or Alaska Native Pri	int name of enrolled or principal tribe 🖌
	<u>Asian</u>	Native Hawaiian and Other Pacific Islander
🛛 Asian Indian	I Japanese	Native Hawaiian
Chinese	🛛 Korean	I Samoan
I Filipino	I Vietnamese I C	Guamanian or Chamorro
Other Asian – Cambodian, Hm Pakistani, Thai,	nong, Laotian,	Other Pacific Islander – Print for example, Fijian, Tongan, and so on.

B4c (X16): Cleanly tests the overall strategy of removing the 'race' term in the question by changing the question stem to exclude the term 'race' and removing 'race' from Other Asian and Other Pacific Islander instructions. *Motivation* = *Reduced* **usage of the term** "race" since national origin groups are not technically 'race' groups. *Hypothesized effect on distribution* = none.

Note that "spanner/banners" for Asian and Native Hawaiian and Other Pacific Islander are not tested since recognition of difference between national origin and race is not needed if 'race' term does not appear *in the question stem or the Other Asian and Other Pacific Islander instructions*.

Note that the removal of 'Negro' from the 'Black or African American' category will be tested cleanly in existing AQE Panel B1c.

Note that the alphabetization of Other Asian examples will be tested cleanly in existing AQE Panel B1d.
