#### **Tasks for Table Evaluation**

For this round of testing, each participant will use only one version of the table for all of the tasks. The tasks will be the same for all prototypes and for all participants. All of the tables will use the same small-area geography so that the results can be more readily compared across tables. They will be able to view all versions and indicate a "favorite" during the post-testing debriefing segment.

# TO BE USED FOR ALL THREE PROTOTYPES AND BASELINE TABLE [Wilmington, DE]

- 1. What is the first thing that you noticed about this table? [First-round results showed that color-coded column was noticed before the legend.]
  - o Probe if indicator is mentioned: What do the colors represent?
    - IF quality/reliability: How is quality measured here or what measure is used to determine the level of quality?
      - What is the coefficient of variation?
      - Is a higher or lower coefficient of variation associated with better data quality/reliability?
      - How is the coefficient of variation different from a Margin of Error?
        - Do you have a preference?
        - If so, which would you prefer to use?
  - Probe if indicator is not mentioned:
    - Did you notice the colors in the tables? What do the colors represent?
      - IF quality: How is quality measured here or what measure is used to determine the level of quality?
        - What is a coefficient of variation?
        - Is a higher or lower coefficient of variation associated with better data quality/reliability?
        - How is the coefficient of variation different from a Margin of Error?
          - Do you have a preference?
          - If so, which would you prefer to use?

Task 1 Difficulty: Easy (report features of table noticed at first glance).

2. Your supervisor asks you to find some information about the number of

women ages 15 to 50 who gave birth in the past 12 months for your hometown of Wilmington, DE [XX|975+/-478]. What information would you report to your supervisor?

Task 2 Difficulty: Medium (find information, make a judgment about acceptability of data reliability)

3. You are researching background information for a paper and need to find the number of people of West Indian descent in Wilmington, DE [XX|0+/-261]. What do you report in the paper based on your findings in the tables?

Task 3 Difficulty: Medium (find information, make a judgment about acceptability of data reliability)

4. Find the total number of people with German ancestry [XX|4,206|+/-1,083] and the total number of people with Slovak ancestry [XX|70|+/-116] for Wilmington, DE.

Which category of ancestry do you think is a better estimate in terms of data quality? [German]. Please explain why you think this is a better estimate of data quality.

Task 4 Difficulty: Hard (find information, compare 2 estimates and their associated reliability and make a judgment about acceptability of data reliability)

- 5. You work for a major corporation that sells children's products, music, and videos. Your job is to organize a concert in the Wilmington, DE area and your boss wants you to find out:
- A. How many family households in this area have children under 18 years old? Would you report this estimate? Why or why not?
- B. What is the average family size in Wilmington, DE? Would you report this estimate? Why or why not?
- C. How many nursery school, kindergarten, and elementary school students are enrolled in this area? Would you report this estimate? Why or why not?
- D. Based on the information you found, your boss wants to know whether you think Wilmington, DE is a good place to hold this concert.

Task 5 Difficulty: Hard (find multiple pieces of information, and make a judgment about acceptability of data reliability, integrate information)

6. You are asked to report to state leaders the number of people of Italian descent living in California. What answer would you give them? [1,560,870|XX|+/- 24,224] Would you recommend using this number? [Yes]

Why or why not? [XX reliability]

Task 6 Difficulty: Medium (find information, make a judgment about acceptability of data reliability)

7. The mayor of Wilmington said that if there are more than 1,500 people ages 5 to 15 with disabilities in Wilmington, the city might be eligible to receive some government funding to develop programs for the disabled. He asks you if the there are at least 1,500 people in this age group with disabilities in Wilmington. What would you tell him using ACS data?

[estimate of disabled ages 5-15 is 936 +/- 836. 1500 is in the confidence interval, but the estimate is "fair"]

Task 7 Difficulty: Hard (find information, and make a judgment about acceptability of data reliability and context of problem that involves money and impacts people (socially complex), integrate information)

8. The Danish embassy wants a listing of all cities with more than 2000 people of Danish descent. Would you include the city of Wilmington based on the ACS data?

[estimate is 657 +/- 993 and considered "poor." 2000 is out of confidence interval].

Task 8 Difficulty: Medium (find information, and make a judgment about acceptability of data reliability)

9. Cities with less than 150 people of French Canadian descent will engage in an outreach program designed to attract more people of French Canadian descent. Does Wilmington qualify based on ACS data?

[estimate is 110 +/-133, but estimate is poor]

Task 9 Difficulty: Medium (find information, and make a judgment about acceptability of data reliability)

10. You are writing a news article about voter turnout in the 2008 presidential election and want to find out how many people are 18 or older in your home town of Wilmington, DE. What results do you find in the table?

[What year the estimates came from should also be relevant]

Task 9 Difficulty: Hard (find information, and make a judgment about acceptability of data reliability, consider the year that the data were collected; integrate all of this information)

#### **Appendix F: Debriefing Questions**

- 1. Can you walk me through your thinking on why you marked (a particular QUIS item) especially low/high? (Do this for several low/high QUIS ratings; also, do this for easy/difficult ratings).
- 2. [Look at their answer for how often they use ACS data products. If they do not use them, skip this question.] What was the last real-world task that required you to consult ACS data products? For instance, what estimates did you need to look up for a news story, etc.?
- 3. How easy or difficult do you feel it was to complete the tasks? What made a task easy or difficult?
- 4. Do you think the new color-coding scheme for the ACS table helped you find accurate answers?
- 5. Do you think the new color-coded ACS table helped you to find information quickly? Did you think the color-coding made it take longer or seem more difficult to find information?
- 6. How satisfied are you with your experiences using the ACS data reliability indicators?
- 7. What did you like best about the table?
- 8. What did you like least about the table?

Open all prototypes.

- **9.** Here are three versions of this color-coded reliability indicator. Some have different levels of indicator and some have different text to describe their meaning.
  - Which of these tables make it easiest or harder to find information about data quality/reliability? What about this table makes it the easiest to use?
  - Which of these tables do you most prefer (e.g., like best)?

Open one current table.

- 10. These are how the ACS data tables currently look. Do you prefer the new tables or the current tables? Please explain your answer.
- 11. Is there anything else you would like to mention?
