

INFORMATION COLLECTION SUPPORTING STATEMENT

EXTENSION OF A CURRENTLY APPROVED COLLECTION

TSA CUSTOMER COMMENT CARD

- 1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information. (Annotate the CFR parts/sections affected).***

In light of TSA's visible presence and interaction with the traveling public, TSA utilizes a Customer Comment Card at airports to solicit public feedback. TSA seeks suggestions, compliments, and complaints to ensure travelers' experience with TSA are customer-friendly. For example, as TSA modifies its security procedures in response to threats or other circumstances, the Customer Comment Card is a critical source of information for public feedback in response to these changes in procedure. The Customer Comment Card allows TSA to collect comprehensive feedback in a timely manner and respond appropriately.

TSA's goal is to adopt an analytical, collaborative framework to ensure that customer impact is considered when considering changes to operations and policies; this impact can include the treatment of and communication with the customer during direct screening operations. The TSA Customer Comment Card is an important tool in facilitating this goal.

- 2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.***

TSA will collect comments on the TSA Customer Comment Card from passenger respondents at airports. Respondents may deposit the comment card in drop-boxes at the airport, via submissions to TSA supervisors or managers, and by mailing the card to TSA. TSA will use the data collected from the card to prepare Performance Measurement Improvement System (PMIS) reports. TSA personnel at airports are required to prepare daily PMIS reports that include data concerning customer complaints and compliments. PMIS reports are submitted to Headquarters for use in developing measures required by the Government Performance and Results Act (GPRA), which requires all Federal agencies to define performance goals, and measure agency and program performance in the achievement of these goals, and for measuring customer satisfaction. This card will enhance the accuracy of the data being reported and will place the TSA Customer Service Manager at each airport in a better position to quickly respond to citizens' concerns at TSA operations.

3. ***Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden. [Effective 03/22/01, your response must SPECIFICALLY reference the Government Paperwork Elimination Act (GPEA), which addresses electronic filing and recordkeeping, and what you are doing to adhere to it. You must explain how you will provide a fully electronic reporting option by October 2003, or an explanation of why this is not practicable.]***

There are no current plans for the electronic submission of responses. TSA's intent is to make the feedback process accessible to all passengers, including those who do not have access to the Internet.

4. ***Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purpose(s) described in Item 2 above.***

This information collection will not be a duplication of any existing collections.

5. ***If the collection of information has a significant impact on a substantial number of small businesses or other small entities (Item 5 of the Paperwork Reduction Act submission form), describe the methods used to minimize burden.***

The collection will not have an impact on small businesses or other small entities.

6. ***Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.***

Without this collection, TSA will not have a mechanism for the expeditious daily collection of customer feedback. Such an instrument is needed to facilitate addressing and resolving these concerns as quickly as possible. Inevitably, new security threats will arise that will influence the screening process in the future. If TSA does not implement a collection that is available on a daily basis, it will not be able to quickly and efficiently gauge public reaction to any procedural changes and respond appropriately, to include conducting public education activity.

7. ***Explain any special circumstances that require the collection to be conducted in a manner inconsistent with the general information collection guidelines in 5 CFR 1320.5(d)(2).***

The collection will be conducted in a manner consistent with the general information collection guidelines.

- 8. Describe efforts to consult persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8(d) soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.**

TSA published a 60 Day renewal notice in the Federal Register on May 9, 2008 (73 FR 26404). To TSA's knowledge, no comments were received in response to this notice.

- 9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.**

The respondents will not be paid for their participation in the feedback activity.

- 10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.**

Based on the nature of the collection, the respondents cannot be guaranteed confidentiality. If the agency is to appropriately follow up on the concerns, certain personal information is needed.

- 11. Provide additional justification for any questions of sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.**

No questions that could be considered sensitive are included in this collection.

- 12. Provide estimates of hour burden of the collection of information.**

The number of respondents annually for the entire program is estimated to be 150,000. TSA estimates that it would take approximately five minutes to complete the card; therefore, the total annual hour burden requested is estimated to be 12,500.

Respondents	Burden	Total
150,000	5 Minutes (.83)	12,500

13. Provide an estimate of the total annual cost burden to respondents or recordkeepers resulting from the collection of information.

For most respondents, the total annual cost burden is \$0. For respondents who choose to mail the comment card to TSA instead of using the drop-boxes available at airports, the cost would be a postage stamp. Thus, the total annual cost if all respondents choose to mail the comment card would be \$63,000 (\$.42 stamp x 150,000). This cost is likely an overestimate as TSA assumes most respondents provide the card to TSA at airports.

14. Provide estimates of annualized cost to the Federal Government. Also, provide a description of the method used to estimate cost, and other expenses that would not have been incurred without this collection of information.

The estimated annual cost to the Federal Government will be \$25,000 for card printing. These figures were derived by estimating that approximately 500,000 passengers that pass through the checkpoints will take a card from the display stands at those airports who participate in the program. With an estimated printing cost of \$.05 per card, the total annual printing expenses will be \$25,000.

15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB Form 83-I.

TSA reported an adjustment in Items 13 based on a change in the estimated number of respondents completing the TSA Customer Comment Card after nearly 3 years of using the card, but the estimated cost to the Federal Government is less than the previous information collection request submitted in 2005. Also, TSA reported an adjustment in cost to respondents due to adding the cost of postage for those who choose to mail the card to TSA.

16. For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.

TSA will not publish this information.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

The expiration date of the OMB approval is displayed on the card.

18. Explain each exception to the certification statement identified in Item 19, "Certification for Paperwork Reduction Act Submissions," of OMB Form 83-I.

TSA is not seeking any exceptions to the certification statement.
