Bathroom and Utility Room Fans - 140 to 500 cfm (max)		
In-Line Ventilating Fans - single-port ²		
In-Line Ventilating Fans - multi-port ³		
Total		

DEFINITIONS

¹ A ceiling, wall-mounted, or remotely mounted in-line fan designed to be used in a bathroom or utility room, whose purpose is to move objectionable air from inside the building to the outdoors. Residential ventilating fans (whole-house fans) or air circulation are excluded. Heat/energy recovery ventilation fans ducted to the ventilating fans (e.g., gable fans), residential ventilating fans with heat lamps are excluded. This definition does not include any other type of ventilation of any kind.

^{2,3} A fan designed to be located within the building structure and requires ductwork on both intake and exhaust. Fans with only one intake are referred to as "single port" in-line fans, while those with multiple intake ports are referred to as "multi-port" in-line fans.

Submission Deadline: March 31, 2008
