DEFINITIONS

¹ Ice Making Head: A model with the ice-making mechanism and the condensing unit in a single package, but with a separate ice storage bin.

² Remote Condensing Unit or Split System Unit: A model in which the ice-making mechanism and condenser or condensing unit are in separate sections.

³ Self-Contained Unit: A model in which the ice-making mechanism and storage compartment are in an integral cabinet.

EPA plans to use the data only for program evaluations. EPA will release this information only as aggregated data and only to the extent required by law.

The public reporting and recordkeeping burden for this collection of information is estimated to average 6.69 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.
