

SUPPORTING STATEMENT

A. Justification

1. The Federal Communications Commission (“Commission”) is requesting that the Office of Management and Budget (OMB) approve this submission as an extension of a delegated authority information collection under OMB Control No. 3060-0944 titled, “Cable Landing License Act – 47 CFR 1.767; 1.768; Executive Order 10530.” With this submission, the Commission is clearly stating and clarifying the rule sections and information collection requirements that are contained in this information collection which are covered under 47 CFR 1.767 and 1.768, and Executive Order 10530.

Background Information

In order to land a submarine cable on U.S. shores, a carrier must generally obtain cable landing license from the U.S. government. The Cable Landing License Act, gives the President of the United States broad discretion to grant, withhold, condition or revoke cable landing licenses under certain conditions. By Executive Order 10530, the Commission has been delegated the responsibility for issuing cable landing licenses.

Current Cable Landing License Application

We are requesting continued OMB approval of the Submarine Cable Landing License Application (FCC Form 220) referenced under 47 CFR 1.767 and Executive Order 10530. The purpose of this application is to request authorization from the Commission to land one or both ends of a cable in the territorial waters of the U.S.

Cable Landing License Application Forms Pending Development by the Commission

The Commission plans to develop eight new cable landing license application forms that impact this information collection. We do not know the specific time frame for the development of each application form. However, we estimate that the new projected completion date for all cable landing license application forms is December 30, 2012. The development of the application forms is contingent upon the availability of budget funds, human resources and other factors.

In March 2006, the Commission received blanket approval of all eight applications listed below with the following terms of clearance: OMB approves this information collection. However, as applications contained within the supporting statement are developed, a change worksheet

should be submitted to OMB. The change worksheet should include the information elements that are to be collected, as well as a copy of the proposed form. This should be submitted before the application goes “live” and OMB reserves the right to make modifications to the forms and information collected as necessary.

Currently, applicants file pleadings with the Commission for amendments, modifications and other filings for which there is no existing application form.¹ These information collections are approved under OMB Control No. 3060-0944. On September 30, 2008, the Commission’s International Bureau launched an e-filing module in IBFS to provide the option of electronic filing for certain filings in lieu of filing through the Commission’s Office of the Secretary. Interested parties have the option to file their applications, pleadings and other filings through the IBFS module or submit their filings to the Office of the Secretary. (Please reference Public Notice DA 08-2173 for additional information).

¹ The Commission expects the burden for the existing requirements to be reduced for the respondent once the Cable Landing License Application Forms are developed.

A complete list of cable landing license applications pending development is as follows:

Name of Form	Brief Description	Rule Section
1. Submarine Cable Landing License Amendment	Amendment of an application to correct information required for the processing of the original application.	§1.767(m)(1)
2. Submarine Cable Landing License Assignment	Application to assign a license, or a portion of it, from one entity to another. Following an assignment, the license will usually be held by an entity other than the one to which it was originally granted.	§1.767(a)(11)
3. Submarine Cable Landing License Landing Point Notification	Notification of specific description of the landing stations in the U.S. and the foreign countries where the cable will land.	§1.767(a)(5) §1.767(g)(8)
4. Submarine Cable Landing License Modification	Modification application requesting authority to modify the terms or conditions of a license, such as adding a new licensee or relinquishing an interest in a license; also may be used to update information required to maintain accuracy of the certifications made in the original application.	§1.767(m)(1)

Name of Form	Brief Description	Rule Section
5. Submarine Cable Landing License Special Temporary Authority	Application requesting immediate authority for temporary service or for emergency service (Special Temporary Authority)	§1.767(a)
6. Submarine Cable Landing License Transfer of Control of License	Application to transfer control of a license. Following the transfer of control, the license remains held by the same entity or entities, but there is a change in the entity or entities that control a license holder.	§1.767(a)(11)
7. Submarine Cable Landing License Other Filings	Notification of miscellaneous items such as name changes, notification of consummation of transfers of control and assignments.	§1.767(a)(11)(iii)
8. Submarine Cable Landing License Notification of Operation	Notifications of the commencement of service and/or termination of service	§1.767(g)(14)

As noted on the OMB Form 83-I, this information collection does not affect individuals or households; thus, there are no impacts under the Privacy Act.

The statutory authority for this information collection is contained in the Submarine Cable Landing License Act of 1921, Executive Order 10530, 47 U.S.C. 34-39, 151, 154(i), 154(j), 155, 225, 303(r), 309 and 325(e).

2. The information will be used by the Commission staff in carrying out its duties under the Cable Landing License Act. The information collections pertaining to Part 1 of the rules are necessary to determine whether the Commission should grant a license for proposed submarine cables landing in the United States. Pursuant to Executive Order No. 10530, the Commission has been delegated the President's authority under the Cable Landing License Act to grant cable landing licenses, provided that the Commission must obtain the approval of the State Department and seek advice from other government agencies as appropriate.

3. It is estimated that 95 percent of submarine cable landing license applications and pleadings are submitted to the Commission electronically through the International Bureau Filing System (IBFS), including the IBFS module. It is estimated that 5 percent of interested parties file pleadings in paper form through the Commission's Office of the Secretary.
4. An applicant for a common carrier subcable must file two electronic applications: (1) a cable landing license application and (2) an international section 214 application for overseas cable construction. While the applicant may be able to use some of the same information in both applications, the applicant must file two separate applications through the IBFS.
5. The Commission has considered the impact of our information collection requirements on small businesses and other small entities, and it believes that the public interest requires the Commission not to adopt an exemption for these entities. In order to fulfill its statutory obligations under the Cable Landing License Act, the Commission must analyze the impact of foreign carrier investment in submarine cables landing in the United States. The rules and regulations will benefit all entities by expediting the processing of applications. Also, the Commission has developed procedures that permit a large number of small entities to be exempt from the requirements contained in the Order.
6. The frequency of filing applications under the Cable Landing License Act will be determined largely by the applicants seeking to construct and operate a submarine cable. If the collection is not conducted or is conducted less frequently, applicants will not obtain the authorizations necessary to provide telecommunications services, and the Commission will be unable to carry out its mandate under the Cable Landing License Act and Executive Order 10530. In addition, without the collection, the United States would jeopardize its ability to fulfill the U.S. obligations as negotiated under the World Trade Organization (WTO) Basic Telecom Agreement because these information collection requirements are imperative to detecting and deterring anticompetitive conduct. They are also necessary to preserve the Executive Branch agencies and the Commission's ability to review foreign investments for national security, law enforcement, foreign policy, and trade concerns.
7. There are no other special circumstances associated with this collection of information.

8. The Commission published a 60-day notice in the Federal Register (73 FR 65310). The public comment period began on November 3, 2008 and ended on January 2, 2009. The Commission did not receive any comments in response to 73 FR 65310².
9. Respondents will not receive any payments or gifts.
10. The Commission has not granted assurances of confidentiality to those parties submitting the information. In those cases where a respondent believes information requires confidentiality, the respondent can request confidential treatment and submit a protective order requesting confidential treatment. Commission staff will make a determination pursuant to agency rules.
11. The collection of information does not include any questions of a sensitive nature.
12. There are 246 applicants/licensees who will comply with the information collection requirements contained in this supporting statement. The estimated total annual number of responses and annual burden hours are listed below.

Chart of Respondents, Responses and Annual Burden Hours

Rule Section and Explanation	Number	Time Per	Total Annual Burden Hours³
of Burden Estimate 1\	of Responses	Response	
47 CFR 1.767(a); EXECUTIVE ORDER 10530 CABLE LANDING LICENSE APPLICATION (FCC FORM 220) The specific contents of the application are included in 47 CFR 1.767(a)(1) through (a)(10)	6	2 hours (On occasion)	12 hours
47 CFR 1.767(a) SUBMARINE CABLE LANDING LICENSE SPECIAL TEMPORARY AUTHORITY	3	2 hours (On occasion)	6 hours

² On November 26, 2007, the Commission received PRA comments from Kent Bressie on behalf of North American Submarine Cable Association (NASCA) for Section 1.767(k)(4) and the Note to Section 1.767(a)(10) and the Commission has not yet acted on the NASCA petition for reconsideration nor has the Commission filed the appropriate documents with OMB responding to the NASCA comments on the PRA. Thus, the rules have not yet gone into effect and are not included with this submission.

³ All of the information collection requirements contained in this chart including waivers have true burden impacts.

Executive Order 10530

February 2009

A licensee that files a prior notification pursuant to paragraph (a) of this section may request confidential treatment of its filing, pursuant to Section 0.459 of this chapter, for the first 20 days after filing		(On occasion)	
47 CFR 1.768(j) All notifications described in Section 1.768 must be filed electronically through the International Bureau Filing System (IBFS)	0 See R&O (FCC 05-91)	0	0
Totals:	246 Number	1 - 16 Hours	516 Total Annual Burden Hours
	of Responses		

In-House Costs – We estimate that in-house staff is paid at an estimated rate of \$40 per hour.

$$516 \text{ hours} \times \$40 \text{ per hour} = \$20,640 \text{ Total In-House Costs to Respondents}$$

13. Annual Burden Cost:

(a) Capital and Start-up Costs: 0

(b) Operation and Maintenance Costs

Outside Legal/Engineering Assistance: We estimate that the respondent will require outside legal assistance for 50% (123) of the responses after the respondent has completed his/her part.⁵ The cost of outside legal assistance is estimated at \$200 per hour. The figure is based on a small survey of local firms in the D.C. area and is considered a conservative estimate.

$$123 \text{ responses} \times \$200 \text{ per hour} \times 2 \text{ hours per submission} = \$49,200 \text{ Total Outside Legal/Engineering Costs}$$

⁵ See question 12 of this supporting statement for the respondent's burden for the information collection requirements.

Application Filing Fees:

As shown on the chart below, the total of application filing fees is **\$191,745**.

Cable Landing License Application Filing Fees	Number of Applicants	Application Fees	Total Costs
Cable Landing License (Common Carrier)	1	\$1,700	\$1,700
Cable Landing License (Non-common Carrier)	5	\$16,820	\$84,100
Overseas Cable Construction	6	\$15,120	\$90,720
Special Temporary Authority	3	\$1,015	\$3,045
Assignments and Transfers of Control	12	\$1,015	\$12,180
Totals:	27	\$35,670	\$191,745

(c). Total Annual Cost Burden

Description of Estimated Costs to Respondents	Total Costs
Outside Legal/Engineering Assistance	\$49,200
Application Filing Fees	\$191,745
Total Cost to Respondents	\$240,945

14. Estimates of Annualized Cost to the Federal Government:

The estimates of annualized cost to the Federal government are summarized in the chart below. As shown in the chart, the annualized costs to the Federal government are **\$338,770**.

Federal Government Staff	Number of Staff	Salary Per Hour	Annual Burden Hours	Annualized Costs
GS-15/Step 5 Attorney	6	\$65.62	500	\$196,860
GS-14/Step 5 Attorney	4	\$55.78	500	\$111,560
GS-15/Step 5 Engineers	1	\$65.62	250	\$16,405
GS-14/Step 5 Engineers	1	\$55.78	250	\$13,945
	12			\$338,770

15. This Supporting Statement reflects adjustments of +46 responses, -485 annual burden hours and -\$161,055 annual costs. These adjustments are attributed to more current and accurate estimates of the annual burden hours and annual cost burden.

16. The Commission does not plan to publish the information for statistical use.

17. No waiver of the OMB expiration date is necessary.

18. The Commission published a 60-day notice in the Federal Register (73 FR 65310). The Commission published in error in the notice the following information: total number of respondents as 25; total number of responses as 200; estimated time per response as 5 to 9 hours; total annual burden hours as 1,001 hours and the total annual cost burden as \$402,000. The Commission corrects these numbers to read: total number of respondents as 246; total number of responses as 246; estimated time per response as 1 to 16 hours; total annual burden hours as 516 hours and total annual cost burden as \$240,945. Lastly, quarterly reporting requirement is included in this information collection. It was inadvertently omitted from the notice. There are no other exceptions to the Certification Statement.

Part B. Collections of Information Employing Statistical Methods:

This collection of information does not anticipate the use of statistical methods.
