Information is needed on the expected peach crop in Michigan. Response to this report is voluntary and not required by law, but your reply to the questions on this form will be very helpful. Individual reports will be kept confidential. Please return this inquiry promptly. Thank you for your cooperation.

Please make corrections to name, address and Zip Code, if necessary.

### Definitions:

**Bearing Acreage:** Acres from which you will harvest peach this year. Include blocks you rent from others, and exclude blocks rented out. Deduct any waste area within blocks.

**Expected Production:** The total pounds you anticipate harvesting. Consider the current condition of your orchards, and assume average weather and pest infestations until harvest.

**Expected Percent of Full Crop:** A full crop is the yield you would expect to achieve under normal production conditions. This yield may or may not be the maximum production potential for your operation. Therefore, your Expected Percent of Full Crop may exceed 100%. Example: You project a mature block should produce 20,000 lbs./acre and you estimate this year it will produce 22,000 lbs./acre or 110% of a full crop.

1. Bearing acreage in **2006** .....
2. Expected percent of full crop .....
3. Expected **2006** production .....
4. **2005** production .....
5. **CROP OBSERVATIONS/COMMENTS:** (Use reverse side if necessary.)
