Subject: ublic comment on federal register below

these tests are ludicrous - they spend alot of money and keep letting the nitrates used by agribusienss and the toxic chemicals they use CAUSE the red bloom. why are we allowing this industry to continue to pollute and cause these issues? studying how sick it makes us is not the issue. we know we cannot allow this to continue. get some rules in place that stop agribusiness from using millions of tons of nitrates that take all the oxygen out of the water and the other billions of tons of toxic chemicals that they are poisoning us all with. GET THEM TO CLEAN UP FIRST. THEN MAYBE TEH RED BLOOM WONT BE THERE. CLEAN UP OUR WATER PLEASE.

B.S ACHAU
